Magin Marginales:

Beyond the Margin Paolo Giordano, Anthony Julian Tamburri, 1998 The editors goal in this book is to give a critical overview of where Italian American literary and cultural studies are today To this end Beyond the Margin includes three types of essays the characteristics of Italian American literature and culture in a general sense specific writers and film

Community Development on the North Atlantic Margin John Hutson, Reginald Byron, 2017-07-12 This title was first published in 2001 Isolated communities dependent upon fishing farming and forestry which are scattered around the North Atlantic coast have shared a disastrous decline during the last decade These communities are in the peripheries of advanced industrial nation states such as Canada and supra national alliances such as the European Community yet despite this there are no easy solutions to the development of these regions This volume argues that the productive assets of these regions and how they can be used to sustain household incomes need to be better understood The assets need to be converted into products and services and they need to be marketed profitably The diminishing flow of young people who leave these areas to obtain higher education and who do not return must be turned around and efforts must be concentrated on the creation or strengthening of economic conditions which satisfy the younger generation s employment aspirations consumer requirements and social needs

Local Enterprise on the North Atlantic Margin Reginald Byron, John Hutson, 2018-12-18 First published in 1999 this volume offers contrasting views from a variety of academic disciplines including agriculture anthropology economics geography management studies planning and sociology which focus on the single two fold problem of how to understand these issues and what practically might be done about them

The Centre as Margin: Eccentric Perspectives on Art Joana Antunes, Maria de Lurdes Craveiro, Carla Alexandra Gonçalves, 2019-05-01 The Centre as Margin Eccentric Perspectives on Art is a multi authored volume of collected essays that answer the challenge of thinking Art History and the Arts in a broader sense from a liminal point of view Its main goal is thus to discuss the margin from the centre drawing on its concomitance within study themes and subjects ontological and epistemological positions or research methodologies themselves Marginality eccentricity liminality and superfluity are all part of a dynamic relationship between centre and margin s that will be approached and discussed from the point of view of disciplines as different and as close as art history philosophy literature and design from medieval to contemporary art Resulting from recent research developed from the privileged viewpoint offered by the margin this volume brings together the contributions of young researchers along with the work of career scholars Likewise it does not obey a traditional or a rigid diachronic structure being rather organized in three major parts that organically articulate the different essays Within each of these parts in which the book is divided papers are sometimes organized according to their timeframes providing the

reader with an encompassing though not encyclopedic overview of the common ground over which the various artistic disciplines build their methodological theoretical and thematic centers and margins The intended eccentricity of this volume and the original essays herein presented should provide researchers scholars students artists curators and the general reader interested in art with a refreshing approach to its various scientific strands **Transactions of the Natural**
