French architecture of the period It begins with the origins of the style moderne under the last years of Louis XIV discusses the end of Rococo and the return to antiquity and concludes with the Revolutionary architecture and the house of Madame R camier Kalnein describes the development of palace and hotel architecture by the two great architects de Cotte and Boffrand discussing such large urban projects as the reconstruction of Rennes and the Places Royales He traces the return to antiquity which began when the scholars of the Académie d'Architecture were sent to Rome the revolutionary architecture with its grand but never executed projects and the shift from neoclassicism to early romanticism Kalnein also examines the decorative arts of the period which became even more important than architecture in the Rococo period Focusing on such architects as Boffrand Gabriel and Redoux he shows how a study of their building decoration illuminates the evolution of style moderne the battle between Rococo and Neoclassicism and the dissemination of French styles throughout Europe

Advances in Utopian Studies and Sacred Architecture Claudio Gambardella,Claudia Cennamo,Maria Luisa Germanà,Mohd Fairuz Shahidan,Hocine Bougdah,2021-02-02 At a time dominated by the disappearance of Future as claimed by the French anthropologist Marc Augé Utopia and Religion seem to be two different ways of giving back an inner horizon to mankind Therefore this book on the one hand considers the importance of utopia as a tool and how it offers an economic and social resource to improve cities wealth future and livability On the other it explores the impact of religious and cultural ideals on cities that have recently emerged in this context Based on numerous observations the book examines the intellectual legacy of utopian theory and practices across various academic disciplines It also presents discussions theories and case studies addressing a range of issues and topics related to utopia Louvre Gabriele Bartz,2013 With more than 10

million visitors each year the Louvre is the world's most visited museum This book will guide you to this gigantic museum from the Ancient art to masterpieces by Leonardo da Vinci Vermeer or Ingres from the publisher Architecture and the Image at the Turn of the 21st Century Sanja Rodeš, 2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture's far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies **Structure in Architecture** Rowland J. Mainstone, 2024-10-28 All buildings must stand An adequate structure was as necessary for the simplest primitive hut as it is for the tallest or widest spanning modern building However this requirement became more difficult to satisfy as designers became more adventurous and the experience already gained became less directly applicable The present papers look at the consequent evolution of design methods and the types of understanding that have been essential guides A particular focus is the question of how earlier innovations made without the benefits of modern theory were possible Other papers look in detail at the most outstanding of these achievements such as the church of Hagia Sophia in Istanbul and the dome of Florence Cathedral *The Louvre and Versailles* Christopher Tadgell, 2020-05-01 In tracing the evolution of the Louvre from fortress to palace and of Versailles from hunting domain to dynastic capital Dr Tadgell's detailed architectural analysis of many projects external and internal realised and unrealised is set in the context of the development of the medieval monarchy towards absolutism of the development of the medieval chateau towards precedents for the seat of absolutism and of the effect of the French monarchy's financial incontinence on the realisation of royal building ambitions In particular Tadgell challenges received opinion on the introduction of Hispano Burgundian court etiquette to French palace design relates the court front of Lescot's Renaissance Louvre to the iconography of apotheosis revises the current ordering of

Fran ois Mansart s designs for the Louvre and reassesses the subsequent contribution of Claude Perrault to the completion of the east front in respect for the opinion of 17th and 18th century commentators After surveying the various phases of work for Louis XIV at Versailles he traces the evolution of Ange Jacques Gabriel s grand projet for rebuilding the town side of the palace for Louis XV noting the influence of Bernini on the definitive phase and he masters the intricacies of the incessant changes to the royal apartments which inhibited rebuilding Finally the book looks at the influence of the great French palaces on those seeking to emulate their ambition from Stockholm in the late 17th century to the deliriously opulent late 19th century palace of Ludwig II of Bavaria at Herrenchiemsee A wealth of illustrative material and supporting documents bring this comprehensive and authoritative text to life
