A History of Western Appreciation of English-translated Tang Poetry Lan

Jiang,2018-03-08 This book examines the development of English translated Tang poetry and its propagation to the Western

world It consists of two parts the first of which addresses the initial stage of English translated Tang poetry s propagation

and the second exploring its further development By analyzing the historical background and characteristics of these two

stages the book traces the trend back to its roots discusses some well known early sinologists and their contributions and

familiarizes readers with the general course of Tang poetry s development In addition it presents the translated versions of

many Tang poems The dissemination of Tang poetry to the Western world is a significant event in the history of cross cultural

communication From the simple imitation of poetic techniques to the acceptance and identification of key poetic concepts the

Tang poetry translators gradually constructed a classic Chinese style in modern American poetry Hence the traditional

Chinese culture represented by Tang poetry spread more widely in the English speaking world producing a more lasting

impact on societies and cultures outside China and demonstrating the poetry s ability to transcend the boundaries of time

region nationality and culture Due to different cultural backgrounds the Tang poets or poems admired most by Western

readers may not necessarily receive high acclaim in China Sometimes language barriers and cultural differences make it

impossible to represent certain allusions or cultural and ethnic concepts correctly during the translation process However in

recent decades the translation of Tang poetry has evolved considerably in both quantity and quality As culture is manifested

in language and language is part of culture the translation of Tang poetry has allowed Western scholars to gain an

unprecedented understanding of China and Chinese culture

the austere elegance of style the compressed richness of imagery The poems are drawn chiefly from the traditional
