The Search for the Absolute Jeffrey H Williams, 2020-03-26 History and archaeology tell us that when our far ancestors began to settle in localized groups they codified their lives and experiences and formed a collective for mutual support This proto civilization would have arisen from each individual s questions about the world and their attempt to understand themselves and their place in the world These groups or tribes evolved rules of conduct to facilitate communal living and made a calendar for the group s celebration of harvests and other events upon which the group was utterly dependent This process of social evolution is the origin of religion and of a magical way of looking at Nature Eventually this developing worldview was also the origin of science which is our investigation of Nature to understand something of what is happening around us and to use this knowledge to ensure our survival in a violent indifferent Universe After all science and religion seek to answer the same question Why and how is the natural world the way it is This book seeks to show how science evolved from religion and magic in response to a need to understand Nature

Magic and Magicians in the Middle Ages and the Early Modern Time Albrecht Classen, 2017-10-23 There are no clear demarcation lines between magic astrology necromancy medicine and even sciences in the pre modern world Under the umbrella term magic the contributors to this volume examine a wide range of texts both literary and religious both medical and philosophical in which the topic is discussed from many different perspectives The fundamental concerns address issue such as how people perceived magic whether they accepted it and utilized it for their own purposes and what impact magic might have had on the mental structures of that time While some papers examine the specific appearance of magicians in literary texts others analyze the practical application of magic in medical contexts In addition this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained Magic is oddly but significantly still around us and exerts its influence Focusing on magic in the medieval world thus helps us to shed light on human culture at large
