Objective: Current evidence on the associations between plasma thyroid stimulating hormone and *Helicobacter pylori* infection is conflicting. Therefore, our study aimed to examine TSH in relation to *H. pylori* infection.

Methods: Based on the US National Health and Nutrition Examination Survey (NHANES) 1999–2000, a cross-sectional study was conducted with 948 participants aged 30 to 85 years. The associations between *H. pylori* seropositivity and TSH were evaluated using binary logistic regression models. A subgroup analysis stratified by sex, age, and body mass index was conducted.

Results: A higher serum TSH level was found in subjects with *H. pylori* seropositive than in subjects with *H. pylori* seronegative. A significant positive association was found between *H. pylori* seropositivity and TSH with increasing quartiles of hormonal levels in univariate regression models (Q4 vs Q1: OR = 1.659; 95% CI, 1.152–2.389) and in multivariate regression models (Q4 vs Q1: OR = 1.604; 95% CI, 1.087–2.367). In stratified analyses, the adjusted association of serum TSH with *H. pylori* seropositivity was statistically significant in male (Q4 vs Q1: OR = 1.894; 95% CI, 1.109–3.235), normal BMI (Q4 vs Q1: OR = 1.894; 95% CI, 1.109–3.235), overweight (Q4 vs Q1: OR = 2.124; 95% CI, 1.047–4.308), obese (Q4 vs Q1: OR = 0.429; 95% CI, 0.220–0.837), and age over 60 years (Q4 vs Q1: OR = 1.999; 95% CI, 1.118–3.575).

Conclusion: High TSH levels were associated with *H. pylori* infection, especially among male, overweight and elderly adults.

It's All about Nutrition David Bissonnette, 2014-07-01 It's All about Nutrition is an introductory textbook designed specifically to capture the interest of general education students in nutrition. Students will want to read this textbook in its entirety as David Bissonnette draws them into a more thoughtful study of the field of nutrition. He paints a backdrop describing the origins of our current dietary practices, nutrition within the history of human health, the emergence of the science of nutrition, the history of the U.S. food industry and the prevalence of malnutrition in the United States during the 1930s. Within these historical contexts, *It's All about Nutrition* describes vitamin and mineral deficiencies, the obesity epidemic, family nutrition, chronic disease and world hunger to offer readers a comprehensive look at the field of nutrition in the United States.

Child Nutrition and WIC Programs Joe

Richardson, Donna Viola Porter, Jean Yavis Jones, 2004 About a dozen federally supported child nutrition programs and related activities including the Special Supplemental Nutrition Program for Women Infants and Children the WIC program reach over 36 million children and almost 2 million lower income pregnant and postpartum women The School Lunch and School Breakfast programs provide cash subsidies to participating schools and residential child care institutions RCCIs for all meals they serve larger subsidies are granted for free and reduced price meals served to lower income children The Child and Adult Care Food Program CACFP subsidises meals and snacks served by child care centres and day care homes in centres higher subsidies are given for meals snacks served to lower income children while subsidies for homes generally are not varied by children s family income but are larger for homes in lower income areas or operated by lower income providers Schools RCCIs and other public and private non profit organisations operating programs for children also can receive subsidies for snacks and in some cases meals served in after school and other outside of school settings The Summer Food Service Program subsidises food service operations by public and private non profit sponsors in lower income areas during the summer all meals snacks they serve are subsidised generally without regard to individual children s family income The Special Milk Program operates in schools and RCCIs without a lunch program and subsidises all milk they serve All these subsidies are inflation indexed and are paid only where the subsidised meals snacks meet federal nutrition standards In addition to cash aid many providers receive food commodities from the Agriculture Department at a set value per meal and may receive bonus commodities from stocks acquired for agricultural support purposes Grants also are made to help cover state administrative expenses And the WIC program provides nutrition services and tailored food packages to lower income pregnant breastfeeding and postpartum women infants and children who are judged to be at nutritional risk Other significant federal programs activities include a WIC farmers market nutrition program support for a Food Service Management Institute and initiatives to improve meal quality food service and safety

Preventive Nutrition Adrienne Bendich, Richard

J. Deckelbaum, 2001-03-06 Nutrition has been recognized as a major determinant of health for centuries. Traditionally, nutritional sciences have primarily targeted the prevention of diseases resulting from clinical deficiencies of essential nutrients such as scurvy and rickets. Contemporary nutritional research has focused on the prevention of major diseases of Western civilization, particularly cardiovascular disease and cancer, as well as promoting maternal and child health and healthy aging. Heart disease and cancer, which were rare in most developing countries several decades ago, are increasing dramatically in these countries in parallel with economic development and dietary transitions. Decreases in infectious diseases and increasing sedentary lifestyle and obesity. Substantial evidence indicates major chronic diseases such as coronary heart disease, type 2 diabetes, and some cancers are largely preventable by relatively simple diet and lifestyle modifications. Despite the great potential of nutrition in preventing diseases and improving health, nutrition is not routinely emphasized in the education and training of physicians and other health care professionals. This has resulted in inadequate nutritional knowledge and lack of skills in providing dietary counseling among many health care professionals. Furthermore, in the past decade, the public's access to nutritional information has been increasing rapidly, particularly through the Internet. There are now hundreds of websites providing a wide range of nutritional information and selling numerous dietary products. Because of the explosion in nutritional information, the public's demand for nutritional advice has been increasing rapidly and will continue to rise.

Public Health Nutrition Natalie Stein, 2014-03-13 Issues related to nutrition are among the most pressing public health concerns in modern times. Worldwide malnutrition affects nearly 1 billion individuals or more than one in seven people. Many protein-energy malnutrition and micronutrient deficiencies play roles in more than half of all childhood deaths. Effects of malnutrition include mortality, decreased economic productivity, morbidities such as blindness and stunting, and development of chronic diseases. With a unique focus on Global Health, this book is a comprehensive introduction to Public Health Nutrition. Designed for MPH programs, this book will prepare students to become successful global public health professionals with a clear understanding of the critical need for public health nutrition programs around the globe. Unlike other texts of its kind, *Public Health Nutrition: Principles and Practice for Community and Global Health* offers a unique focus on nutrients. Readers will come away with a solid understanding of the specific roles of nutrients, including macronutrients and the most relevant micronutrients, enabling them to be more effective in improving public health nutrition. With 19 chapters divided into 6 parts, this book covers Nutrition around the World, Policy and Public Health Nutrition, Hunger and Malnutrition, Maternal and Child Nutrition, Nutritional Scenarios in Developing Nations, Nutrition and the Environment.
