Gonzalez,2019-03-11 In the early 1900s the population of Southern California exploded and the cities grew at such a rapid pace that builders could hardly keep up Among those who settled in the area were ten architects looking to make their marks on the world Claud Beelman a man who never received a college degree would go on to design the Elks Lodge in Los Angeles Albert C Martin architect of Grauman s Million Dollar Theater founded a company that is still going strong more than one hundred years later and Julia Morgan the first woman architect licensed in California was hired by William Randolph Hearst to design the Examiner Building Join author Antonio Gonzalez as he tells the stories of the people behind some of Southern California s most iconic buildings By-Right, By-Design Liz Falletta,2019-06-26

Housing is an essential but complex product so complex that professionals involved in its production namely architects real estate developers and urban planners have difficulty agreeing on good housing outcomes Less than optimal solutions that have resulted from a too narrow focus on one discipline over others are familiar high design that is costly to build that makes little contribution to the public realm highly profitable but seemingly identical cookie cutter dwellings with no sense of place and well planned neighborhoods full of generically designed unmarketable product types Differing roles languages and criteria for success shape these perspectives which in turn influence attitudes about housing regulation Real estate developers for example prefer projects that can be built as of right or by right meaning that they can be approved quickly because they meet all current planning zoning and building code requirements Design focused projects heretofore by design by contrast often require time to challenge existing regulatory codes pursuing discretionary modifications meant to maximize design innovation and development potential Meanwhile urban planners work to establish and mediate the threshold between by right and by design processes by setting housing standards and determining appropriate housing policy But just what is the right line between by right and by design By Right By Design provides a historical perspective conceptual frameworks and practical strategies that cross and connect the diverse professions involved in housing production The heart of the book is a set of six cross disciplinary comparative case studies each examining a significant Los Angeles housing design precedent approved by variance and its associated development type approved as of right Each comparison tells a different story about the often hidden relationships among the three primary disciplines shaping the built environment some of which uphold and others of which transgress conventional disciplinary stereotypes *Freestyle, the New Architecture and Interior Design from Los Angeles* Tim Street-Porter,1986 More than just a stunning book on radical design this is also an affectionate yet serious look

Los Angeles Architecture James Steele,1993 In Los Angeles Architecture James Steele considers the historic and geographic elements which are an important part of local sensibilities and weaves them into a narrative about the complex design activity taking place in the city today Beginning with the pioneering characters of the American Arts and Crafts movement James Steele traces Los Angeles architectural energy through the works of Frank Lloyd Wright and Rudolph Schindler to arrive at the buildings of Frank Gehry who is widely acknowledged to be a fearless interpreter of his surroundings This analysis expands to investigate the work of those who have followed Gehry s lead from the avant garde educational institutions such as SCI ARC to those who are attempting to complete the Los Angeles myth by at last giving it a downtown

"Architecture, Design and Craft in Toronto 1900-1940" Alla Myzelev,2017-07-05 Toronto the largest and one of the most multicultural cities in Canada boasts an equally interesting and diverse architectural heritage Architecture Design and Craft in Toronto 1900 1940 tells a story of the significant changes in domestic life in the first 40 years of the twentieth century Adopting a multidisciplinary approach to studies of residential spaces the author examines how questions of modernity and modern living influenced not only architectural designs but also interior furnishings modes of transportation and ways to spend leisure time The book discusses several case studies some of which are known both locally and internationally for example Casa Loma while others such as Guild of All Arts or Sherwood have been virtually unstudied by historians of visual culture The overall goal of the book is to put Toronto on the map of scholars of urban design and architecture and to uncover previously unknown histories of design

craft and domesticity in Toronto This study will be of interest not only to the academic community namely architects designers craftspeople and scholars of these disciplines along with social historians but also the general public interested in local history and or visual culture
