From Photons To Atoms: The Electromagnetic Nature Of Matter Daniele Funaro, 2019-09-10 Motivated by a revision of the classical equations of electromagnetism that allow for the inclusion of solitary waves in the solution space the material collected in this book examines the consequences of adopting the modified model in the description of atomic structures The possibility of handling photons in a deterministic way indeed gives a chance to review the foundations of quantum physics Atoms and molecules are described as aggregations of nuclei and electrons joined through organized photon layers resonating at various frequencies explaining how matter can absorb or emit light quanta Some established viewpoints are subverted offering an alternative scenario The analysis seeks to provide an answer to many technical problems in physical chemistry and at the same time to raise epistemological questions

Biomagnetic Monitoring of Particulate Matter Prabhat Rai, 2015-11-02 Air pollution originating from rapid industrialization urbanization population growth and economic development has disturbed the urban ecosystems of ecologically sensitive regions like the Indo Burma hot spot and they are under severe air pollution stress with limited resources to collect data on what is happening Air pollutants comprised of both particulate matter PM and gaseous pollutants may cause adverse health effects in human affect plant life and impact the global environment by changing the atmosphere of the earth It is now well established that urban PM may also contain

magnetic particles along with other air pollutants Biomonitoring of PM through magnetic properties known as biomagnetic monitoring measures the magnetic parameters of dust loaded plant leaves giving a new opportunity to monitor Compared to existing conventional technologies biomagnetic monitoring is an eco friendly technique perfect in urban areas Biomagnetic Monitoring of Particulate Matter reviews the issues with PM and the potential of these methods to on tropical vegetation on a variety of flora which represent the biodiversity of the Indo Burma Hot Spot Bio magnetic Monitoring of Particulate Matter gives a comprehensive overview of the issue of particulate pollution and monitoring Cases of magnetic biomonitoring across different environments are included to demonstrate this emerging technique as a way to measure particulate pollution Coverage includes a comparison to other techniques as well as why it works well ecological diverse developing areas which are data scarce like the Indo Burma Hot Spot A review of the detrimental health impacts of Particulate Matter reinforces the importance for this type of data to be available universally
