Main Force Assault:

The Soviet Conduct of Tactical Maneuver David Glantz, 2013-11-05 First Published in 1991 This book addresses a critical aspect of Soviet maneuver theory that has been almost totally neglected in Western analysis specifically Soviet concern for tactical maneuver Since the 1930s the Soviets have consistently argued that operational maneuver can be successful only if conducted in conjunction with equally successful tactical maneuver carried out primarily by forward detachments Forward detachments the primary tactical maneuver forces tasked with performing critical combat functions emerged in theory in the 1930s and flourished on the basis of virtually untested concepts until the initial phases of Operation Barbarossa when the Soviet mobile force structure was destroyed in a matter of weeks Forward detachments again emerged after the Stalin grad Operation in 1943 when the Soviet General Staff required their use to spearhead all operations by mobile forces After mid 1943 forward detachments led the operations of all tank armies and tank and mechanized corps particularly during exploitation operations By war s end all forces mobile and rifle alike employed forward detachments to lead their operations during the exploitation stage of operations Forward detachments preempted enemy defenses and collectively formed a coordinated network of forward mobile units which provided coherence to the vast array of advancing Soviet mobile and rifle forces In the late 1960s the forward detachment received renewed attention as a critical element which could assist in the conduct of operational maneuver Today the Soviets believe that forward detachment operations are the key to conducting successful operations on a battlefield increasingly threatened by deadly high precision weaponry Tailored flexible battalion size forward detachments along with their operational counterparts corps and brigades may in fact be the model upon which the future Soviet force structure will be based This volume surveys in detail the conceptual and organizational evolution of the forward detachment as the premier Soviet tactical maneuver force It vividly demonstrates why forward detachments are suited by their versatile nature to be a precursor of future restructured Soviet units in general
