Artificial Intelligence Versus Natural Intelligence Roger Penrose,Emanuele Severino,Fabio Scardigli,Ines Testoni,Giuseppe Vitiello,Giacomo Mauro D'Ariano,Federico Faggin,2022-03-24 This book centers around a dialogue between Roger Penrose and Emanuele Severino about one of most intriguing topics of our times the comparison of artificial intelligence and natural intelligence as well as its extension to the notions of human and machine consciousness Additional insightful essays by Mauro D Ariano Federico Faggin Ines Testoni Giuseppe Vitiello and an introduction of Fabio Scardigli complete the book and illuminate different aspects of the debate Although from completely different points of view all the

authors seem to converge on the idea that it is almost impossible to have real intelligence without a form of consciousness In fact consciousness often conceived as an enigmatic mirror of reality but is it really a mirror is a phenomenon under intense investigation by science and technology particularly in recent decades Where does this phenomenon originate from in humans and perhaps also in animals Is it reproducible on some device Do we have a theory of consciousness today Will we arrive to build thinking or conscious machines as machine learning or cognitive computing seem to promise These questions and other related issues are discussed in the pages of this work which provides stimulating reading to both specialists and general readers The Chapter Hard Problem and Free Will An Information Theoretical Approach is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com **English Mechanic and World of Science**, 1892 **Natural and Artificial Ball Lightning in the Earth's Atmosphere** Vladimir L.
