Mystery of Space Zhang Banggu,2016-02-19 The space discussed in this book is realistic physical space is defined as extensive property of matter and its motion This is the space we are familiar with in our daily life Its basic property is it can be measured and validated In physical theory there are phase space in statistical physics state vector space in quantum mechanics complex number space function space in mathematics and some noosphere in social scientific field In Buddhism books there are hells with eighteen layers heaven with ninety nine layers These are all abstract spaces We will not discuss these kinds of spaces With the knowledge of space from our daily lives we introduced a strict scientific definition of space and illustrated that space is a property of matter In this book the relationship of uniformity of space centrosymmetry law of momentum conservation and law of angular momentum conservation are introduced Also we discussed the relation of space and motion introduced special relativity and demonstrated that the space properties of a matter will change dramatically as it is moving with a speed close to the light velocity We introduced the property of the smallest space we can observe at present and quantum mechanics which describes the micro world Also we introduced the fact that gravitation will bend space of matter and general relativity which described this fact We introduced cosmology which described the big space about the related observed facts related standard model and its difficulties the related works of the author and the supports from observed facts At last this book introduced some thoughts on some questions from the author Some of them will be solved with development of science later

The Mystery of Space Robert T. Browne,1919 Mathematics is the biometer of intellectual evolution Hence the determination of the status quo of the intellect at any time can be accomplished most satisfactorily by applying to it the rigorous measure of the mathematical method The intellect has but one true divining rod and that is mathematics By day and by night it points the way unerringly so long as it leads through materiality but falteringly blindly fatally when that way veers into the territory of vitality and spirituality Wherefore when we have wished to ascertain the real status of the intellect as well as its limitations tendencies possibilities we have turned to its conduct in the field of mathesis where it is least trammled in its ingressive and egressive motivations because of the natural and easy

accommodation which is offered for intellectual movement Whether there are signs of moribundity or symptomatic evidences of marked growth or of a termination of intellectual regnancy or whatever may be the occasion for the examination no surer index than the mathematical may be found for the purpose Full logical justification is therefore claimed for the choice of mathematical evidences to test the assumption that a new era of conscious mental conquest is opening for the vanguard of humanity and sequently for the human family
