**Myth, Cosmos, and Society** Bruce Lincoln, 1986      **Myth, Cosmos, and Society** Bruce Lincoln, 1986      *Sound and Communication* Annette Wilke, Oliver Moebus, 2011-01-28 In Hindu India both orality and sonality have enjoyed great cultural significance since earliest times They have a distinct influence on how people approach texts The importance of sound and its perception has led to rites models of cosmic order and abstract formulas Sound serves both to stimulate religious feelings and to give them a sensory form Starting from the perception and interpretation of sound the authors chart an unorthodox cultural history of India turning their attention to an important but often neglected aspect of daily religious life They provide a stimulating contribution to the study of cultural systems of perception that also adds new aspects to the debate on orality and literality The audio samples originally included to the book as a music CD can be downloaded from this website under Supplementary Materials      **The Hebrew God** Bernhard Lang, 2002-01-01 Originally worshipped by the people of a small and politically insignificant eastern Mediterranean community the Hebrew God rose to become the monotheistic deity of the entire Western tradition Indeed the God of Israel ranks as the most distinguished deity in human history In this text biblical scholar Bernhard Lang draws upon the available evidence including ancient Near Eastern and Egyptian texts and art to provide a portrait of the ancient Hebrew God      **Religion, Culture, and Politics in Pre-Islamic Iran** Bruce Lincoln, 2021-06-22 In Religion Culture and Politics in Pre Islamic Iran Bruce Lincoln offers a vast overview on different aspects of the Indo Iranian Zoroastrian and Pre Islamic mythologies religions and cultural issues The book is organized in four sections according to the body of evidence they engage most directly Avestan Old Persian Pahlavi and Iranian materials in comparison with other data including studies of myths especially those with cosmogonic implications ritual practices cosmological constructions of space and time points of intersection between religion ethics law and politics ideological aspects of scientific and medical theorizing social organization and gender relations and other diverse topics      **Spectacles of Death in Ancient Rome** Donald G. Kyle, 2012-11-12 The elaborate and inventive slaughter of humans and animals in the arena fed an insatiable desire for violent spectacle among the Roman people Donald G Kyle combines the words of ancient authors with current scholarly research and cross cultural perspectives as he explores the origins and historical development of the games who the victims were and why they were chosen how the Romans disposed of the thousands of resulting corpses the complex religious and ritual aspects of institutionalised violence the particularly savage treatment given to defiant Christians This lively and original work provides compelling sometimes controversial perspectives on the bloody entertainments of ancient Rome which continue to fascinate us to this day      **Death, War, and Sacrifice** Bruce Lincoln, 1991-08-27 One of the world s leading specialists in Indo European religion and society Bruce Lincoln expresses in these essays his severe doubts about the existence of a much hypothesized prototypical Indo European religion Written over fifteen years the essays six of them previously unpublished fall into three parts Part I deals with matters Indo European in a

relatively unproblematic way exploring a set of haunting images that recur in descriptions of the Otherworld from many cultures While Lincoln later rejects this methodology these chapters remain the best available source of data for the topics they address In Part II Lincoln takes the data for each essay from a single culture area and shifts from the topic of dying to that of killing Of particular interest are the chapters connecting sacrifice to physiology a master discourse of antiquity that brought the cosmos the human body and human society into an ideologically charged correlation Part III presents Lincoln's most controversial case against a hypothetical Indo European protoculture Reconsidering the work of the prominent Indo Europeanist Georges Dumézil Lincoln argues that Dumézil's writings were informed and inflected by covert political concerns characteristic of French fascism This collection is an invaluable resource for students of myth ritual ancient societies anthropology and the history of religions Bruce Lincoln is professor of humanities and religious studies at the University of Minnesota

**Studying Religion** Russell McCutcheon, 2024-01-22 Widely used as a primer a class text or just a provocation to critical thinking Studying Religion clearly explains the methods and theories employed in the academic study of religion by tackling the problem of how scholars define and then study religion Written for all newcomers to the field its brief chapters explore the three main ways in which religion is defined and along the way also consider a range of related topics from the history and functions of religion to its public discourse religion in the courts and the classification of diverse groups into world religions The works of classic and contemporary scholars from Karl Marx and Sigmund Freud to Bruce Lincoln and Naomi Goldenberg are analyzed and explored in readable chapters and detailed supporting materials Studying Religion represents a shift away from the traditional descriptive and comparative approach and instead uses the study of religion to invite readers to consider how they divide up name and come to know the world around them This edition also includes a new final chapter Identification Matters adding to the case studies included throughout this book to present a collection of contemporary instances where different approaches to defining and studying religion make it possible to study other issues of contemporary relevance including those involving gender race and the rights of indigenous peoples The new chapter makes explicit the practical topics of identity and status that have always been implicit throughout the entire book bringing into the classroom a wide variety of timely and relevant topics that can be better understood by its approach This book therefore remains invaluable to all students of religious studies whether in the introductory class or as an example of an alternative way of approaching the field

history and methods of religious studies To assess the many points of view in this mature but diffuse discipline Capps uses the idea that four basic of fundamental questions and three enduring interests have given formal structure to the study of religion the essence of religion the origin of religion descriptions of religion the function of religion the language of religion comparisons of religion and the future of religious studies In this way Capps relates the chief insights and theories of philosophy anthropology phenomenology sociology and theology of religion and spotlights theorists from Immanuel Kant to Mircea Eliade His valuable text unites in a single narrative and conceptual framework the major methodological proposals for the academic study of religion treats all the major theorists in their respective disciplines schools of thought and intellectual movements treats the whole discipline as a dynamic and evolving tradition Religious Studies constitutes not only an erudite introduction to the field exhibiting vast scholarship and careful assessment but also a bold synthetic proposal for its future

Reflections on Resemblance, Ritual, and Religion Brian K. **How We Became Human** Pierpaolo Antonello, Paul Gifford, 2015-10-01 From his groundbreaking *Violence and the Sacred* and *Things Hidden since the Foundation of the World* Ren Girard's mimetic theory is presented as elucidating the origins of culture He posits that archaic religion or the sacred particularly in its dynamics of sacrifice and ritual is a neglected and major key to unlocking the enigma of how we became human French philosopher of science Michel Serres states that Girard's theory provides a Darwinian theory of culture because it proposes a dynamic shows an evolution and gives a universal explanation This major claim has however remained underscrutinized by scholars working on Girard's theory and it is mostly overlooked within the natural and social sciences

Joining disciplinary worlds this book aims to explore this ambitious claim invoking viewpoints as diverse as evolutionary culture theory cultural anthropology archaeology cognitive psychology ethology and philosophy The contributors provide major evidence in favor of Girard's hypothesis Equally Girard's theory is presented as having the potential to become for the human and social sciences something akin to the integrating framework that present day biological science owes to Darwin something compatible with it and complementary to it in accounting for the still remarkably little understood phenomenon of human emergence
