Tirpitz Daniel

Knowles,2018-04-17 The War for the Seas Evan Mawdsley,2019-09-24 This impeccable myth busting study of WWII maritime operations sheds new light on the conflict with sharp analysis and an international perspective The Sunday Times UK Command of the oceans was crucial to winning World War II By the start of 1942 Nazi Germany had conquered mainland Europe and Imperial Japan had overrun Southeast Asia and much of the Pacific How could Britain and distant America prevail in what had become a war of continents In this definitive account Evan Mawdsley traces events at sea from the first U boat operations in 1939 to the surrender of Japan He argues that the Allied counterattack involved not just decisive sea battles but a long struggle to control shipping arteries and move armies across the sea Covering all the major actions in the Atlantic and Pacific oceans as well as those in the narrow seas this book interweaves for the first time the endeavors of the maritime forces of the British Empire the United States Germany and Japan as well as those of France Italy and Russia

Treaty Cruisers Leo Marriott,2005-11-19 A quite enlightening book that discusses the most important group of heavy cruisers serving during WW2 and how the type evolved Malcolm Wright author of British and Commonwealth Warship Camouflage of WWII The Washington Naval Treaty of 1921 and subsequent treaties in the 1930s effectively established the size and composition of the various navies in World War II In particular they laid down design parameters and tonnage limitations for each class of warship including battleships aircraft carriers cruisers and destroyers With one or two exceptions battleship construction was deferred until the mid 1930s but virtually all navies embraced the concept of the eight inch gun armed 10 000 ton heavy cruisers and constructed new vessels almost immediately This book will trace the political processes which led to the treaties describe the heavy cruisers designed and built to the same rules by each nation and then consider how the various classes fared in World War II and attempt to assess which was the most successful Ships from the navies of Britain France Italy Germany the United States and Japan are included Appendices cover construction tables the history of each ship technical specifications armament and aircraft carried The author has crafted a book that is both a technical read and popular history The book provides an excellent overview of the reasoning each country employed in building its interwar cruiser force and how they committed these ships to battle If development of and employment of weapon systems is of interest to you this is a must read book Naval Historical Foundation **Special Bibliographic Series**
