**In Search of the Hidden Treasure** George Rapanos, 2006-12-01 In Search of the Hidden Treasure The Pearl of Great Worth is a book dealing with religious transformation It is an aggregate of various sources as diverse as Buddha Meister Eckhart Edna St Vincent Millay Samuel Taylor Coleridge Walt Whitman and the Bible This book is both a spiritual autobiographical affirmation of my faith and encouragement to those who wish to follow a path that may lead them to spiritual fulfillment It evolved from a religious revelation which I had in 1984 and is an anguished forthright attempt to come to grips with the religious issues which I found hostile and unfriendly and contained in daily life It is not my intent to reveal a set of truths about God as much as it is an attempt to convey through prose poetry quotations parables wisdom tales and my own mythological story and poetic works the intuition of reality that touches the heart and burns and stirs the soul I have written what I feel is crucial and important in describing the reality of truth

**Looking Beyond the Runway** Nawal K. Taneja, 2016-12-05 The global airline industry facing significant changes and discontinuity is prompted and forced to deal with a new normal Who would have imagined a few years ago that a significant percentage of consumers in the US now prefer to fly low cost airlines instead of full service airlines because they perceive the product to be better airlines would generate up to a third of their total income from non ticket revenue many low cost airlines would add complexity to their original simple business models through the development of code share agreements the use of global distribution systems and travel agents to distribute their seats Jetstar a low cost subsidiary of Qantas would grow faster and be more profitable than its parent a survey carried out by Ryanair would show that 42 percent of passengers would be willing to stand on short one hour flights if they could pay 50 percent less than seated passengers passengers could pay as little as US 2 000 for a transatlantic Business Class ticket on top brand airlines Lufthansa would have ownership in airlines based in Austria Belgium Italy Switzerland Turkey the UK and the US and that it would continue to pursue equity ownership in airlines based in Poland and Scandinavia or the Japanese and Canadian governments would struggle to find different ways to bail out their heretofore flag carriers To deal with this upcoming new normal airlines have to go beyond their short term circumstantial strategies they need strategic renewal of their ageing business model In this candidly written book Nawal Taneja explains what will separate the winners from the losers He maintains the leaders will be the airlines that 1 exploit this crisis driven change to their best advantage 2 learn to work around the airline inherent constraints that prevent them from running their businesses just like other businesses 3 learn from successes and failures of other global enterprises 4 sharpen their business intelligence analytics and strategic agility and 5 proactively explore the pockets of growth in this emerging markets century To help airline executives become informed of new competitive games the author analyzes numerous business sectors such as auto hospitality retail technology and entertainment For example relevant lessons can be learned from the strategic mistakes made by the US automakers Likewise emergent and compelling insights can be gained in superior customer experience from

Ritz Carlton and Zappos and in value creating innovation from Cirque du Soleil and Zipcar The book also features a multitude of forewords from airlines and related businesses to provide readers with multiple perspectives on the changing landscape in the global airline industry Nawal Taneja is a career analyst of the global airline industry with wide ranging experience in the aviation industry academia and public policy Encouraged by industry executives he has written five other books for practitioners in the global airline industry including FASTEN YOUR SEATBELT The Passenger is Flying the Plane and Flying Ahead of the Airplane

American territorial borders have undergone significant and unparalleled changes in the last decade They serve as a powerful and emotionally charged locus for American national identity that correlates with the historical idea of the frontier But the concept of the frontier so central to American identity throughout modern history has all but disappeared in contemporary representation while the border has served to uncomfortably fill the void left in the spatial imagination of American culture This book focuses on the shifting relationship between borders and frontiers in North America specifically the ways in which they have been imaged and imagined since their formation in the 19th century and how tropes of visibility are central to their production and meaning Rodney links ongoing discussions in political geography and visual culture in new ways to demonstrate how contemporary American borders exhibit security as a display strategy that is resisted and undermined through a variety of cultural practices *Looking Beyond Profit* Peggy Chiu,2016-05-06

In this revealing book Peggy Chiu argues against the common belief that maximizing wealth is the primary concern of ordinary small shareholders when they make their share buying decisions This fascinating in depth study of small shareholders provides both theoretical and empirical insights into their personal values and attitudes to corporate social responsibility CSR The author establishes that personal values are a major influence on decisions about the type of investments people make and about which companies they choose to invest in Financial risk and return are far from being the only factors that determine small shareholders investment decisions irresponsible behaviour is not acceptable and will not attract investment from this significant group Looking Beyond Profit is an essential book not just for encouraging investment managers to look more closely at their environmental impacts but for finance advisers and all concerned with corporate governance either as practitioners researchers business educators or students
