Class, Geopolitics and the Making of Modern International Relations

BENNO TESCHKE

Myth Of 1648

Olaf Asbach, Peter Schröder

Myth Of 1648:

The Myth of 1648 Benno Teschke, 2003 The Treaty of Westphalia in 1648 is widely interpreted as the foundation of modern international relations Benno Teschke exposes this as a myth In the process he provides a fresh re interpretation of the making of modern international relations from the eighth to the eighteenth century Inspired by the groundbreaking historical work of Robert Brenner Teschke argues that social property relations provide the key to unlocking the changing meaning of international across the medieval early modern and modern periods He traces how the long term interaction of class conflict economic development and international rivalry effected the formation of the modern system of states Yet instead of identifying a breakthrough to interstate modernity in the so called long sixteenth century or in the period of intensified geopolitical competition during the seventeenth century Teschke shows that geopolitics remained governed by dynastic and absolutist political communities rooted in feudal property regimes The Myth of 1648 argues that the onset of specifically modern international relations only began with the conjunction of the rise of capitalism and modern state formation in England Thereafter the English model caused the restructuring of the old regimes of the Continent This was a long term process of socially uneven development not completed until World War I The Realist Tradition in **International Relations** Barry Scott Zellen, 2011-08-19 This comprehensive foundation for the study of realism will introduce students in disciplines as varied as philosophy international relations and strategic studies to the majestic breadth of the realist tradition that unifies them all The Realist Tradition in International Relations The Foundations of Western Order introduces the principal theorists who have shaped and defined the realist tradition This once dominant theory of international politics has reemerged to provide a shared foundation for understanding political theory international relations theory and strategic studies The work is comprised of four volumes each focusing upon a distinct period and the pivotal contributors writing in that era Volume 1 State of Hope looks at the classical era when chaos reigned supreme Volume 2 State of Fear goes through the early modern period and the emergence of the modern state Volume 3 State of Awe explores the age of total war with its unprecedented dangers Volume 4 State of Siege examines the present era of insurgency and asymmetrical conflict A truly monumental work this sweeping study will surely foster a new appreciation of the rich tapestry of realist thought and its continuing relevance to the study of world politics The Encyclopedia of Diplomacy, 4 **Volume Set** Gordon Martel, 2018-04-30 The Encyclopedia of Diplomacy is a complete and authoritative 4 volume compendium of the most important events people and terms associated with diplomacy and international relations from ancient times to the present from a global perspective An invaluable resource for anyone interested in diplomacy its history and the relations between states Includes newer areas of scholarship such as the role of non state organizations including the UN and M decins Sans Fronti res and the exercise of soft power as well as issues of globalization and climate change Provides clear concise information on the most important events people and terms associated with diplomacy and

international relations in an A Z format All entries are rigorously peer reviewed to ensure the highest quality of scholarship Provides a platform to introduce unfamiliar terms and concepts to students engaging with the literature of the field for the The Three Ages of International Commercial Arbitration Mikaël Schinazi, 2021-12-16 Drawing on a wide range of previously unpublished sources this unique history of international commercial arbitration in the modern era identifies three periods in its development the Age of Aspirations c 1780 1920 the Age of Institutionalization 1920s 1950s and the Age of Autonomy 1950s present Mika l Schinazi analyzes the key features of each period arguing that the history of international commercial arbitration has oscillated between moments of renewal and anxiety During periods of renewal new approaches instruments and institutions were developed to carry international commercial arbitration forward These developments were then reined in during periods of anxiety for fear that international arbitration might be overstepping its bounds The resulting tension between renewal and anxiety is a key thread running through the evolution of international commercial arbitration This book fills a key gap in the scholarship for anyone interested in the fields of international arbitration legal history and international law **The Birth of Territory** Stuart Elden, 2013-09-09 Political theory professor Stuart Elden explores the history of land ownership and control from the ancient to the modern world in The Birth of Territory Territory is one of the central political concepts of the modern world and indeed functions as the primary way the world is divided and controlled politically Yet territory has not received the critical attention afforded to other crucial concepts such as sovereignty rights and justice While territory continues to matter politically and territorial disputes and arrangements are studied in detail the concept of territory itself is often neglected today Where did the idea of exclusive ownership of a portion of the earth's surface come from and what kinds of complexities are hidden behind that seemingly straightforward definition The Birth of Territory provides a detailed account of the emergence of territory within Western political thought Looking at ancient medieval Renaissance and early modern thought Stuart Elden examines the evolution of the concept of territory from ancient Greece to the seventeenth century to determine how we arrived at our contemporary understanding Elden addresses a range of historical political and literary texts and practices as well as a number of key players historians poets philosophers theologians and secular political theorists and in doing so sheds new light on the way the world came to be ordered and how the earth's surface is divided controlled and administered. The Birth of Territory is an outstanding scholarly achievement a book that already promises to become a classic in geography together with very few others published in the past decades Political Geography An impressive feat of erudition American Historical Review The SAGE Handbook of the History, Philosophy and Sociology of International Relations Andreas Gofas, Inanna Hamati-Ataya, Nicholas Onuf, 2018-07-30 The SAGE Handbook of the History Philosophy and Sociology of International Relations offers a panoramic overview of the broad field of International Relations by integrating three distinct but interrelated foci It retraces the historical development of International Relations IR as a professional field of study explores

the philosophical foundations of IR and interrogates the sociological mechanisms through which scholarship is produced and the field is structured Comprising 38 chapters from both established scholars and an emerging generation of innovative meta theorists and theoretically driven empiricists the handbook fosters discussion of the field from the inside out forcing us to come to grips with the widely held perception that IR is experiencing an existential crisis quite unlike anything else in its hundred year history This timely and innovative reference volume reflects on situated scholarly practices in a way that projects our collective thinking into the future PART ONE THE INWARD GAZE INTRODUCTORY REFLECTIONS PART TWO IMAGINING THE INTERNATIONAL ACKNOWLEDGING THE GLOBAL PART THREE THE SEARCH FOR AN IDENTITY PART FOUR INTERNATIONAL RELATIONS AS A PROFESSION PART FIVE LOOKING AHEAD THE FUTURE OF META ANALYSIS

World Order in Late Antiquity Kevin Blachford, 2024-11-07 The East Romans of Byzantium and the Sasanian Persians competed as geopolitical rivals for over four centuries between 224 to 628 AD Through a series of intractable conflicts these two great empires would develop a dual hierarchy that sought to divide the known world between them Despite competing claims to universal rule mutual spheres of interest arose as both empires sought to create rules norms and standard practices of diplomatic behaviour to regulate their inter imperial rivalry Defined by contemporaries as the Two Eyes of the Earth this suzerain order aimed to hierarchically organize those considered as barbarians This period of late antiquity is rarely considered within the discipline of International Relations IR but through an English School approach Blachford examines the diverse suzerain order of late antiquity as barbarous nomadic tribes challenged the hierarchical ambitions of two rival empires who both claimed a unique role in the maintenance of world order Realism Reconsidered Michael Charles Williams, 2007-11-15 Realism remains the most important and controversial vision of international politics But what does it mean to be a realist This collection addresses this key question by returning to the thinking of perhaps the most influential realist of modern times Hans I Morgenthau In analyses of issues ranging from political philosophy to international law to the impact of nuclear weapons and the challenges of American foreign policy the authors demonstrate that Morgenthau s thinking exemplifies a rich realist tradition that is often lacking in contemporary analyses of international relations and foreign policy At a time when realism is once again at the centre of both scholarly and political debates this book shows that the legacy of classical realism can enrich ourunderstanding of world politics and contribute to its future direction The **Liberal-Welfarist Law of Nations** Emmanuelle Jouannet, 2012-01-26 Although portrayed as a liberal law of co existence of and co operation between states international law has always been a welfarist law too Emerging in eighteenth century Europe it soon won favour globally Not only did it minister to the interests of states and their concern for stability but it was also an interventionist law designed to ensure the happiness and well being of peoples Hence international law initially served as a secularised eschatological model replacing the role of religion in ensuring the proper ordering of mankind which was held to be both one and divided That initial vision still drives our post Cold War globalised world Contemporary

international law is neither a strictly welfarist law nor a strictly liberal law but is in fact a liberal welfarist law In the conjunction of these two purposes lies one of the keys to its meaning and a partial explanation for its continuing ambivalence

Remoteness Reconsidered Christopher Rossi, 2021-07-06 Much of our understanding of the world is framed from the perspective of a dominant power center or from standard readings of historical events. The architecture of international information distribution academic centers and the lingua franca of international scholarly discourse also shape these stories Remoteness Reconsidered employs the idea of remoteness as an analytical tool for viewing international law's encounter with the Americas from the unusual peripheral perspective of the Atacama Desert The Atacama is one of the most remote places on Earth although that less than accurate perspective comes from standard historical accounts of the region accounts that originate from the center Changing the usual frame of reference leads to a reconsideration of the idea of remoteness and of the subsequent marginalization of historical narratives that influence hemispheric international relations in important ways today Lessons about international law s encounters with neoliberalism indigenous and human rights and the management and extraction of mineral resources take on new significance by following a spatial turn toward the idea of remoteness as applied to the Atacama Desert The Roots of International Law / Les fondements du droit international ,2013-11-29 This collection of essays gathers contributions from leading international lawyers from different countries generations and angles with the aim of highlighting the multifaceted history of international law This volume questions and analyses the origins and foundations of the international legal system A particular attention is devoted to Hugo Grotius as one of the founding fathers of the law of nations Several contributions further question the positivist tradition initiated by Vattel and endorsed by scholars of the 19th Century This immersion in the intellectual origins of international law is enriched by an inquiry into the practice of the law of nations including its main patterns and changing evolution as well as the role of non western traditions and the impact of colonization Le pr sent ouvrage r unit les contributions de juristes internationaux reconnus en vue d clairer les multiples facettes de l histoire du droit international public L ouvrage analyse et questionne les origines et les fondements de l'ordre juridique international Une attention toute particuli re est d di e Hugo Grotius l'un des p res fondateurs du droit international D autres contributions questionnent galement la tradition positiviste initi e par Vattel et confort e par la doctrine du 19 me si cle Cette immersion dans les origines doctrinales du syst me juridique international est enrichie par l'tude de la pratique du droit international public son volution ainsi que le r le des traditions non occidentales et l impact de la colonisation The Oxford Handbook of International Studies Pedagogy Heather A. Smith, Mark A. Boyer, David J. Hornsby, 2024 This volume on international studies pedagogy helps us think purposefully about the worlds we teach to our students and it shows us why engaging in reflective practice about how and what we teach matters The Handbook also provides strategies to engage students in a variety of ways to reflect on and engage with the complexities of the world in which we live War, the State and International Law in Seventeenth-Century Europe Olaf Asbach, Peter

Schröder, 2016-02-17 One of the great paradoxes of post medieval Europe is why instead of bringing peace to a disorganised and violent world modernity instead produced a seemingly endless string of conflicts and social upheavals Why was it that the foundation and institutionalisation of secured peace and the rule of law seemed to go hand in hand with the proliferation of war and the violation of individual and collective rights In order to try to better understand such profound questions this volume explores the history and theories of political thought of international relations in the seventeenth century a period in which many of the defining features and boundaries of modern Europe where fixed and codified With the discovery of the New World and the fundamental impact of the Reformation the complexity of international relations increased considerably Reactions to these upheavals resulted in a range of responses intended to address the contradictions and conflicts of the anarchical society of states Alongside the emergence of modern international law the equation of international relations with the state of nature and the development of the balance of power diplomatic procedures and commercial customs arose which shaped the emerging and current international system of states Employing a multidisciplinary approach to address these issues this volume brings together political scientists philosophers historians of political thought jurists and scholars of international relations What emerges is a certain tension between the different strands of research which allows for a fruitful new synthesis In this respect the assembled essays in this volume offer a sophisticated and fresh account of the interactions How the West Came to Rule Alexander of law conflict and the nation state in an early modern European context Anievas, Kerem Nişancıoğlu, 2015-06-20 Winner of International Studies Association ISA's International Political Sociology Best Book Prize for 2017 Winner of British International Studies Association BISA's International Political Economy Working Group Book Prize of 2016 Shortlisted for the ISA Book Prize Mainstream historical accounts of the development of capitalism describe a process which is fundamentally European a system that was born in the mills and factories of England or under the guillotines of the French Revolution In this groundbreaking book a very different story is told How the West Came to Rule offers a interdisciplinary and international historical account of the origins of capitalism It argues that contrary to the dominant wisdom capitalism s origins should not be understood as a development confined to the geographically and culturally sealed borders of Europe but the outcome of a wider array of global processes in which non European societies played a decisive role Through an outline of the uneven histories of Mongolian expansion New World discoveries Ottoman Habsburg rivalry the development of the Asian colonies and bourgeois revolutions Alexander Anievas and Kerem Nisancioglu provide an account of how these diverse events and processes came together to produce capitalism The Oxford Handbook of Jurisdiction in International Law Stephen Allen, Steve Allen, Daniel Costelloe, Malgosia Fitzmaurice, Paul Gragl, Edward Guntrip, 2019 This Handbook provides an authoritative and comprehensive analysis of the concept of jurisdiction in international law The authors undertake a thematic analysis of its history its contemporary application and how it needs to adapt to encompass future developments in international law **Theorizing Medieval Geopolitics** Andrew

Latham, 2012-03-12 Over the past two decades or so medieval geopolitics have come to occupy an increasingly prominent place in the collective imagination and writings of International Relations scholars Although these accounts differ significantly in terms of their respective analytical assumptions theoretical concerns and scholarly contributions they share at least one common arguably defining element a belief that a careful study of medieval geopolitics can help resolve a number of important debates surrounding the nature and dynamics of international relations There are however three generic weaknesses characterizing the extant literature a general failure to examine the existing historiography of medieval geopolitics an inadequate account of the material and ideational forces that create patterns of violent conflict in medieval Latin Christendom and a failure to take seriously the role of religion in the geopolitical relations of medieval Latin Christendom This book seeks to address these shortcomings by providing a theoretically guided and historically sensitive account of the geopolitical relations of medieval Latin Christendom It does this by developing a theoretically informed picture of medieval geopolitics theorizing the medieval to modern transition in a new and fruitful way and suggesting ways in which a systematic analysis of medieval geopolitical relations can actually help to illuminate a range of contemporary geopolitical phenomena Finally it develops an historically sensitive conceptual framework for understanding geopolitical conflict and war The 1713 Peace of Utrecht and its Enduring Effects Alfred H.A. Soons, 2019-12-09 The 1713 Peace of Utrecht and its Enduring Effects edited by Alfred H A Soons presents an interdisciplinary collection of contributions marking the occasion of the tercentenary of the Peace of Utrecht The chapters examine the enduring effects of the Peace Treaties concluded at Utrecht in 1713 from the perspectives of international law history and international relations with cross cutting themes the European Balance of Power the Relationship to Colonial Regimes and Trade Monopolies and Ideas and Ideals the Development of the International Legal Order With contributions by Peter Beeuwkes Stella Ghervas Martti Koskenniemi Randall Lesaffer Paul Meerts Isaac Nakhimovsky Sundhya Pahuja Koen Stapelbroek Benno Teschke Jaap de Wilde The Oxford Handbook of the History of International Law Bardo Fassbender, Anne Peters, Simone Peter, Daniel Högger, 2012-11 This handbook provides an authoritative and original overview of the origins of public international law It analyses the modern history of international law from a global perspective and examines the lives of those who were most responsible for shaping it Myth and Narrative in International Politics Berit Bliesemann de Guevara, 2016-06-13 This book systematically explores how different theoretical concepts of myth can be utilised to interpretively explore contemporary international politics From the international community to warlords from participation to effectiveness international politics is replete with powerful narratives and commonly held beliefs that qualify as myths Rebutting the understanding of myth as lie this collection of essays unearths the ideological naturalising and depoliticising effect of myths Myth and Narrative in International Politics Interpretive Approaches to the Study of IR offers conceptual and methodological guidance on how to make sense of different myth theories and how to employ them in order to explore the powerful collective imaginations and

ambiguities that underpin international politics today Further it assembles case studies of specific myths in different fields of International Relations including warfare global governance interventionism development aid and statebuilding The findings challenge conventional assumptions in International Relations encouraging academics in IR and across a range of different fields and disciplines including development studies global governance studies strategic and military studies intervention and statebuilding studies and peace and conflict studies to rethink ideas that are widely unquestioned by policy and academic communities Routledge Handbook of Historical International Relations Benjamin de Carvalho, Julia Costa Lopez, Halvard Leira, 2021-06-28 This handbook presents a comprehensive concise and accessible overview of the field of Historical International Relations HIR It summarizes and synthesizes existing contributions to the field while presenting central themes approaches and methodologies that have driven the development of HIR providing the reader with a sense of the diversity and research dynamics that are at the heart of this field of study The wide range of topics covered are grouped under the following headings Traditions Demonstrates the wide variety of approaches to HIR Thinking International Relations Historically Different ways of thinking IR historically share some common concerns and areas for further investigation Actors Processes and Institutions Explores the processes actors practices and institutions that constitute the core objects of study of many HIR scholars Situating Historical International Relations Critically reflects about the situatedness of our objects of study Approaches Examines how HIR scholars conduct and reflect about their research often in dialogue with a variety of perspectives from cognate disciplines Summarizing key contributions and trends while also sketching out challenges for future inquiry this is an invaluable resource for students academics and researchers from a range of disciplines particularly International Relations global history political science history sociology anthropology peace studies diplomatic studies security studies international political thought political geography international law
