Magnum Landscape:

Magnum Landscape Magnum Photos, 1996 In the tradition of monumental Magnum books this publication brings together an eclectic assortment of work by the finest photographers of our time capturing a riveting and seductive series of fleeting moments around the world For half a century Magnum photographers through countless commissions and their own personal work have produced images that comment on the state of the world In photographing the landscape they are not just spectators but participants aware that the land itself has been shaped by man and that the very notion of a landscape depends on a human viewpoint As each photographer records and interprets a diversity of subject matter to form a unique personal style the variations on this theme are endless landscapes of war of agriculture of industry of cities and motorways of desolation celebration and tranquillity The photographs assimilated in this book invite us to rediscover landscape and urge us to think more profoundly not only about planet earth in its entirety but about our own place in it *Imagining Landscapes* Monica Janowski, Tim Ingold, 2016-05-13 The landscapes of human habitation are not just perceived they are also imagined What part then does imagining landscapes play in their perception The contributors to this volume drawn from a range of disciplines argue that landscapes are imagined in a sense more fundamental than their symbolic representation in words images and other media Less a means of conjuring up images of what is out there than a way of living creatively in the world imagination is immanent in perception itself revealing the generative potential of a world that is not so much ready made as continually on the brink of formation Describing the ways landscapes are perpetually shaped by the engagements and practices of their inhabitants this innovative volume develops a processual approach to both perception and imagination But it also brings out the ways in which these processes animated by the hopes and dreams of inhabitants increasingly come into conflict with the strategies of external actors empowered to impose their own ready made designs upon the world With a focus on the temporal and kinaesthetic dynamics of imagining *Imagining Landscapes* foregrounds both time and movement in understanding how past present and future are brought together in the creative world shaping endeavours of both inhabitants and scholars The book will appeal to anthropologists sociologists and archaeologists as well as to geographers historians and philosophers with interests in landscape and environment heritage and culture creativity perception and imagination *Landscape* John Wylie, 2007-08-07 Landscape is a stimulating introduction to and contemporary understanding of one of the most important concepts within human geography A series of different influential readings of landscape are debated and explored and for the first time distinctive traditions of landscape writing are brought together and examined as a whole in a forward looking critical review of work by cultural geographers and others within the last twenty to thirty years This book clearly and concisely explores landscape theories and writings allowing students of geography environmental studies and cultural studies to fully comprehend this vast and complex topic To aid the student vignettes are used to highlight key writers papers and texts Annotated further reading and student exercises are also included For

Landscape Resilience

Catrin Schmidt,2021-10-25 This book explains what makes landscapes resilient Why are some landscapes able to recover quickly from disruptive events or crises while others are completely thrown off balance for the foreseeable future The author sets out in search of the influencing factors and conditional structures of landscape resilience and not only evaluates the current state of the art but also explores landscapes around the globe that could not be more contrasting from arid agricultural landscapes to boreal forest landscapes from atolls to saline landscapes from terraced landscapes to cities Just as diverse as the landscape types are the factors considered that can put landscapes under stress However diverse the case studies are in detail their fascinating mosaic shows at the same time that there are overarching principles that can be used to increase the resilience of landscapes in a targeted way so that landscapes emerge from crises strengthened rather than weakened This book is a translation of the original German 1st edition Landschaftliche Resilienz by Catrin Schmidt published by Springer Verlag GmbH Germany part of Springer Nature in 2020 The translation was done with the help of artificial intelligence machine translation by the service DeepL com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors

Zen Landscapes Allen S. Weiss, 2013-09-15 The essential elements of a dry Japanese garden are few rocks gravel moss Simultaneously a sensual matrix a symbolic form and a memory theater these gardens exhibit beautiful miniaturization and precise craftsmanship But their apparent minimalism belies a true complexity In *Zen Landscapes* Allen S. Weiss takes readers on an exciting journey through these exquisite sites explaining how Japanese gardens must be approached according to the play of scale surroundings and seasons as well as in relation to other arts revealing them as living landscapes rather than abstract designs Weiss shows that these gardens are inspired by the Zen aesthetics of the tea ceremony manifested in poetry painting calligraphy architecture cuisine and ceramics Japanese art favors suggestion and allusion valuing the threshold between the distinct and the inchoate between figuration and abstraction and he argues that ceramics play a crucial role here relating as much to the site specificity of landscape as to the ritualized codes of the tea ceremony and the everyday gestures of the culinary table With more than one hundred stunning color photographs *Zen Landscapes* is the first in depth study in the West to examine the correspondences between gardens and ceramics A fascinating look at landscape art and its relation to the customs and craftsmanship of the Japanese arts it will appeal to readers interested in landscape design and Japan's art and culture

Landscapes of Encounter Liam Gearon, 2002 Brian Moore 1921–1999 is one of the few novelists whose literary portrayal of Catholicism effectively spans the period prior to and following the Second Vatican Council Many critics have discussed how Moore's life is reflected in his works while others have dismissed his fictions as simple narratives in the mould of classical realism In this timely book Gearon contends that Moore's fictions are far more complex as he was one of the great observers of Catholicism in all its modern and historical controversy
