**Archaeology and the Old Testament** James B. Pritchard,2012-05-05 Archaeology is a science in which progress can be measured by the advances made backward into the past The last one hundred years of archaeology have added a score of centuries to the story of the growth of our cultural and religious heritage as the ancient world has been recovered from the sands and caves of the modern Near East Egypt Jordan Israel Syria Lebanon Turkey and Iraq Measured by the number of centuries which have been annexed to man s history in a relatively few years progress has been truly phenomenal This book deals with the recent advance and with those pioneers to the past who made it possible Interest in biblical history has played an important part in this recovery Names such as Babylon Nineveh Jericho Jerusalem and others prominent on the pages of the Bible have gripped the popular imagination and worked like magic to gain support for excavations This book is written from the widely shared conviction that the discovery of the ancient Near East has shed significant light on the Bible Indeed the newly discovered ancient world has effected a revolution in the understanding of the Bible its people and their history My purpose is to assess in non technical language which the layman can understand the kind of change in viewing the biblical past which archaeology has brought about in the last century Since the text of the Bible has remained constant over this period it is obvious that any new light on its meaning must provide a better perspective for seeing the events which it describes In short I am concerned with the question How has history as written in the Bible been changed enlarged or substantiated by the past century of the archaeological work from the Preface *Littell's Living Age* ,1856 **Bulletin of the American Geographical Society of New York** ,1893 *1001 Inventions* Salim T. the cartographic masterpiece the Venetian mappa mundi that revolutionized how we see the world In 1459 a Venetian monk  
named Fra Mauro completed an astonishing map of the world Seven feet in diameter Fra Mauro s mappamundi is the oldest  
and most complete Medieval map to survive into modernity And in its time this groundbreaking mappamundi provided the  
most detailed description of the known world incorporating accurate observation and geographic reality urging viewers to  
see water and land as they really existed Fra Mauro s map was the first in history to show that a ship could circumnavigate  
Africa and that the Indian Sea was in fact an ocean enabling international trade to expand across the globe Acclaimed  
anthropologist Meredith F Small reveals how Fra Mauro s mappamundi made cartography into a science rather than a  
practice based on religion and ancient myths Here Begins the Dark Sea brings Fra Mauro s masterpiece to life as a work of  
art and a window into Venetian society and culture In telling the story of this cornerstone of modern cartography Small takes  
the reader on a fascinating journey as she explores the human urge to find our way Here Begins the Dark Sea is a riveting  
testament to the undeniable impact Fra Mauro and his mappamundi have had over the past five centuries and still holds  
relevance today      The Oxford encyclopedia of ancient Greece and Rome. - Vol. 1 - 7 Michael Gagarin,2010      **The**
