Lords And Lemurs:

Lords and Lemurs Alison Jolly, 2004 Chronicles the rich human plant and animal diversity of this Isle off the East Coast of Africa home to lemurs unusual reptiles and other creatures more at home in mythology than natural science **The Missing Lemur Link** Ivan Norscia, Elisabetta Palagi, 2016-06-09 A comparative study of lemurs in the context of shared ancestral links with both humans and primates *Lemurs* Lisa Gould, M.L. Sauther, 2006-12-13 Lemurs Ecology and Adaptation brings together information from recent research and provides new insight into the study of lemur origins and the ecology and adaptation of both extant and recently extinct lemurs In addition it addresses issues of primate behavioral ecology and how environment can play a major role in explaining species variation Moreover in a larger context the information contained in this volume expands our knowledge of primate ecology and allows us further insight into mammalian adaptations to unusual and often harsh environmental conditions that arise from both natural and anthropogenic factors The book is divided into two sections The first section is a background to lemurs and their ecology and it includes chapters on origins of lemurs history of ecological studies on lemurs in Madagascar theories relating to the evolution of lemur traits and ecology of the recently extinct sub fossil lemurs Section two is comprised of chapters focusing on the ecology and adaptations of many species of extant lemurs to the diverse habitats found on Madagascar and in some cases adaptations to extreme climatic variability and natural disasters Primates and Cetaceans Juichi Yamagiwa, Leszek Karczmarski, 2013-11-20 In this book the editors present a view of the socioecology of primates and cetaceans in a comparative perspective to elucidate the social evolution of highly intellectual mammals in terrestrial and aquatic environments Despite obvious differences in morphology and eco physiology there are many cases of comparable sometimes strikingly similar patterns of sociobehavioral complexity A number of long term field studies have accumulated a substantial amount of data on the life history of various taxa foraging ecology social and sexual relationships demography and various patterns of behavior from dynamic fission fusion to long term stable societies from male bonded to bisexually bonded to matrilineal groups Primatologists and cetologists have come together to provide four evolutionary themes 1 social complexity and behavioral plasticity 2 life history strategies and social evolution 3 the interface between behavior demography and conservation and 4 selected topics in comparative behavior These comparisons of taxa that are evolutionarily distant but live in comparable complex sociocognitive environments boost our appreciation of their sophisticated mammalian societies and can advance our understanding of the ecological factors that have shaped their social evolution This knowledge also facilitates a better understanding of the day to day challenges these animals face in the human dominated world and may improve the capacity and effectiveness of our conservation efforts *Long-Term Field Studies of Primates* Peter M. Kappeler, David P. Watts, 2012-01-06 Some primate field studies have been on going for decades covering significant portions of individual life cycles or even multiple generations In this volume leading field workers report on the history and

infrastructure of their projects in Madagascar Africa Asia and South America More importantly they provide summaries of their long term research efforts on primate behaviour ecology and life history highlighting insights that were only possible because of the long term nature of the study The chapters of this volume collectively outline the many scientific reasons for studying primate behaviour ecology and demography over multiple generations This kind of research is typically necessitated by the relatively slow life histories of primates Moreover a complete understanding of social organization and behaviour factors often influenced by rare but important events requires long term data collection Finally long term field projects are also becoming increasingly important foci of local conservation activities **Thank You, Madagascar** Alison

Jolly,2015-03-12 An enchanting book poignant and passionate Geographical A captivating and absorbing account Sir David Attenborough Madagascar is one of the world s natural jewels with over ninety per cent of its wildlife found nowhere else on Earth Few people knew it better than the pioneering primatologist and conservationist Alison Jolly Thank You Madagascar is her eyewitness account of the extraordinary biodiversity of the island and the environment of its people At the book s heart is a conflict between three different views of nature Is the extraordinary forest treasure house of Madagascar a heritage for the entire world Is it a legacy of the forest dwellers ancestors bequeathed to serve the needs of their living descendants Or is it an economic resource to be pillaged for short term gain and to be preserved only to deliver benefits for those with political power Exploring and questioning these different views this is a beautifully written diary and a tribute to Madagascar **The**

Biology Alison Jolly,Robert W. Sussman,Naoki Koyama,Hanta Rasamimanana,2006-11-30 This book is a truly international collaboration with editors based on four continents and first authors from Canada France Japan Madagascar the United Kingdom and the United States Clearly there is something attractive about studying Lemur catta the ringtailed lemur Perhaps it is the lemurs themselves Why study ringtailed lemurs Because lemurs are a separate radiation of primates from the monkeys apes and humans Because ringtails live in the largest social groups of any known lemur and therefore offer the closest comparison with other social primates including ourselves And also because ringtails have become the flagship

species of Madagascar Some 70 species or subspecies of lemurs inhabit Madagascar Each kind has its own fascinating story but ringtails are the ones that everyone thinks they know That black and white tail adorns tourist brochures and school notebooks and banknotes All the same after 40 years of field study we don't know nearly enough In this book we make a first estimate on how many might be alive today but we do not know how many ringtailed lemurs and how many southern forests will survive This book explores part of what we do know Its four sections are I Distribution Ringtailed Lemurs in Madagascar II Ringtails and Their Forests Feeding and Ranging Behavior III Social Behavior Within and Between Troops and finally IV Health and Disease Of course all these issues are interrelated

Storytelling Apes Mary Sanders Pollock, 2015-05-04 The annals of field primatology are filled with stories about charismatic animals native to some of the most challenging and remote areas on earth There are for example the chimpanzees of Tanzania whose social and family interactions Jane Goodall has studied for decades the mountain gorillas of the Virungas chronicled first by George Schaller and then later more obsessively by Dian Fossey various species of monkeys Indian langurs Kenyan baboons and Brazilian spider monkeys studied by Sarah Hrdy Shirley Strum Robert Sapolsky Barbara Smuts and Karen Strier and finally the orangutans of the Bornean woodlands whom Birut Galdikas has observed passionately Humans are after all storytelling apes The narrative urge is encoded in our DNA along with large brains nimble fingers and color vision traits we share with lemurs monkeys and apes In Storytelling Apes Mary Sanders Pollock traces the development and evolution of primatology field narratives while reflecting upon the development of the discipline and the changing conditions within natural primate habitat Like almost every other field primatologist who followed her Jane Goodall recognized the individuality of her study animals defying formal scientific protocols she named her chimpanzee subjects instead of numbering them thereby establishing a trend For Goodall Fossey Sapolsky and numerous other scientists whose works are discussed in Storytelling Apes free living primates became fully realized characters in romances tragedies comedies and never ending soap operas With this work Pollock shows readers with a humanist perspective that science writing can have remarkable literary value encourages scientists to share their passions with the general public and inspires the conservation community

Centralizing Fieldwork Jeremy MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well

Sisters of the Jungle Keriann McGoogan, 2025-09-16 A scientist's memoir that delves into the history of primate field studies and the women who shaped the discipline of primatology including Jane Goodall, Dian Fossey, Birut Galdikas, and Alison Jolly. Since the 1970s, the science of primatology has been dominated by women, a unique reversal with men usually outnumbering women in other science, technology, engineering, and math fields. *Sisters of the Jungle* shines a light on a scientific discipline in which women take the lead while transporting readers to the far corners of the earth to understand our closest living relatives. Keriann McGoogan's journey as a primatologist has taken her to Belize and Madagascar studying wild primates including howler monkeys, the loudest living primate, and lemurs, the most endangered group of animals on the planet. Against this backdrop, she explores the stories of the many women who came before her. Intrepid scientists like Jane Goodall, Dian Fossey, Birut Galdikas, and Alison Jolly broke boundaries, made astonishing discoveries, and ultimately shaped the trajectory of an entire branch of science.

The Eponym Dictionary of Mammals Bo Beolens, Michael Watkins, Michael Grayson, 2022-02-03 Learn the origins of over 2,000 mammal species names with this informative reference guide. Just who was the Przewalski, after whom Przewalski's horse was named? Or Husson, the eponym for the rat *Hydromys hussoni*? Or the Geoffroy, whose name is forever linked to Geoffroy's cat? This unique reference provides a brief look at the real lives behind the scientific and vernacular mammal names one encounters in field guides, textbooks, journal articles, and other scholarly works. Arranged to mirror standard dictionaries, the more than 1,300 entries included here explain the origins of over 2,000 mammal species names. Each bio sketch lists the scientific and common language names of all species named after the person, outlines the individual's major contributions to mammalogy and other branches of zoology, and includes brief information about his or her mammalian namesake's distribution. The two appendixes list scientific and common names for ease of reference, and where appropriate, individual entries include mammals commonly but mistakenly believed to be named after people. The *Eponym Dictionary of Mammals* is a highly readable and informative guide to the people whose names are immortalized in mammal nomenclature. A small treasure trove of information about the people whose names are immortalized in mammalian nomenclature. Given that we mammalogists are prone to ancestor worship, I expect it to be a best seller. Don E. Wilson, *Journal of Mammalian Evolution*. This is a great reference for the mammalogy professional or student or the curious naturalist. Wildlife Activist. This is a splendid book which fills a real gap in zoological literature. Nicholas Gould, *International Zoo News*.
