Moorish Circle 7 Keith Moore 32,2005-05-04 This book is based on the theory that the black Muslim movement was created from the knowledge of the Masonic order In the early decades of the 20th century noble drew ali established a political and religious organization known today as the Moorish Science Temple of America It was this organization that exposed black to something other than the normal Christian influences of that day Ali a high degree freemason incorporated various Masonic teachings from an auxiliary group Known as the AEAONMS ancient Egyptian Arabic order of noble of the mystic shrine A pseudo Islamic Arabic oriental organization that served as a wake up call to a lost knowledge A knowledge that was taken away from Africans during the slave trades The theory behind this book is that the majority of the slaves that were taken from the west coast of Africa were practicing Muslims and these Muslims were forced to convert to Christianity under the strong oppression of slavery At one time Afro Americans were the biggest minority in the American society About 90% of the todays population of blacks are descendants of slaves that were brought to America for working on plantations since the 16th century At the beginning of the 19th century most of the so called Negroes lived in the plantation areas of the Southern States After the Civil War and the abolition of slavery it wasnt until the early 1920s and 30s that blacks were beginning to experiment with other faiths Of all the faiths Islam became the fastest growing religion and the most popular This book by far is in no way a research into black history instead it covers a more deeper aspect of history in which I call the history behind the history It explores the true Asiatic origins of the ancient religions of Hinduism Buddhism well as the Islamic faith Finally It explores the Masonic symbolisms of alis Moorish science dogma digging deeper into the esoteric side of his Aquarian Masonic teaching explaining their origins and discovering an age old wisdom that had been kept hidden from the human eye One would think that Africans in the Americas would have rejected the religious tradition of their European oppressors taking into consideration that African religions are far older they possess more sources of knowledge spiritual salvation Yet there are those who have turned away from traditional Christian dominated environments in order to find a greater understanding of themselves and the world in which they live One alternative has been to seek knowledge in the various religious groups that arose in the 20th century

complexity incompleteness and in accessibility of Vartio's epistemic worlds including the characters' private worlds of knowledge beliefs emotions hallucinations and dreams In regards to the emotional emplotment of fictional worlds this study also benefits from affective narratology as well as the plot theory being influenced by possible world semantics narrative dynamics and cognitive narratology As the five analysis chapters of this study show fictional minds in Vartio's fiction are not only introspective solipsist and streaming but also embodied and social entities In the readings of the primary texts the concept of embodiedness is used to examine the situated presence of an experiencing mind within the time and space of the storyworld Fictional minds' interactions are also demonstrated as evolving from local experientiality to long term calculations that turn emotional incidents into episodes and episodes into stories In Vartio's novels the emotional story structure of certain conventional story patterns such as the narratives of female development and the romance plot the sentimental novel and epistolary fiction are modified and causally altered in the portrayal of the embodied interactions between the self the other and the world The trajectories of female self discovery in Vartio's novels are analyzed through the emotional responses of characters their experiences of randomness their ways of counterfactualizing their traumatic past their procrastinatory or akratic reactions or indecisiveness The gradual move away from the percepts of the external world to the excessive imaginings and misreadings of other minds triggered by the interaction of worlds and minds challenges the contemporary and more recent accounts of modernism both in Finnish and international contexts Mystic Bonds Lu G.
