Ed Frank Abbott Magruder, William A. McClenaghan, 1917 **The Code of Hammurabi** Jack Sholl, Jeane
Breazeale, 2013-09-17 This case study shows that a widely used U S Government high school textbook puts an ancient King of
Babylon on the same level as American founding fathers George Washington Thomas Jefferson and John Adams The research
study finds that the assertion that the Hammurabi Code is an underlying document of the United States as millions of
American high school students are being taught today is not correct The U S Declaration of Independence the U S
Constitution and the Bill of Rights are the founding documents of the United States The study challenges the claim by both
legalists and religionists to the presumed importance of this ancient code to the foundations of American government now
and in the past It warns that historical revisionism of this type poses a threat to U S national security at a time when
American values are being challenged abroad especially in the Middle East It finds no overall uniform oversight or
coordination of parties at all levels involved in high school textbook content The present system for fully reviewing textbooks
and curricula a combination of publishers school boards issue blind teachers and academics government and national security
agencies is not working Unless corrected the foundations of freedom and democracy and the Judeo Christian spiritual values
upon which they are built will continue to be seriously eroded in the nations high schools **Magruder's American**

in the Era of Globalization Yvonne Raley, Gerhard Preyer, 2009-12-04 Rather than having formed a global community today's
society is more fragmented than ever In light of this education faces some formidable new challenges The authors of this
collection of essays explore these challenges and suggest some novel ways of dealing with them **New Serial Titles**, 1991
A union list of serials commencing publication after Dec 31 1949 **The Greenwood Dictionary of Education** Bloomsbury
Publishing, 2011-07-19 This book defines over 3 000 terms from the field of education to assist those charged with teaching
students to become global citizens in a rapidly changing technological society John W Collins and Nancy Patricia O'Brien
coeditors of the first edition of The Greenwood Dictionary of Education published in 2003 have acknowledged and addressed
these shifts This revised second edition supplements the extensive content of the first through greater focus on subjects such
as neurosciences in educational behavior gaming strategies as a learning technique social networking and distance education
Terms have been revised where necessary to represent changes in educational practice and theory The Dictionary's focus is

on current and evolving terminology specific to the broad field of education although terms from closely related fields used in the context of education are also included Encompassing the history of education as well as its future trends the updated second edition will aid in the understanding and use of terms as they apply to contemporary educational research practice and theory
