offers explicit guidelines for evaluating patients selecting the right operation and implementing clinically proven procedures. It covers major topics relevant to the field such as oncology, ophthalmology, dentistry, the nervous system, the urinary and reproductive systems, and more. The up-to-date 3rd edition features an increased emphasis on decision-making algorithms and high-quality images that depict relevant anatomy, diagnostic features, and sequential steps in operative procedures. Expanded detailed coverage assists the reader with learning and applying the latest surgical techniques. Contributors from three different continents and 17 countries outstanding in their fields lend a global perspective to the work. Extensive high-quality illustrations aid the reader in clear visualization of techniques, instrumentation, and diagnosis. References for each chapter direct the reader to further sources of information. An appendix of normal laboratory values for the dog and cat puts this essential information within easy reach. A cardiopulmonary resuscitation algorithm is printed on the inside front cover for quick and easy reference. A quick guide to evaluation and initial stabilization of life-threatening cardiopulmonary complications is printed on the inside back cover for immediate access to crucial information. The section on critical care has been expanded to include more complete information. 10 new section editors and 146 new contributors bring new insight to topics in their areas of expertise. 38 new chapters, including a chapter on arthroscopy, reflect current knowledge and advances. Detailed coverage of surgery techniques presents explicit, easy-to-follow guidelines and procedures. An increased emphasis on decision-making algorithms makes the book even more clinically useful. Each chapter has been thoroughly revised, providing the most comprehensive scope of coverage for each topic.

Weinreb,J.D. Brandt,D. Garway-Heath,F. Medeiros,2007 Intraocular Pressure is the subject for the fourth Consensus report published under the auspices of the AIGS now renamed as the World Glaucoma Association WGA The active participation in our Project Forum e Room started in January 2007 by expert members of the various consensus committees As done with prior reports the preliminary document was circulated to each of the member societies of the WGA and additional comments were solicited for the document Each member Society also was invited to send a representative to attend the consensus meeting that was held in Fort Lauderdale Florida on May 5 2007 The report then was discussed extensively during the Consensus Meeting and Consensus Statements were revised following these discussions Intraocular Pressure is a topic that touches the essence of our subspecialty Its measurement is a vital aspect of glaucoma diagnosis and treatment For now it is the only modifiable risk factor Measurement of IOP is a relatively recent one century addition to our diagnostic armamentarium Even though the measurement of IOP is relatively simple it is by no means uncomplicated The greatest limitation is probably the paucity of measurements that are obtained in practice Although continuous IOP measurement is on the horizon it still is not ready for clinical practice Arriving at a consensus often can be circuitous and filled with compromises However this opportunity is used to critically assess the evidence and develop consensus points The reader will find this consensus report instructive practical and thought provoking Moreover it has great potential to impact patients both individually and collectively through both their care and research
