Sound and Communication Annette Wilke,Oliver Moebus,2011-01-28 In Hindu India both orality and sonality have enjoyed great cultural significance since earliest times They have a distinct influence on how people approach texts The importance of sound and its perception has led to rites models of cosmic order and abstract formulas Sound serves both to stimulate religious feelings and to give them a sensory form Starting from the perception and

interpretation of sound the authors chart an unorthodox cultural history of India turning their attention to an important but often neglected aspect of daily religious life They provide a stimulating contribution to the study of cultural systems of perception that also adds new aspects to the debate on orality and literacy The audio samples originally included to the book as a music CD can be downloaded from this website under Supplementary Materials

The Whole Elephant Revealed Marja de Vries, 2012-05-25 The Whole Elephant Revealed offers clear insights into the existence and operation of universal laws and the golden ratio It is a synthesis based on common insights found in all wisdom traditions into the operation of universal laws on the one hand and on cutting edge scientific discoveries that are in line with those insights on the other hand These principles are called universal because they work on all levels of existence apply to everything that exist and create order and harmony in the universe Insights into the operation of the universal laws reveals a whole new worldview It helps us to understand how everything works in the universe who we really are and how we can make conscious choices that are more in line with these universal laws Above all it helps us to understand what works and what doesn't work in the long term Everything that operates in line with the universal laws follows the path of least resistance and is in harmony with the greater whole It makes us realize that while everything in the universe works in harmony with these principles many aspects of our personal life and our Western culture are not in line with the operation of these underlying principles If we choose to act in line with the operation of the universal laws it will go easier will be more in tune with who we really are and more in harmony with the greater whole This choice is hard to make though if we don't know those principles For that reason the rediscovery of the working of these principles seems to be of extreme importance In this time of great changes and global unbalance a growing number of people begin to feel the need for a clear and well founded insight into the universal laws because this gives an understanding of what is needed to restore the balance and harmony in ourselves as well as worldwide Because the nature of these principles is universal they apply to all aspects of our individual and social life Therefore they can be used as a frame of reference for all personal and social transformations which aim at a greater harmony within ourselves and with the greater whole

TRACTATUS LOGO-PHILOSOPHICUS Walter A. Koch,2009 A new form of Protophysics discerns clues to a deeper form of reality it lies before after beyond and within the more familiar universe which is described by mainstream physics Tractatus is a philosophic approach it tries to give the preliminary outlines for a corresponding Philosophy in a New Key It delineates an infinite megaverse which seems weird at first sight and comforting at the same time Seemingly incompatible realms of experience such as The Structure of the Megaverse The Frames for Unfolding and Evolution The Role of Cognition and Emotion in the Universe The Universality of Love The Reality of Prayer and God The Roots of Logic and Logos fall into place they appear to join in a harmonious whole The New Philosophy relies on biperspectivism as the deepest structure in the Megaverse and in the human mind Biperspectivism has many forms and names Energy vs Information is one of them Schopenhauer s Wille und Vorstellung is but an echo of it all In the view of this philosophy a New Physics spontaneously begets a new METAphysics Human and the effect of his soul Andreas Wolf von Guggenberger,2023-06-12 Human and the effect of his soul Man and the effect of his soul Andreas Wolf von Guggenberger creates a fascinating model of creation soul spirit and body in his new work With it he deepens his work Evolution of Creation and the Soul As a short introduction he presents his idea of a possible origin of creation and at the same time describes how the souls could have arisen in it He then describes the inner levels of the human being From the dynamics between the souls and the creation he outlines the model of the spirit Spiralling upwards viewed from ever new angles he describes the following levels of the soul Spiritual levels of perception Higher Self evolutionary level personality ME and Ego mask defensive and protective attitudes of the EGOS and the transformation of ME and Ego This is followed by the physical and mental drive systems with an expanded body model He shows how self forgiveness can help to dissolve feelings of guilt fear inferiority and power Psychoanalytical brain neurological evolutionary and religious approaches merge naturally From the perspective of the soul he elaborates completely new perspectives and connections The author breaks away from conventional models of thought and creates something fascinatingly new He has taken the basic ideas of his book from his main work Evolution of Creation and the Soul In his main work he describes the background very extensively and in detail His two books are very personal works They are the result of personal introspection research and a journey of knowledge Therefore the author did not initially think of publishing them In his works he relies on his own inner visions which is why his concepts differ from those of other psychologists philosophers and religious thinkers *The Autopilot in NetzwerkMensch* Ori Wolff,2023 The book The

Autopilot in NetzwerkMensch was published in 2020 as the third book in the NetzwerkMensch series in the German language. Now we are publishing the English version. The Autopilot in NetzwerkMensch presents the physiology of NetzwerkMensch with scientific principles and tips for everyday life. It shows the holistic basics of human health with the motoric and the metabolic Autopilot as well as the Autopilot of thoughts and feelings. The polyvagal vegetative nervous system with its three circuits of regulation describes the main part of the Autopilot. We act according to our perception of fear, life threat and security. The vegetative polyvagal nervous system connects our body and mind with the world around us using fast and slow thinking. This perspective helps us to better understand our individual health situation and also to connect us to our inner peace. As a result we may develop a fellow human consciousness. With the awareness of our biological body we can live a natural life naturally.

Aesthetics of Religion Alexandra K. Grieser, Jay Johnston, 2017-12-18. This volume is the first English language presentation of the innovative approaches developed in the aesthetics of religion. The chapters present diverse material and detailed analysis on descriptive methodological and theoretical concepts that together explore the potential of an aesthetic approach for investigating religion as a sensory and mediated practice. In dialogue with yet different from other major movements in the field, material culture anthropology of the senses, for instance, it is the specific intent of this approach to create a framework for understanding the interplay between sensory, cognitive and socio-cultural aspects of world construction. The volume demonstrates that aesthetics as a theory of sensory knowledge offers an elaborate repertoire of concepts that can help to understand religious traditions. These approaches take into account contemporary developments in scientific theories of perception, neuro-aesthetics and cultural studies, highlighting the socio-cultural and political context informing how humans perceive themselves and the world around them. Developing since the 1990s, the aesthetic approach has responded to debates in the study of religion, in particular striving to overcome biased categories that confined religion either to texts and abstract beliefs or to an indisputable *sui generis* mode of experience. This volume documents what has been achieved to date, its significance for the study of religion and for interdisciplinary scholarship.

Sonic Time Machines Wolfgang Ernst, 2025-10-01 Our studies of aesthetics and knowledge have long tended to privilege the visual at the expense of the aural. *Sonic Time Machines* aims to correct that by presenting a striking new approach to theorising sound that investigates its split existence as a temporal effect in a techno-cultural context and as a source of knowledge and information. Ernst creates a new term for the concept at the heart of the book: *sonicity*, a flexible and powerful term that allows him to consider sound with all its many physical, philosophical and cultural valences. *Exact Methods in the Study of Language and Text* Peter Grzybek, Reinhard Köhler, 2011-12-22 The collection contains more than 60 original papers and reflects current research topics in linguistics and text analysis. Most of the papers present recent results of empirical quantitative investigations; others focus on methodological issues, whereas some of them are of a more theoretical, systems-theoretical, semiotic character. Finally, a number of contributions form typical integrative, deductive, inductive studies. The volume is a valuable source of information about the current state of the art in quantitative linguistic research presented by renowned representatives of the field. Speech, Music, Sound Theo van Leeuwen, 1999-08-23 This book explores what speech, music and other sounds have in common. It gives a detailed description of the way perspective, rhythm, textual quality and other aspects of sound are used to communicate emotion and meaning. It draws on a wealth of examples from radio, disk jockey and newsreading speech, radio plays, advertising jingles, news signature tunes, film soundtracks, The Piano, The X-Files, Disney animation films, music ranging from medieval plain chant to drum n bass and everyday soundscapes.
