

Seeds for the future! Celebrating our past, investing in our future!

Seeds From Our Past

Patrick Vollmar

Seeds From Our Past:

The Age of Seeds Fiona McMillan-Webster, 2022-07-26 Plants evolved seeds to hack time Thanks to seeds they can cast their genes forward into the future enabling species to endure across seasons years and occasionally millennia When a 2000 year old extinct date palm seed was discovered no one expected it to still be alive But it sprouted a healthy young date palm That seeds produced millennia ago could still be viable today suggests seeds are capable of extreme lifespans Yet many seeds including those crucial to our everyday lives don't live very long at all In *The Age of Seeds* Fiona McMillan Webster tells the astonishing story of seed longevity the crucial role they play in our everyday lives and what that might mean for our future

Grain World, 1909 Seed Libraries Cindy Conner, 2015-02-01 Community based initiatives to preserve and protect our food supply Historically seed companies were generally small often family run businesses Because they were regionally based they could focus on varieties well suited to the local environment A Pacific Northwest company for example would specialize in different cultivars than a company based in the Southeast However the absorption of these small independent seed businesses into large multinationals combined with the advancement of biotechnology resulting in hybrids and GMO seeds has led to a serious loss of genetic diversity The public is now at the mercy of the corporations that control the seeds In the past few years gardeners have realized the inherent danger in this situation A growing movement is striving to preserve and expand our stock of heritage and heirloom varieties through seed saving and sharing opportunities *Seed Libraries* is a practical guide to saving seeds through community programs including Step by step instructions for setting up a seed library A wealth of ideas to help attract patrons and keep the momentum going Profiles of existing libraries and other types of seed saving partnerships Whoever controls the seeds controls the food supply By empowering communities to preserve and protect the genetic diversity of their harvest *Seed Libraries* is the first step towards reclaiming our self reliance while enhancing food security and ensuring that the future of food is healthy vibrant tasty and nutritious Cindy Conner is a permaculture educator founder of Homeplace Earth and producer of two popular instructional gardening DVDs She is also the author of *Grow a Sustainable Diet* *History of Soybean Seedsmen and Seed Companies Worldwide (1854-2020)* William Shurtleff; Akiko Aoyagi, 2020-10-18 The world's most comprehensive well documented and well illustrated book on this subject With extensive subject and geographic index 162 photographs and illustrations including many early seed catalog covers Free of charge in digital PDF format Seeds of Love Jerry Braza, Ph.D., 2012-02-28 Using the garden as a metaphor *The Seeds of Love* is a charming guide to creating your own mindfulness The development of the practice of mindfulness and its tools can help to maintain a state of awareness and openness to oneself and others In *The Seeds of Love* readers interested in Zen Buddhism will learn how to nurture metaphorical seeds such as compassion joy and generosity and how to use personal challenges such as jealousy anger and self doubt as a tool for growth The 20 chapters include *Seeing It All Begins with the Gardener Being Watering the Seed of Mindfulness Watering Seeds of Love and Transforming Seeds of*

Suffering Deep Listening Creating a Legacy as a Master Gardener Tending Your Inner Garden Using precepts from many faiths and traditions The Seeds of Love offers simple basic actions to help readers reach the best within themselves and share it with those around them It will be an invaluable guide to anyone seeking deeper and more conscious relationships

Digging the Past Frances E. Dolan, 2020-07-17 A detailed study of seventeenth century farming practices and their relevance for today We are today grappling with the consequences of disastrous changes in our farming and food systems While the problems we face have reached a crisis point their roots are deep Even in the seventeenth century Frances E Dolan contends some writers and thinkers voiced their reservations both moral and environmental about a philosophy of improvement that rationalized massive changes in land use farming methods and food production Despite these reservations the seventeenth century was a watershed in the formation of practices that would lead toward the industrialization of agriculture But it was also a period of robust and inventive experimentation in what we now think of as alternative agriculture This book approaches the seventeenth century in its failed proposals and successful ventures as a resource for imagining the future of agriculture in fruitful ways It invites both specialists and non specialists to see and appreciate the period from the ground up Building on and connecting histories of food and work literary criticism of the pastoral and georgic histories of elite and vernacular science and histories of reading and writing practices among other areas of inquiry Digging the Past offers fine grained case studies of projects heralded as innovations both in the seventeenth century and in our own time composting and soil amendment local food natural wine and hedgerows Dolan analyzes the stories seventeenth century writers told one another in letters diaries and notebooks in huge botanical catalogs and flimsy pamphlets in plays poems and how to guides in adages and epics She digs deeply to assess precisely how and with what effect key terms figurations and stories galvanized early modern imaginations and reappear often unrecognized on the websites and in the tour scripts of farms and vineyards today

Understanding Our Mind Thich Nhat Hanh, 2008-11 Understanding Our Mind is an accessible guide for anyone who is curious about the inner workings of the mind Originally released as Transformation at the Base a finalist for the 2001 Nautilus Award this seminal work on Buddhist applied psychology features a new introduction by Dharma teacher Reb Anderson Understanding Our Mind is based on fifty verses on the nature of consciousness taken from the great fifth century Buddhist master Vasubandhu With compassion and insight Nhat Hanh reveals how these ancient teachings can be applied to the modern world Nhat Hanh focuses on the direct experience of recognizing and embracing the nature of our feelings and perceptions The quality of our lives he says depends on the quality of the seeds in our minds Buddhism teaches us how to nourish the seeds of joy and transform the seeds of suffering so that our understanding love and compassion can flower
