Resumen

Algunos investigadores sobre las asociaciones florísticas del Cretácico en México, crearon un panorama más completo de la flora en ese momento y de su evolución hasta la actualidad. Los primeros trabajos paleobotánicos sistemáticos se realizaron para el Cretácico Inferior: el grupo *Isabellia* y su estratigra y correlación de los afloramientos de Coahuila, Chiapas y Puebla, y los de los estratos de la zona de Chihuahua y Sonora y algunos paleoetnobotánicos realizados en los estados de Baja California, Durango y Michoacán. La falta de la mayoría de datos para este período se debe principalmente a que en este tiempo la mayor parte de México perteneció a las Américas. Sin embargo, con los numerosos los trabajos de Flora fossil conducted en el Cretácico Superior principalmente en la Formación Osmán (Chihuahua), y un menor medida, en estratos de las Formaciones Cerro del Peñón (Coahuila), El Cofre (Baja California), Sierra Madre (Chiapas), Tuxtepec (Oaxaca), Grupo Coladillo (Sonora) y otros trabajos aislados realizados. En esta síntesis revisamos los trabajos sobre datos paleobotánicos de gran relevancia del Cretácico de México, incluyendo información del Cretácico en la localidad de El Chango (Chiapas) y registros de macro y microfósiles en la localidad de Huapaco en la Sierrita de Chihuahua (Sonora).

Palabras clave: Paleobotánica, paleoetnobotánica, Cretácico, México.

Abstract

Some investigators of Cretaceous floristic assemblages in Mexico created a more complete picture of the flora at that time and its evolution up to the present. The some systematic paleobotanical studies for the Early Cretaceous remain unpublished and are restricted to macrofossil studies in Coahuila, Chiapas and Puebla, systematic of leaf impressions in Chihuahua and Sonora and paleobotanical works in the state of Baja California, Durango and Michoacán. The reason for the paucity of data for this period is mainly due to the fact that at that time most of Mexico remained unexplored. In contrast, paleobotanical studies focused on the Late Cretaceous and more numerous and are mainly centered on the Osmán Formation (Chihuahua) and, to a lesser extent, there are studies from the Cerro del Peñón (Coahuila), El Cofre (Baja California), Sierra Madre (Chiapas), and Tuxtepec (Oaxaca) formations, the Coladillo Group (Sonora) and other isolated unpublished works. Here contributions to the Cretaceous of Mexico are provided, mainly by Cretaceous macrofossils from the locality of El Chango (Chiapas) and new macro- and microfloral records from Huapaco in Chihuahua (Sonora).

Keywords: Paleobotany, paleoethnobotany, Cretaceous, Mexico.
