some disaffected and drug addicted kids and Richard because he had been working with Science and Behavior Books on transcribing and editing Fritz Perls seminal work *The Gestalt Approach and Eyewitness to Therapy* They started a local Gestalt group and ran 2-3 sessions a week collaborating and experimenting with the language of therapy They started achieving some brilliant results but were having problems transferring their skills to others and so Richard invited one of their college professors John Grinder to observe what they were doing in order that he would hopefully be able to deconstruct what they were doing that was so effective John was a professor of Linguistics and was instantly impressed with the work that they were doing He was able to add more structure and in due course the three of them formalised what is now known as the Meta Model NLP or Meta as it was known then was born
