Calculated Risk George Leopold, 2016-06-15 Unlike other American astronauts Virgil I Gus Grissom never had the chance to publish his memoirs Killed along with his crew in a launch pad fire on January 27 1967 Grissom also lost his chance to walk on the moon and return to describe his journey Others went in his place The stories of the moon walkers are familiar Less appreciated are Grissom s contributions The international prestige of winning the Moon Race cannot be understated and Grissom played a pivotal and enduring role in securing that legacy for the United States Indeed Grissom was first and foremost a Cold Warrior a member of the first group of Mercury astronauts whose goal it was to beat the Soviet Union into space and eventually to the moon Drawing on extensive interviews with fellow astronauts NASA engineers family members and friends of Gus Grissom George Leopold delivers a comprehensive and corrective account of Grissom s life that places his career in the context of the Cold War and the history of human spaceflight *Calculated Risk The Supersonic Life and Times of Gus Grissom* adds significantly to our understanding of that tumultuous and ultimately triumphant period in American history

The Greatest Adventure Colin Burgess, 2021-08-12 *The Greatest Adventure* explores the past present and future of the space race The space race was perhaps the greatest technological contest of the twentieth century It was a thrilling era of innovation discovery and exploration as astronauts and cosmonauts were launched on space missions of increasing length complexity and danger *The Greatest Adventure* traces the events of this extraordinary period describing the initial string of Soviet achievements the first satellite in orbit the first animal man and woman in space the first spacewalk as well as the ultimate US victory in the race to land on the moon The book then takes the reader on a journey through the following decades of space exploration to the present time detailing the many successes tragedies risks and rewards of space exploration

To Be Hoosiers Ray E. Boomhower, 2020-02-03 Since Indiana joined the Union in 1816 residents and visitors alike have pondered the essential question What is a Hoosier The final answer may never be determined but there are at least ways to understand the Hoosier character It was African American pilots taking a stand for equal rights It was a speech by a presidential candidate that helped keep peace on a tragic night It was the triumph and near tragedy involving a Mercury Seven astronaut And it was a sacrifice that ensured a crucial American victory in the Pacific during World War II As Kurt Vonnegut once said I don t know what it is about Hoosiers but wherever you go there is always a Hoosier doing something very important there Award winning biographer Ray E Boomhower tells us why *Ready to Dive* Curt Newport, 2024-05-15

Ready to Dive Curt Newport describes his role in some of the most daring and consequential deep ocean search and recovery operations of our time Newport was there on the front lines and in the trenches rigging lift lines piloting underwater vehicles and dealing with the carnage following both military and civilian plane crashes Starting with his life as the son of a US Army aviator during various international postings before covering his conflicts with his father during the turbulent 1960s the book details how he got into the subsea field In a career lasting nearly fifty years probing waters deeper

than three miles Newport describes unwinding passenger clothing from submersible propellers during the Air India salvage recovering tons of volatile fuel laden solid rocket motor parts from the Space Shuttle Challenger thumbing through the wallet of a young girl lost during the crash of TWA Flight 800 and deciphering the navigational mystery of the USS Indianapolis Ready to Dive is a gritty blunt and real firsthand subsea account unlike any other **Indiana's 200** Linda C. Gugin, James E. St. Clair, 2016-05-20 Part of the Indiana Historical Society's commemoration of the nineteenth state's bicentennial Indiana's 200 The People Who Shaped the Hoosier State recognizes the people who made enduring contributions to Indiana in its 200 year history Written by historians scholars biographers and independent researchers the biographical essays in this book will enhance the public's knowledge and appreciation of those who made a difference in the lives of Hoosiers the country and even the world Subjects profiled in the book include individuals from all fields of endeavor law politics art music entertainment literature sports education business industry religion science invention technology as well as the notorious

Into That Silent Sea Francis French, Colin Burgess, 2009-09-01 A history of early space flight focuses on the careers of both American astronauts and Soviet cosmonauts and includes coverage of other persons who worked in support roles

One Small Step? Gerhard Wisnewski, 2012-12-17 Is it possible that the famous American moon landings were nothing but an illusion a fabrication Could NASA have fooled the world by broadcasting simulations that had been filmed for training purposes From the very first manned flight into orbit right up to the present day there have been serious anomalies in the official narrative of the conquest of space Bestselling author Gerhard Wisnewski dissects the history in minute detail from the first Russian missions to the final American moon project of Apollo 17 looking at films photos radio communications personal statements and any other available material Using forensic methods of investigation he pieces together a complex jigsaw depicting a disturbing picture of falsifications lies and fakery in the Cold War struggle for supremacy between the Soviet Union and the USA The evidence he presents casts serious doubt on the possibility of humans ever having walked on the moon Wisnewski's research calls for a reassessment of the received wisdom that has entered the fabric of our culture The true story of space exploration has a more sinister undertone he argues Beneath the guise of civilian space travel the US military has been developing fearsome new equipment and weapons to be secretly stationed in space with the aim of militarizing the orbit around the earth The potential targets every human being on the planet Profusely illustrated with over 200 photos and diagrams **Apollo 13** Laura B. Edge, 2020-03-03 Houston we've had a problem On April 13 1970 the three astronauts aboard the Apollo 13 spacecraft were headed to the moon when a sudden explosion rocked the ship Oxygen levels began depleting rapidly Electrical power began to fail Astronauts James Lovell Jack Swigert and Fred Haise were about to be stranded in the inky void of outer space The mission to the moon was scrapped Now Apollo 13's only goal was to bring the crew home With the damaged spacecraft hurtling towards the moon at roughly six thousand miles per hour there was little hope of success But the astronauts and mission control were fully prepared to do whatever it took to return the crew to Earth

This space disaster occurred at the peak of the United States Space Race against the Soviet Union But for four days in 1970 the two nations put aside their differences and the entire world watched the skies hoping and praying the astronauts would return safely As missions to Mars and commercial space flight become a reality the time is now to be reminded of our common humanity of how rivals can work together and support each other towards a shared goal Because no matter what happens or where we travel we all call Earth home
