Zuckert, 1992-11      **Sun Warm You** Gene Baumgaertner, 2007-03-12 STORYLINE The story is about a clan of The People or hornbrows as they refer to themselves The clan is making its annual trek along with the rest of a great herd to the ancient nesting grounds Along the

way two of the main characters get split off from the herd during an attack by a tyrannosaur like predator What follows is a series of adventures by characters remaining with the herd and those forced to deal with the dangers of traveling without the protection of the herd The former takes the reader through herd socialization dominance fighting nest building and the feeding and protection of the young All of this moves through the actions and intrigues of several prominent characters Grendaar the Groundshaker the aging clan leader who must fight to retain his position and his life long consort the eternally beautiful Tessah the Wise Dandraar the irrepressible youth who half the time is engaged in adventures with his friends and the other half is trying to find sense in the actions of adults and Adeldraar highly placed leader of the herd and sworn enemy of Grendaar s Add to this the adventures of a young pair trying to survive beyond the herd while at the same time coping with the changes brought about by imminent adulthood This part of the story follows several other main characters Panthrar the Swift the valiant and handsome adolescent maturing to adulthood Pippit the True the comely budding young female who accidentally gets thrown together with Panthrar Red patch the dreadrunner a vicious tyrannosaur like creature Thundermaker the threehorn the indomitable leader of a herd of Triceratops that fate throws the way of the young hornbrows and Savage the dreadcharger and his troop of deadly and relentless Tyrannosaurs The story unfolds as Panthrar and Pippit constantly try to evade death yet find time to fall in love cope with nesting and raise a brood of hatchlings in an often strange and frequently hostile environment The book comes complete with graphics maps and appendices The appendices describe the characters provide a glossary of terms provide insight about the inhabitants of late Cretaceous North America and elaborate on the setting for the story ADDITIONAL BACKGROUND Paleontological research and findings over the several decades have changed our perspective of what we know and what we think we know about dinosaurs For example it is pretty well established that at least some types of herbivorous dinosaurs notably hadrosaurs and ceratopsians traveled together in large herds herds sometimes exceeding ten thousand individuals And since they traveled in large groups then it might be reasonable to expect that they developed a heightened social awareness In other words they would have developed some form of social structure a hierarchy or pecking order They would have some form of communication to protect territory to signal if a predator threatened the herd to make other simple wants known and possibly for more complex purposes It has also been discovered that more than one form of dinosaur nested in colonies This is a not too surprising extension of the socialization of the herd Along with these findings it has been determined that many dinosaurs built nests and that at least some of them tended the eggs in the nests and fed and protected the young after they hatched Some hatchling hadrosaurs were completely helpless for weeks after hatching and someone likely the mother and or the father had to gather food for them and keep predators away from the nest These were remarkable discoveries socializing nesting in colonies and parenting Other findings are still being hotly debated although the general consensus is that dinosaurs were not stupid sluggish cold blooded and doomed to extinction Were at least some dinosaurs warm blooded Were many dinosaurs swift and

alert Dinosaurs survived for over 140 million years compared to a few million years for human like creatures and suppressed the development of mammals during that entire period It was only after dinosaurs ceased to be that mammals inherited the earth A hundred and forty million years is a long time so they were doing something right      *Fossils of the World* Chris Pellant, 1994 Discusses how fossils are formed and areas where you can find them near your home Includes more than 12 easy to do science projects
