Looking Glass Universe The Emerging Science Of Wholeness:

Looking Glass Universe John Briggs,F. David Peat,1984 A User's Guide—The Sequel Herb Gruning,2022-08-30

There is science and there is religion and never the twain shall meet Is that to be the fate of these two disciplines Having one foot in the religious world and the other in the scientific can be as precarious as attempting to remain astride two logs in a river In this sequel to A User s Guide to Our Present World What Everyone Should Know about Religion and Science complexions of what religion and science look like today are investigated It discusses topics from Jesus and family values evangelists who arrive at your door discrimination and racism and the dark side for religion to delicate balances impacting us and the world climate change the pandemic and how ancient structures like Stonehenge and the pyramids could have been built for science The study then turns to theological implications of scientific theories including relativity and quantum Sure to ruffle the feathers of some from both sides the examination focuses on how scientific paradigms fail to cohere with traditional theological doctrines and presents the potentially uncomfortable view that scientific revolutions might warrant a corresponding revolution for theology itself *The Philosophy, Theory and Methods of J. L. Moreno* John Nolte,2014-06-05 J

L Moreno M D is recognized as the originator of sociometry and psychodrama and was a prodigious creator of methods and theories of creativity society and human behavior The methods and techniques he authored have been widely adopted the theories and philosophy upon which the methods are founded have not as they are frequently couched in language which is not easily understood Moreno s ideas about group psychotherapy have pretty well gotten lost and what he considered his greatest contribution sociometry gets paid superficial attention by most psychodramatists Group psychotherapy and psychodrama are both widely practiced but often based on non Morenean theory likely due to the inaccessibility of Moreno s work This book outlines Moreno s early years his religious phase the philosophy on which the foundation of his methods are based and a description of the three major methods Moreno originated psychodrama sociometry and group psychotherapy It provides a more systematic presentation of Moreno s work and presents his philosophy and theory clearer more understandable manner **The Ends Of Science** Harry Redner,2019-07-11 In this path breaking and controversial book

Harry Redner provides a systematic study of how the epistemologically interesting features of contemporary science are to be understood Taking science to include knowledge from the social sciences and humanities as well as the physical sciences Redner shows how the history of science philosophical theory and current scientific research reveal connections between scientific developments and features of the social organization of science Redner argues that the shift from Classical science to a more complex and less orderly World science after World War II has changed the way scientific research is done and how its knowledge is organized His aim however is not merely to interpret science but to change it Thus this examination is more than a survey and critique it is a positive program for the development of future science Remarkable for its breadth and insight the book is especially valuable for its discussions of authority and social organization with the accompanying themes

of academic politics competition power and corruption and for its catalog of the various contemporary critiques of science. Some of these are European in origin and will be new to many U S readers. A tour de force on several levels, this book is essential reading for scientists, philosophers, sociologists of science, historians of ideas, critics of contemporary culture, and indeed for anyone who takes a serious interest in scientific research and higher learning. Thinking Through Poetry Marjorie Levinson, 2018-07-11

Thinking through Poetry Field Reports on Romantic Lyric pursues two goals. The title signals the contribution to debates about reading. Do we think through by means of with poems sympathetically elaborating their surfaces? Is this compatible with a second meaning: thinking through poems to their end, solving a problem, getting to its root, its deep truth? Third, can we square these surface and depth readings with a speculative philosophical criticism to which the poem carries us where through denotes a going beyond? All three meanings of through are in play throughout. The subtitle applies field first to Romantic studies, since the 1980s a field that this project reflects upon from beginning to end. Examples are drawn especially from Wordsworth but also from Coleridge and in assessing Romanticism's afterlife from Stevens. Field also characterizes the shift from a unitary to a field concept of form during that time span, a shift pursued through prolonged engagement with Spinoza. Field thus underscores the synthesis of form and history, the importance of analytic scale to that synthesis, and the displacement of entity/text by relation as the object of investigation. While the book historically connects early nineteenth-century intellectual trends to twentieth- and twenty-first-century scientific revolutions, its focus is on introducing new models to literary criticism. Unlike accounts of the influence of science on literature or various literature X approaches (literature and ecology, literature and cognitive science), it constructs its object of inquiry in a way cognate with work in non-humanities disciplines, thus highlighting a certain unity to human knowledge. The claim is that specialists in literature should think the way distinguished scientists think, and vice versa. *God, Faith, and Health* Jeff Levin, 2007-07-20

In this groundbreaking book, Dr. Jeff Levin explores the latest compelling evidence of the connection between health and an array of spiritual beliefs and practices, including prayer, attending religious services, meditation, and faith in God. Drawing on his own and other published studies, Dr. Levin shows how religion's emphasis on healthy behaviors and supportive relationships influences one's overall health and how the optimism and hopefulness of those who profess faith promote the body's healing responses. Filled with dramatic personal stories, *God, Faith, and Health* will alter the way you think about your body and your faith and will show you the path to improving your own health through spiritual practice. Jeff Levin writes with incredible clarity, style, and passion. This book is a must-read for anyone interested in the religion/health connection, especially those wondering if such a connection exists at all. Harold G. Koenig, M.D., Associate Professor of Psychiatry and Medicine, Duke University Medical Center, and author of *The Healing Power of Faith*. Beautifully written and packed with compelling scientific evidence for the spirituality/health connection. With the precision of a scientist, the courage of a true pioneer, and the artistry of a storyteller, Levin reminds us of what we can no longer afford to ignore: that our spiritual life matters mightily.

Non-Governmental Organisations - Performance and Accountability Michael Edwards,David Hulme,2014-03-18 The last decade has seen some significant changes in international development and in the status of non governmental organisations operating in the field Not only has the number of NGOs virtually doubled many of them have seen a considerable growth in their budgets and have grown closer to governments and official aid agencies NGOs are acknowledged by many to be more effective agents of development than governments or commercial interests even as a magic bullet for development problems Despite these positive trends the real impact of the NGO sector is not well documented This is partly because NGO performance assessment and accountability methods are weak and partly because NGOs are caught up increasingly in the world of official aid which pushes them towards certain forms of evaluation at the expense of others This unique book takes a hard and critical look at these issues and describes how NGOs can and must improve the way they measure and account for their performance if they are to be truly effective **The Nature of Nature** Irving Dardik,Estee Dardik Lichter,2017-05-16 What is everything made of How do things change and how do they work What is life In The Nature of Nature visionary scientist Irv Dardik tackles these questions by introducing his discovery of SuperWaves a singular wave phenomenon whose design generates what we experience as matter space time motion energy and order and chaos Simply put the SuperWaves principle states that the fundamental stuff of nature is waves waves waving within waves to be exact Dardik challenges the rationality of accepting a priori that the universe is made of discrete particles Instead by drawing from his own discovery of a unique wave behavior and combining it with scientific facts he shows that

every single thing in existence from quantum particles to entire galaxies is waves waving in the unique pattern he calls SuperWaves The discovery of SuperWaves and the ideas behind it while profound can be intuitively grasped by every reader whether scientist or layperson Touching on everything from quantum physics to gravity to emergent complexity and thermodynamics to the origins of health and disease it shows that our health and the health of the environment and civilization depend upon our understanding SuperWaves The Nature of Nature is an absorbing account that combines Dardik s contrarian look at the history of science with philosophical discussion his own groundbreaking research and hope for the future *Experiential Landscape* Kevin Thwaites,Ian Simkins,2006-12-05 Incorporating a review of key philosophical and theoretical themes and offering a socially responsive design vocabulary Kevin Thwaites and Ian M Simkins provide the reader with a greater understanding of the human environment relationship **Excellence in Communicating Organizational Strategy** Donald P. Cushman,Sarah Sanderson King,2001-07-19 Essays on how organizations effectively communicate strategy to optimize performance **A History of the Ecosystem Concept in Ecology** Frank B. Golley,1993-01-01 The ecosystem concept the idea that flora and fauna interact with the environment to form an ecological complex has long been central to the public perception of ecology and to increasing awareness of environmental degradation In this book an eminent ecologist explains the ecosystem concept tracing its evolution describing how numerous American and European researchers contributed to its evolution and discussing the explosive growth of ecosystem studies Golley surveys the development of the ecosystem concept in the late nineteenth and early twentieth centuries and discusses the coining of the term ecosystem by the English ecologist Sir Arthur George Tansley in 1935 He then reviews how the American ecologist Raymond Lindeman applied the concept to a small lake in Minnesota and showed how the biota and the environment of the lake interacted through the exchange of energy Golley describes how a seminal textbook on ecology written by Eugene P Odum helped to popularize the ecosystem concept and how numerous other scientists investigated its principles and published their results He relates how ecosystem studies dominated ecology in the 1960s and became a key element of the International Biological Program biome studies in the United States a program aimed at the betterment of mankind specifically through conservation human genetics and improvements in the use of natural resources how a study of watershed ecosystems in Hubbard Brook New Hampshire blazed new paths in ecosystem research by defining the limits of the system in a natural way and how current research uses the ecosystem concept Throughout Golley shows how the ecosystem concept has been shaped internationally by both developments in other disciplines and by personalities and politics *Timescapes of Modernity* Barbara Adam,2005-08-18 *Timescapes of Modernity* explores the relationship between time and environmental and socio cultural concerns Using examples such as the BSE crisis the Sea Empress oil pollution and the Chernobyl radiation Barbara Adam argues that environmental hazards are inescapably tied to the successes of the industrial way of life Global markets and economic growth large scale production of food the speed of transport and

communication the 24 hour society and even democratic politics are among the invisible hazards we face With this unique timescape perspective the author dislodges assumptions about environmental change enables a rethinking of environmental problems and provides the potential for new strategies to deal with environmental hazards Integrative Learning as the Pathway to Teaching Holism, Complexity, and Interconnectedness Billie G. Blair, Renate Nummela Caine, 1995 This book provides a mosaic of perspectives leading to a better understanding of conceptual and practical approaches to integrative learning and teaching

Complementarity Beyond Physics Arun Bala, 2016-12-01 In this study Arun Bala examines the implications that Niels Bohr's principle of complementarity holds for fields beyond physics Bohr one of the founding figures of modern quantum physics argued that the principle of complementarity he proposed for understanding atomic processes has parallels in psychology biology and social science as well as in Buddhist and Taoist thought But Bohr failed to offer any explanation for why complementarity might extend beyond physics and his claims have been widely rejected by scientists as empty speculation Scientific scepticism has only been reinforced by the naive enthusiasm of postmodern relativists and New Age intuitionists who seize upon Bohr's ideas to justify anti realist and mystical positions Arun Bala offers a detailed defence of Bohr's claim that complementarity has far reaching implications for the biological and social sciences as well as for comparative philosophies of science by explaining Bohr's parallels as responses to the omnipresence of grown properties in nature
