

SOCIOLOGICAL PARADIGMS

Sociological paradigms are the broad schools of thought in sociology. The three key sociological paradigms are functionalism, conflict theory, and symbolic interactionism.

1. FUNCTIONALISM

Argues that social stability is a prerequisite for a healthy and strong society. Social institutions contribute towards social stability. Abrupt social change imperils social order.

2. CONFLICT THEORY

Argues that society is built upon enduring inequality on the basis of social class, gender, race etc. Structural social change is required to create an egalitarian society.

3. SYMBOLIC INTERACTIONISM

Argues that we construct society through a range of symbols (e.g., words, gestures) and social interactions. People make up their roles as they interact.

Main Trends in Sociology , *On Science, Inference, Information and Decision-Making* A. Szaniawski,2012-12-06

There are two competing pictures of science One considers science as a system of inferences whereas another looks at science as a system of actions The essays included in this collection offer a view which intends to combine both pictures This compromise is well illustrated by Szaniawski s analysis of statistical inferences It is shown that traditional approaches to the foundations of statistics do not need to be regarded as conflicting with each other Thus statistical rules can be treated as rules of behaviour as well as rules of inference Szaniawski s uniform approach relies on the concept of rationality analyzed from the point of view of decision theory Applications of formal tools to the problem of justice and division of goods shows that the concept of rationality has a wider significance Audience The book will be of interest to philosophers of science logicians ethicists and mathematicians [Bibliography of Social Science Periodicals and Monograph Series: Japan](#) United States. Bureau of the Census,1961 [Lazarsfeld's Methodology and Its Influence on Postwar Sociology in Europe](#) Hynek Jeřábek,2024-11-28 This book explains how the Columbia model of sociology which was based on the methodology of P F Lazarsfeld became a dominant sociological school of thought in American and European postwar sociology Providing an overview of Lazarsfeld s inventions and his methodological organisational and institutional innovations it describes the means by which a particular model of sociology was gradually adopted in departments headed by Lazarsfeld and in the work of his successors With attention to the use by Lazarsfeld of methodological texts published by prestigious publishing houses in his research and teaching his activity in international organisations including the UN his collaboration with figures such as Robert K Merton and Raymond Boudon and his attempts to show how the roots of his empirical research methodology lay in the work of early European scholars this volume shows how a particular sociological paradigm came to prevail over others for more than a decade It will therefore appeal to scholars of sociology with interests in the history of the discipline and questions of research methodology [Bibliography of Social Science Periodicals and Monograph Series](#) United States.
