**Republic** Peter C. Caldwell, 2003-03-27 The introduction of state planning and party dictatorship dramatically altered the environment for social theory in the German Democratic Republic But social thought did not disappear By the mid 1950s East German social theorists discovered the basic contradictions of state socialism that would eventually lead to its collapse the inability of the plan to function without markets and its inability to permit markets the inability of the party state to guarantee the rule of law and yet also the need for a regular system of rules in a modern industrial society and the contradictory philosophical claims of a Marxist Leninist philosophy that rejected idealism and Marxist Leninist dogma with its idealistic claim to know the laws of social modernization Making use of archival sources Caldwell examines the articulation of these analyses their subsequent suppression by party authorities in the late 1950s and their return under the guise of cybernetics in the 1960s      Public Administration in the New Reality Alikhan Baimenov, Panos Liverakos, 2025-04-30

### **Russia's Response to Sanctions**

Richard Connolly,2018-07-05 In the first in depth analysis of the effects of sanctions on the Russian political economy Richard Connolly details the Western sanctions targeting the energy defense and financial sectors and the Russian response He explores how the Western sanctions have caused Russian officials to formulate rapid policy responses to enable the country to adapt to the new circumstances The sanctions and the Russian response have caused the state s role in the Russian economy to grow stronger and caused its policymakers to accelerate efforts to shift Russia s foreign economic relations away from the West and toward Asia Connolly analyzes how the political economy in Russia and the nature of the country s integration with the global economy have been fundamentally reshaped He demonstrates that a new system of political economy is emerging in Russia and how it is crucial to understanding Russia s future trajectory *Wassily Leontief* John Cunningham Wood,Michael McLure,2001 From Dreams to Disillusionment Glen O'Hara,2006-11-14 From Dreams to Disillusionment is the first book to cover the planning experiment of the 1960s in full historical detail Other countries planners made the approach seem successful however the experiment eventually failed doomed to disappoint given unrealistic expectations lack of time and an overburdened government *Alienation Effects* Branislav Jakovljevic,2016-06-13 In the 1970s Yugoslavia emerged as a dynamic environment for conceptual and performance art At the same time it pursued its own form of political economy of socialist self management Alienation Effects argues that a deep

relationship existed between the democratization of the arts and industrial democracy resulting in a culture difficult to classify The book challenges the assumption that the art emerging in Eastern Europe before 1989 was either official or dissident art and shows that the break up of Yugoslavia was not a result of ancient hatreds among its peoples but instead came from the distortion and defeat of the idea of self management The case studies include mass performances organized during state holidays proto performance art such as the 1954 production of Waiting for Godot in a former concentration camp in Belgrade student demonstrations in 1968 and body art pieces by Gina Pane Joseph Beuys Marina Abramovic and others Alienation Effects sheds new light on the work of well known artists and scholars including early experimental poetry by Slavo j i ek as well as performance and conceptual artists that deserve wider international attention

**Principled World Politics** Richard A. Falk, 2000 On normative international relations The Political Economy of Russia Neil Robinson, 2012-07-30 This timely book explores Russia s political development since the collapse of the USSR and how inextricably it has been bound up with economic change Assessing the legacies of the Soviet period leading scholars trace the evolution of Russia s political economy and how it may develop as bitter battles continue to be waged over property and state revenues the development of private agriculture and welfare This book puts these domestic issues in international and comparative perspective by considering Russia s position in the global economy and its growing role as a major energy producer Focusing especially on the nature and future of Russian capitalism the contributors weigh the political problems that confront Russia in its ongoing struggle to modernize and develop its economy Dysfunctional Bureaucracy Bogdan Mieczkowski, 1991 This book examines dysborgs dysfunctional bureaucratic organizations through the establishment of a theory of the dysborg and some of its theoretical antecedents the study of conditions under which dysborgian elements recede in favor of functional bureaucracy the reformulation of a theory of bureaucracy in academia a study of the politics of bureaucracy in command economies and an inquiry into the existence of convergence and divergence in the operation of the institution of bureaucracy in the East and West Contents The Theory of Dysfunctional Bureaucratic Organizations Ibn Khaldun s Fourteenth Century Views on Bureaucracy The Bureaucratic East West Synthesis Bureaucracy Politics and Economics in Command Economies The Bureaucratic Syndrome in Academia An Analysis of the Uniqueness of the Japanese Public and Private Bureaucracy

**Capitalism and Class Struggle in the USSR** Neil C. Fernandez, 2018-12-14 First published in 1997 this was the first Autonomist Marxist book on the USSR The various theories of Soviet capitalism are considered more comprehensively than in any previous work and are shown to be inadequate insofar as they fail to demonstrate satisfactorily the predominance of the category of capital A powerful new theory is developed which does precisely this introducing the concepts of bureaucratic forms of both exchange value and money This constitutes an important contribution to the overall theoretical critique of capital Attention is then turned to the class struggle For the first time the various Marxist theories of the USSR are systematically considered in relation to what they say about the working

class and its struggle      *The Political Economy of Dictatorship* Ronald Wintrobe, 2000-09-25 Although much of the world still lives today as always under dictatorship the behaviour of these regimes and of their leaders often appears irrational and mysterious In *The Political Economy of Dictatorship* Ronald Wintrobe uses rational choice theory to model dictatorships their strategies for accumulating power the constraints on their behavior and why they are often more popular than is commonly accepted The book explores both the politics and the economics of dictatorships and the interaction between them The questions addressed include What determines the repressiveness of a regime Can political authoritarianism be good for the economy After the fall who should be held responsible for crimes against human rights The book contains many applications including chapters on Nazi Germany Soviet Communism South Africa under apartheid the ancient Roman Empire and Pinochet's Chile It also provides a guide to the policies which should be followed by the democracies towards dictatorships

*Conversations with Tocqueville* Aurelian Craiutu, Sheldon Gellar, 2009-02-16 The questions and issues raised by Tocqueville in his monumental studies of France and America are just as crucial for understanding the evolution of democracy in the West and the development of democracy in the non western world They clearly show the breadth of Tocqueville's contributions to the development of modern social sciences Among the questions addressed by Tocqueville were How does the weight of the past affect the evolution of political institutions and political behavior What impact do differences in physical environment have on the organization of society What are the relationships between social equality freedom and democracy To what extent does centralization destroy the capacity for local initiative and self governance What conditions are needed to nurture the flourishing of self governing communities What safeguards are needed to preserve freedom and to prevent incipient democracies from becoming dictatorships Why has democracy had such a problem taking hold in many parts of the non western world How should one study democracy in non western settings Tocquevillian analytics can help us provide answers Addressed to a wider audience than Tocqueville scholars the book argues that Tocquevillian analytics can be used to understand developments in non western as well as western societies and be updated to address such issues as globalization ethnicity New World Old World comparisons and East West dynamics The first part of the book examines the basic components of Tocquevillian analytics outlining its stepwise interdisciplinary approach to understanding societies and nations The second part applies the Tocquevillian conceptual framework to the contemporary world and contains individual chapters on various regions of the world North America Russia Western Europe Asia Africa and Latin America Unlike previous collective works on Tocqueville *Conversations with Tocqueville* does not offer a survey of the authors views but instead focuses on presenting a cohesive      **State and Society in Communist Czechoslovakia** Roman Krakovsky, 2018-05-30 Across central and eastern Europe after World War II the newly established communist regimes promised a drastic social revolution that would transform the world at great pace and pave the way to a socialist future Although many aspects of this utopian project are well known such as fast paced industrialisation collectivisation and

urbanisation the regimes even sought to transform the ways in which their citizens interacted with each other and the world around them Using a unique analytical model based on an amalgam of anthropology sociology history and extensive archival research award winning scholar Roman Krakovsky here considers the Czechoslovakian attempt to reinvent the world time and space included in this all encompassing way Ranging from WWII to the fall of the Berlin Wall his innovative analysis variously considers the impact of Stakhanovism the impossible to achieve production targets intended to assert socialism s future potential the attempt to replace Sunday s Christian attributes with socialist ones and the profound changes brought about to the public and private spheres including the culture of informing and the ways this was circumvented Across a wide range of case studies Krakovsky demonstrates both the far reaching extent of the communist vision and the inherent flaws and contradictions that gradually destabilised it This in depth perspective is vital reading for all scholars of twentieth century history and politics

Economic Reform and Third-World Socialism Peter Utting, 1992-06-24 Throughout the 1980s major changes in development policy took place in several Third World socialist countries This book examines why this shift from orthodoxy to reform occurred in Mozambique Vietnam and Nicaragua as well as in Cuba during the early 1980s It provides an in depth analysis of the changes which took place in economic and food policy and the nature of the crisis which prompted the reforms It focuses particularly on the role of social forces in shaping the reform process

**How the Soviet Union Disappeared** Wisła Suraska, 1998 Argues that the collapse of the Soviet Union was the result of an attempt by Gorbachev to concentrate political power and that the breakdown of the economy was a consequence not a cause of his reforms

**Local Environmental Regulation in Post-Socialism: A Hungarian Case Study** Chris G. Pickvance, 2024-11-01 This title was first published in 2003 This text examines Hungarian local environmental regulation in practice rather than what should happen according to national legislation The book is based on interviews with officials regulators firm managers and environmental groups in four localities in Hungary and on a national survey of local government officials Numerous quotations from interviews are included It is shown that the local social and economic context influences the behaviour of both local governments and regional environmental inspectorates Firms responsiveness to regulation is studied and it is shown that while some firms are ready to pay moderate environmental fines others are afraid of even symbolic fines The findings are set within debates in the international literature on environmental regulation It is shown that there are convergences with patterns reported in developed capitalist societies but that certain legacies from state socialism are compatible with these patterns
