Lost at the Frontier Deborah Shapley, Rustum Roy, 1985 *Science and Technology Policy* Takefumi Tanaka, 1992

A History of Science Policy in the United States, 1940-1985, 1986 *Expanding Underrepresented Minority Participation* Institute of Medicine, National Academy of Engineering, National Academy of Sciences, Policy and Global Affairs, Committee on Science, Engineering, and Public Policy, Committee on Underrepresented Groups and the Expansion of the Science and Engineering Workforce Pipeline, 2011-07-29 In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals we must invest in research encourage innovation and grow a strong and talented science and technology workforce *Expanding Underrepresented Minority Participation* explores the role of diversity in the science technology engineering and mathematics STEM workforce and its value in keeping America innovative and competitive According to the book the U S labor market is projected to grow faster in science and engineering than in any other sector in the coming years making minority participation in STEM education at all levels a national priority *Expanding Underrepresented Minority Participation* analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce Although minorities are the fastest growing segment of the population they are underrepresented in the fields of science and engineering Historically there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy *Expanding Underrepresented Minority Participation* suggests that the federal government industry and post secondary institutions work collaboratively with K 12 schools and school systems to increase minority access to and demand for post secondary STEM education and technical training The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education It offers recommendations that focus on academic and social support institutional roles teacher preparation affordability and program development **Environmental Social Science** Emilio F. Moran, 2010-02-08 *Environmental Social Science* offers a new synthesis of environmental studies defining the nature of human environment interactions and providing the foundation for a new cross disciplinary enterprise that will make critical theories and research methods accessible across the natural and social sciences Makes key theories and methods of the social sciences available to biologists and other environmental scientists Explains biological theories and concepts for the social sciences community working on the environment Helps bridge one of the difficult divides in collaborative work in human environment research Includes much needed descriptions of how to carry out research that is multinational multiscale multitemporal and multidisciplinary within a complex systems theory context *Democratic Theory and Technological Society* Richard B. Day, Ronald Beiner, Joseph Masciulli, 2017-07-05 What are the chief challenges posed to contemporary democracy by modern technology and how can democratic theory best respond to or at least reflect on those challenges Inhabiting the kind of

technologically advanced era in which we live what sources are available within political theory for theoretical insight concerning the problem of democratic engagement with technology The purpose of this volume is to canvas a broad range of theorists and theoretical traditions in order to address these questions including Hegel and Marx Rousseau and John Dewey Heidegger and Simone Weil Habermas and Walter Benjamin Hannah Arendt and Hans Jonas Commentaries on all these important thinkers focused on the issue of contemporary technology as posing unique social and political challenges for democratic political life yields rich and ambitious resources for theoretical reflection American Science Policy since World War II Bruce Smith, 2011-02-01 Just after the close of World War II America's political and scientific leaders reached an informal consensus on how science could best serve the nation and how government might best support science The consensus lasted a generation before it broke under the pressures created by the Vietnam War Since then the nation has struggled to reestablish shared beliefs about the means and goals of science policy In American Science Policy Since World War II author Bruce L R Smith makes sense of the break between science and government and identifies the patterns on postwar science affairs He explains that what might otherwise seem to be a miscellaneous set of separate episodes actually constituted a continuing debate of national importance that was closely linked to broad political and economic trends Smith's precise and unique analysis gives both the scholar and historian a better understanding of where we are and how we got there while casting a modest light on future policy directions **Recent Library Additions**, 1985 **NASA Technical Memorandum**, 1991 **Where Darwin Meets the Bible** Larry Witham, 2005 Where Darwin Meets the Bible provides an account of the lasting conflict between creationists and evolutionists **OTA Report, "Federally Funded Research, Decisions for a Decade"** United States. Congress. House. Committee on Science, Space, and Technology. Subcommittee on Science, 1991 **NASA DoD aerospace knowledge diffusion research project. Report number 6, The relationship between the use of U.S. government technical reports by U.S. aerospace engineers and scientists and selected institutional and sociometric variables**, 1991 A study was undertaken that investigated the relationship between the use of U S government technical reports by U S aerospace engineers and scientists and selected institutional and sociometric variables Survey research is the methodology used for the study Data were collected by means of a self administered mail questionnaire The approximately 34 000 members of the American Institute of Aeronautics and Astronautics AIAA served as the study population The response rate for the survey was 70 percent A dependent relationship was found to exist between the use of U S government technical reports and three of the institutional variables academic preparation years of professional aerospace work experience and technical discipline The use of U S government technical reports was found to be independent of all of the sociometric variables The institutional variables best explain the use of U S government technical reports by U S aerospace engineers and scientists Peerless Science Daryl E. Chubin, Edward J. Hackett, 1990-07-05 This book examines the structure and operation of peer review as a family of quality control mechanisms and looks at the burdens

placed on the various forms of peer review Assuming that peer review is central to the functioning of U S science policy Chubin and Hackett explore the symbolic and practical value of peer review in the making implementing and analysis of this policy

Materials Science and Engineering Serving Society R.P.H. Chang,R. Roy,M. Doyama,S. Somiya,1998-12-23 This symposium was organised with the aim of encouraging collaboration in international science and engineering communities for the benefit of human kind It consisted of invited talks by experts on materials and poster presentation papers Approximately 140 scientists participated and the resulting proceedings present an up to date review of the research in this area

Living in the Labyrinth of Technology Willem H. Vanderburg,2005-12-15 From the very beginnings of their existence human beings have distinguished themselves from other animals by not taking immediate experience for granted Everything was symbolized according to its meaning and value a fallen branch from a tree became a lever a tree trunk floating in the river became a canoe Homo logos created communities based on cultures humanity s first megaproject Further symbolization of the human community and its relation to nature led to the possibility of creating societies and civilizations Everything changed as these interposed themselves between the group and nature Homo societas created ways of life able to give meaning direction and purpose to many groups by means of very different cultures humanity s second megaproject What Das Kapital did for the nineteenth century and La technique did for the twentieth Willem H Vanderburg s *Living in the Labyrinth of Technology* seeks to create for the twenty first century an attempt at understanding the world in a manner not shackled to overspecialized scientific knowing and technical doing Western civilization may well be creating humanity s third megaproject based not on symbolization for making sense of and living in the world but on highly specialized desymbolized knowing stripped of all peripheral understanding Vanderburg focuses on two interdependent forces in his narrative namely people changing technology and technology changing people The latter aspect although rarely considered turns out to be the more critical one for understanding the spectacular successes and failures of contemporary ways of life As technology continues to change the social and physical world the experiences of this world grow people s minds and society s cultures thereby re creating human life in the image of technology *Living in the Labyrinth of Technology* argues that the twenty first century will be dominated by this pattern unless society intervenes on human as opposed to technical terms

time **Rabbinic Authority** Michael S. Berger, 1998-10-15 The Rabbis of the first five centuries of the Common Era loom large in the Jewish tradition Until the modern period Jews viewed the Rabbinic traditions as the authoritative contents of their covenant with God and scholars debated the meanings of these ancient Sages words Even after the eighteenth century when varied denominations emerged within Judaism each with its own approach to the tradition the literary legacy of the talmudic Sages continued to be consulted In this book Michael S Berger analyzes the notion of Rabbinic authority from a philosophical standpoint He sets out a typology of theories that can be used to understand the authority of these Sages showing the coherence of each its strengths and weaknesses and what aspects of the Rabbinic enterprise it covers His careful and thorough analysis reveals that owing to the multifaceted character of the Rabbinic enterprise no single theory is adequate to fully ground Rabbinic authority as traditionally understood The final section of the book argues that the notion of Rabbinic authority may indeed have been transformed over time even as it retained the original name Drawing on the debates about legal hermeneutics between Ronald Dworkin and Stanley Fish Berger introduces the idea that Rabbinic authority is not a strict consequence of a preexisting theory but rather is embedded in a form of life that includes text interpretation and practices Rabbinic authority is shown to be a nuanced concept unique to Judaism in that it is taken to justify those sorts of activities which in turn actually deepen the authority itself Students of Judaism and philosophers of religion in general will be intrigued by this philosophical examination of a central issue of Judaism conducted with unprecedented rigor and refreshing creative insight *Future Survey Annual 1985* Michael Marien, 1987-01-01
