City at World's End Edmond Hamilton, 2017-12-02 The pleasant little American city of Middletown is the first target in an atomic war but instead of blowing Middletown to smithereens the super hydrogen bomb blows it right off the map to somewhere else First there is the new thin coldness of the air the blazing corona and dullness of the sun the visibility of the stars in high daylight Then comes the inhabitant s terrifying discovery that Middletown is a twentieth century oasis of paved streets and houses in a desolate brown world without trees without water apparently without life in the unimaginably far distant future

Green Equilibrium Christopher Wills, 2013-03-28 In Green

Equilibrium Christopher Wills explains the rules by which ecosystems maintain a diversity of interdependent species in particular the balance of predators and prey Wills is both an eminent academic and a hugely experienced field biologist In presenting the concept of green equilibrium he draws on a fascinating range of examples including coral reefs off the densely populated Philippines the isolated and densely forested valleys of Papua New Guinea the changing Himalayan kingdom of Bhutan and a Californian ranch being allowed to return to a wild state In each case he assesses the impact of modern changes and attempts at conservation on these delicately balanced ecosystems Wills shows how human populations too are an integral part of the picture We now know from genetic evidence that over the course of history as humans spread out of Africa populations adapted as a result of environmental conditions Striking new evidence indicates that some human populations carry genes from past encounters with other hominids Neanderthals and Denisovans as well as genetic adaptations to local hazards such as malaria Wills argues that the most effective approaches to conserving green equilibria come out of evolutionary insights and from close involvement of the local communities who have lived and adapted to them

Where The Sky Began John Madson, 2009-11 It was a flowing emerald in spring and summer when the boundless winds ran across it a tawny ocean under the winds of autumn and a stark and painful emptiness when the great long winds drove in from the northwest It was Beulahland for many Gehenna for some It was the tall prairie from the Prologue Originally published in 1982 Where the Sky Began John Madson's landmark publication introduced readers across the nation to the wonders of the tallgrass prairie sparking the current interest in prairie restoration Now back in print this classic tome will serve as inspiration to those just learning about the heartland's native landscape and rekindle the passion of long time prairie enthusiasts

Planting in a Post-Wild World Thomas Rainer, Claudia West, 2016-02-04 This post wild landscape guide is an optimistic call to action to help gardeners create a harmonious environment by incorporating plant communities Chicago Tribune Over time with industrialization and urban sprawl we have driven nature out of our neighborhoods and cities But we can invite it back by designing landscapes that look and function more like they do in the wild robust diverse and visually harmonious Featuring gorgeous photography and advice for landscapers Planting in a Post Wild World by Thomas Rainer and Claudia West is dedicated to the idea of a new nature a hybrid of both the wild and the cultivated that can nourish in our cities and suburbs

Quaternary Extinctions Paul S. Martin, Richard G. Klein, 2022-01-04 What caused the extinction of so many animals at or near the end of the Pleistocene Was it overkill by human hunters the result of a major climatic change or was it just a part of some massive evolutionary turnover Questions such as these have plagued scientists for over one hundred years and are still being heatedly debated today Quaternary Extinctions presents the latest and most comprehensive examination of these questions Geological Magazine May be regarded as a kind of standard encyclopedia for Pleistocene vertebrate paleontology for years to come American Scientist Should be read by paleobiologists biologists wildlife managers ecologists archeologists and anyone concerned about the ongoing extinction of plants and animals Science Uncommonly

readable and varied for watchers of paleontology and the rise of humankind Scientific American Represents a quantum leap in our knowledge of Pleistocene and Holocene palaeobiology Many volumes on our bookshelves are destined to gather dust rather than attention But not this one Nature Two strong impressions prevail when first looking into this epic compendium One is the judicious balance of views that range over the whole continuum between monocausal cultural or environmental explanations The second is that both the data base and theoretical sophistication of the protagonists in the debate have improved by a quantum leap since 1967 American Anthropologist

Last of the Wild Robert M. McClung, 1997 Profiles threatened animals around the world and discusses why they are in danger and what is being done to save them

The Divine Life of Animals Ptolemy Tompkins, 2011-06-07 A journey through 20 000 years of history and myth in search of the answer to a single question Do animals have souls Anyone who has ever mourned the loss of a cherished pet has wondered about the animal soul Do animals survive the death of the body or are they doomed to disappear completely when they leave this world behind Both scientists and religious authorities have long scoffed at the idea of animals in heaven Yet the question endures In this wise immensely readable book Ptolemy Tompkins embarks on a quest for the answer taking us on a top speed tour of the history of the animal soul Equally at home with mainstream and alternative spiritual philosophies Tompkins takes us from the savannas of Africa to the earth's first cities to the early days of the great faith traditions of both East and West Along the way he shows that despite what many of us have been taught the world's various spiritual traditions all have profoundly meaningful things to say about the animal soul if we simply know where to look Rescuing these ancient insights and blending them with vivid stories about animals today from a dwarf rabbit named Angus to a manatee named Moose to a black bear named Little Bit The Divine Life of Animals paints a gloriously inclusive picture of the cosmos as a place made up of both matter and spirit in which animals are every bit as important spiritually speaking as the humans with whom they share the world Though it is startlingly original The Divine Life of Animals also feels strangely and instantly familiar for it reveals truths that many of us have held in our hearts already waiting only for someone to give fresh voice to one of the oldest and most trustworthy intuitions we possess The Divine Life of Animals offers a compelling and timeless vision of the relationship between humans and animals that will have you looking at the animals in your life with new eyes

while I narrate my story **The Insurmountable Darkness of Love** Douglas E. Christie, 2022 This book is a reflection on the meaning of spiritual darkness especially those difficult places in human experience where meaning seems to elude us where we are emptied out and are compelled to dig deeper into who we truly are Douglas E Christie takes up this facet of experience in ordinary human experience but also in relation to the Christian contemplative and mystical traditions where such experience is often understood to be both painful and transformative allowing the mind and heart to open in love

All-Time Nines Don Cox, 2016-02-03 Who was the best baseball team of all time This timeless question can most effectively be answered through comprehensive analysis of baseball statistics Over the course of a season winning teams tend to score more runs while allowing fewer than their opponents The greater the difference in runs per game the more a team can be expected to win Comparing this data for the top five percent of Major League nines from 1901 through 2014 this book argues that runs above league average is the best statistic for ranking teams The author sorts 220 teams by era franchise and skills hitting fielding baserunning pitching evaluates their strengths and weaknesses and assigns numerical values to each player s skills to demonstrate how they contributed to team performance **Mission on the Ho Chi Minh Trail** Richard L. Stevens, 2020-07-07 Taking the reader in the mountains and forests that the Americans called Indian country Stevens presents the Viet Nam War as an extension of the romantic myth of the American frontier In seven operations on the Ho Chi Minh Trail the reader enters an exotic exhilarating terrifying world Documented by military reports Steven s powerful and poetic prose and his complex examination of the Viet Nam War elevate his Trail journey into the realm of myth
