Managing Radio is the first detailed and comprehensive practical guide to all the essential elements of managing radio stations. It covers the management of public service commercial and community radio stations and the wide range of new DAB online web and independent production opportunities. A useful text for students studying the theory and practice of managing radio, it is also an authoritative guide to setting up a station or radio service from scratch. It explores how to create sustainable radio through managing for profit, public service or the participation of the audience in all parts of the station. Managing Radio provides useful practical advice, examples of contemporary radio management practices and case studies of management in action, backed up with references to wider academic reading in media business and cultural studies.

**Federal Register**, 1995-02      **5G Mobile Communications** Wei Xiang, Kan Zheng, Xuemin (Sherman) Shen, 2016-10-13. This book provides a comprehensive overview of the emerging technologies for next generation 5G mobile communications with insights into the long term future of 5G. Written by international leading experts on the subject, this contributed volume covers a wide range of technologies, research results and networking methods. Key enabling technologies for 5G systems include but are not limited to millimeter wave communications, massive MIMO technology and non-orthogonal multiple access. 5G will herald an even greater rise in the prominence of mobile access based upon both human-centric and machine-centric networks. Compared with existing 4G communications systems, unprecedented numbers of smart and heterogeneous wireless devices will be accessing future 5G mobile systems. As a result, a new paradigm shift is required to deal with challenges on explosively growing requirements in mobile data traffic volume (1000x number of connected devices), 10-100x typical end-user data rate, 10-100x and device network lifetime, 10x. Achieving these ambitious goals calls for revolutionary candidate technologies in future 5G mobile systems. Designed for researchers and professionals involved with networks and communication systems, **5G Mobile Communications** is a straightforward, easy-to-read analysis of the possibilities of 5G systems.      **Radio Station Management.
