Environments Cecily Maller,2018-05-20 Set in the human environment interaction space this book applies new theoretical and practical insights to understanding what makes healthy urban environments It stems from recognition that the world is rapidly urbanising and the international concern with how to create healthy settings and liveable cities in the context of a rapidly changing planet A key argument is that usual attempts to make healthy cities are limited by human centrism and

bifurcated western thinking about cities health and nature Drawing on the innovative more than human scholarship from a range of disciplines it presents a synthesis of the main contributions and how they can be used to rethink what healthy urban environments are and who they are for In particular the book turns its attention to urban biodiversity and the many non human species that live in make and share cities with humans The book will be of interest to scholars and students in human geography health sociology environmental humanities public health health promotion planning and urban design as well as policymakers and professionals working in these fields

The Global Commons Susan J. Abstracts ,1965 *Revisiting Colonialism and Colonial Labour* Sivachandralingam Sundara Raja, Shivalinggam Raymond, 2023-07-31 This book argues that the prevailing view of colonialism that it was a negative and destructive phenomenon needs to be rethought. It focuses on the experiences of the South Indian working class, large numbers of which came to Malaya in the early years of the twentieth century, emigrating from socially, economically, and environmentally inhospitable south India. It examines the opportunities which colonialism presented for these people, highlighting also the British approach to colonialism in Malaya, an approach which emphasised conservatism and tradition and which protected the interests of the Malay aristocrat classes and, by extension, the Malay masses in order to compensate for European economic dominance and the influx of a non-Malay labour force. Overall, the book demonstrates that the South Indians, a class whose identity, social existence, and prospects were inextricably linked to imperial processes, benefitted from colonialism and should be viewed as an active transnational entity within a constructive system rather than as passive victims of repressive, destructive forces.

The Postcolonial Age of Migration Ranabir Samaddar, 2020-05-11 This book critically examines the question of migration that appears at the intersection of global neo-liberal transformation, postcolonial politics, and economy. It analyses the specific ways in which colonial relations are produced and reproduced in global migratory flows and their consequences for labour, human rights, and social justice. The postcolonial age of migration not only indicates a geopolitical and geo-economic division of the globe between countries of the North and those of the South, marked by massive and mixed population flows from the latter to the former, but also the production of these relations within and among the countries of the North. The book discusses issues such as transborder flows among countries of the South, migratory movements of the internally displaced, growing statelessness leading to forced migration, border violence, refugees of partitions, customary and local practices of care and protection, population policies, and migration management, both emigration and immigration, the protracted nature of displacement, labour flows, and immigrant labour, and the relationships between globalisation, nationalism, citizenship, and migration in postcolonial regions. It also traces colonial and postcolonial histories of migration and justice to bear on the present understanding of local experiences of migration as well as global social transformations, while highlighting the limits of the fundamental tenets of humanitarianism, protection, assistance, security, responsibility, which impact the political and economic rights of vast sections of moving populations. Topical and an important intervention in contemporary global migration and refugee studies, the book offers new sources, interpretations, and analyses in understanding postcolonial migration. It will be useful to scholars and researchers of migration studies, refugee studies, border studies, political studies, political sociology, international relations, human rights, and law, human geography, international politics, and political economy. It will also interest policymakers, legal practitioners, nongovernmental organisations, and activists.
