Mythical Trickster Figures William J. Hynes, William G. Doty, 1997-01-30 Mythical Trickster Figures is the first substantial collection of essays about the trickster to appear since Radin's 1955 *The Trickster Contributions* by leading scholars treat a wide range of manifestations of this mischievous character ranging from the Coyote of the American Southwest to such African figures as Eshu Elegba and Ananse the Japanese Susano-o the Greek Hermes Christian adaptations of Saint Peter and examples found in contemporary American fiction and drama The many humorous trickster stories included are fascinating in themselves but Hynes and Doty also highlight the wide range of features of the trickster the figure whose comic appearance often signifies that the most serious cultural values are being both challenged and enforced William J Hynes is Vice President for Academic Affairs and Professor of Religious Studies at Saint Mary's College of California William G Doty is Professor of Religious Studies at The University of Alabama and the author of *Mythography The Study of Myths and Rituals* also published by The University of Alabama Press

Monsters of Contact Mark van de Logt, 2018-06-21 A murderous whirlwind an evil child abducting witch woman a masked cannibal terrifying scalped men a mysterious man slaying flint creature the oral tradition of the Caddoan Indians is alive with monsters Whereas Western historical methods and interpretations relegate such beings to the realms of myth and fantasy Mark van de Logt argues in *Monsters of Contact* that creatures found in the stories of the Caddos Wichitas Pawnees and Arikaras actually embody specific historical events and the negative effects of European contact invasion war death disease enslavement starvation and colonialism Van de Logt examines specific sites of historical interaction between American Indians and Europeans from the outbreaks and effect of smallpox epidemics on the Arikaras to the violence and enslavement Caddos faced at the hands of Hernando de Soto's expedition and Wichita encounters with Spanish missionaries and French traders in Texas In each case he explains how through Indian metaphor seemingly unrelated stories of supernatural beings and occurrences translate into real people and events that figure prominently in western U S history The result is a peeling away of layers of cultural values that for those invested in Western historical traditions otherwise obscure the meaning of such tales and their monsters Although Western historical methods have become the standard in much of the world van de Logt demonstrates that indigenous forms of history are no less valuable and that oral traditions and myths can be useful sources of historical information A daring interpretation of Caddoan lore *Monsters of Contact* puts oral traditions at the center of historical inquiry and in so doing asks us to reconsider what makes a monster

Anthropology and Cryptozoology Samantha Hurn, 2016-11-03 Cryptozoology is best understood as the study of animals which in the eyes of Western science are extinct unclassified or unrecognised In consequence and in part because of its selective methods and lack of epistemological rigour cryptozoology is often dismissed as a pseudo science However there is a growing recognition that social science can benefit from engaging with it for as social scientists are very well aware scientific categorisation and explanation represents just one of a myriad of systems used

by humans to enable them to classify and make sense of the world around them In many cultural contexts myth folk classification and lived experience challenge the truth expounded by scientists With a reflexive anthropological approach and drawing on rich empirical and ethnographic studies from around the world this volume engages with the theoretical and methodological issues raised by reported sightings of unrecognised animals Bringing into sharp focus the anthropological value and challenges for methodology posed by beliefs about unclassified creatures Anthropology and Cryptozoology Exploring encounters with mysterious creatures will be of interest to anthropologists sociologists and geographers working in the fields of research methods anthrozoology mythology and folklore and human animal interaction **The Trickster**

and the System Helena Bassil-Morozow, 2014-09-25 For centuries the trickster has been used in various narratives including mythological literary and cinematic to convey the idea of agency rebellion and often turbulent progress In *The Trickster and the System Identity and Agency in Contemporary Society* Helena Bassil Morozow shows how the trickster can be seen as a metaphor to describe the psycho anthropological concept of change an impulse that challenges the existing order of things a progressive force that is a structural and anti structural in its nature The book is about being able to see things from an unusual even odd perspective which does not coincide with the homogenous normality of the mass or the social system or a political ideology or some other kind of authority *The Trickster and the System* offers an analytical paradigm which can be used to examine relationships between tricksters and systems change and stability in a wide range of social political and cultural contexts It covers a range of systems describes different types of tricksters and discusses possible conflicts tensions and dialogues between the two opposing sides One of the central ideas of the book is that social systems use shame as a tool to control and manage all kinds of tricksters individuality agency creativity spontaneity innovation and initiative to name but a few The author argues that any society that neglects its tricksters agents of change ends up suffering from decay stagnation or even mass hysterical outbursts *The Trickster and the System Identity and Agency in Contemporary Society* provides a fresh perspective on the trickster figure in a variety of cultural contexts It covers a range of psychological cultural social and political phenomena from personal issues to the highest level of society s functioning self esteem and shame lifestyle and relationships creativity and self expression media advertising economy political ideology and most importantly human identity and authenticity The book is essential reading for scholars in the areas of psychoanalysis analytical psychology myth cultural and media studies narrative analysis cultural anthropology as well as anyone interested in critical issues in contemporary culture Helena Bassil Morozow is a cultural philosopher film scholar and academic writer whose many publications include *Tim Burton The Monster and the Crowd* Routledge 2010 and *The Trickster in Contemporary Film* Routledge 2011 Helena is currently working on another Routledge project *Jungian Film Studies the Essential Guide* co authored with Luke Hockley Her principal academic affiliation is the University of Bedfordshire Faculty of Creative Arts Technologies Science [Greek Vase-Painting and the Origins of Visual Humour](#) Alexandre G. Beyond Liminality Jack David Eller, 2024-07-08 *Beyond Liminality Ontologies of Abundant Betweenness* examines the concept of liminality in the social sciences and humanities and advocates for a more critical use of the concept while offering more precise alternatives Originally conceived in response to the near universal ritualization of changes of status i.e. rites of passage liminality was a welcome and much needed correction to the reigning static and structural models of culture at the time However it soon escaped its initial realm and was enthusiastically and mostly uncritically absorbed by many if not all scholarly disciplines The very success of the concept suggests that there is something about it that resonates with our own cultural sentiments However the assumptions that underlie diagnoses of liminality are seldom noted and even more seldom analyzed and critiqued This book examines the history of the concept its evolution and its current status and asks whether liminality accurately reflects lived realities which might better be described by fluidity hybridity multiplicity constant motion and recombination and abundant betweenness *Beyond Liminality Ontologies of Abundant Betweenness* is key reading for
