climate action in Zimbabwe Food and Agriculture Organization of the United Nations, Svinurai, W.; Masunda, B.; Ayabagabo, J.D.D; Cabeza, I.L; Kachidza, F.; Kamana, R.; Reppin, S.; Rulli, M.; Uwizeye, A., 2025-04-25. Zimbabwe is advancing climate change adaptation in its livestock sector with key strategies reflected in both its initial and updated nationally determined contributions NDCs. Although various climate smart practices are already being implemented through livestock support programs, their contributions to adaptation and mitigation remain largely undocumented, resulting in their omission from the NDCs. To address this, the Department of Livestock Research has introduced a Tier 2 greenhouse gas GHG inventory for cattle, allowing for more accurate assessments of mitigation potential and informing the 2025 NDC update. This report brings together insights from literature reviews, policy analysis, and stakeholder consultations to evaluate the current policy landscape for livestock-related climate action. It highlights the sector's growing vulnerability to climate change, including feed scarcity, disease outbreaks, and declining productivity. The report identifies key policy gaps and stresses the importance of capacity building, data-driven planning, and inclusive engagement to enhance climate resilience and reduce emissions in the livestock sector.
