**Atomic and Nuclear Clusters** G.S. Anagnostatos, W.v. Oertzen, 2012-12-06 The Second International Conference on Atomic and Nuclear Clusters 93 was organized in a joint effort by the Demokritos National Center for Scientific Research G S Anagnostatos representing the atomic physics and the Hahn Meitner Institut W von Oertzen representing the nuclear physics The subject of clusters small aggregates of particles is a topic of primary interest in both atomic and nuclear physics and also in other fields like in the case of quark structure of baryons and in cosmology The interplay between atomic and nuclear physics is a particularly fascinating one because many concepts are common to both fields quantal effects shells geometric structures collective modes fission etc This conference was the second after the first one organized by Professor M Brenner in Abo Finland in 1991 The general atmosphere of a joint forum for atomic and nuclear physicists was very fruitful and thus the decision to have a sequence of such meetings has been taken A third one is planned in St Petersburg Russia with Professor K Gridnev St Petersburg and Mme Professor C Bnkhignac Orsay as Chairpersons The conference site Fin on Santorini island Greece was a wonderful choice for a conference It is small which helps to keep people concentrated in a

smaller community it has a perfect convention center the P Nomikos Conference Center and a very beautiful landscape formed by a large volcanic crater      Proceedings of the First International Workshop on Physics of Unstable Nuclear Beams International Workshop on Physics of Unstable Nuclear Beams 1996, Serra Negra, Brazil, Carlos A. Bertulani, 1997 In this volume the structure and reactions of radioactive nuclei are described The relevance of halo nuclei to nuclear astrophysics is stressed in different contributions Other topics included are three body aspects of light neutron rich nuclei elastic scattering charge exchange and Coulomb excitation fragment moment distribution mass at half life measurement and electromagnetism induced fission      **Experimental Techniques in Nuclear Physics** Dorin N. Poenaru, Walter Greiner, 2011-09-12 No detailed description available for Experimental Techniques in Nuclear Physics      **Nuclei in the Cosmos** F Kappeler, K Wisshak, 2020-11-25 Nuclei in the Cosmos a volume of conference papers gathers together astronomers astrophysicists and nuclear physicists for a thorough discussion of nucleosynthesis its role in the evolution of the universe and its intriguing possibilities as a diagnostic tool for stellar interiors Nineteen invited papers provide a solid review of nucleosynthesis topics and approximately another 70 papers bring you up to date on the forefront of research in this quickly developing area

**Probing The Nuclear Paradigm With Heavy Ion Reactions - Proceedings Of The International School Of Heavy Ion Physics** Ricardo Americo Broglia, P Kienle, P F Bortignon, 1995-02-22 Major developments have taken place during the last few years in the study of the nuclear paradigm as a result of recent detector and accelerator developments and of improved theoretical models The active use of 4 detectors to measure the gamma decay of excited nuclei has been instrumental in exploring the consequences of extremely high rotational frequencies and excitation energies in the nuclear structure The identification of superdeformed bands of limiting temperature for the detection of giant resonances and of rotational damping are conspicuous examples of this novel type of research Studies of the disassembling of the nucleus have been systematically carried out and the results interpreted in terms of transport models At even higher temperatures one expects to have a completely new regime of hot dense matter where the hadronic properties become strongly renormalized by the medium Furthermore studies of the properties of the nucleon as a many body system of quarks and gluons displaying collective degrees of freedom which are damped by couplings to more complicated states are providing a detailed and consistent picture of the nuclear paradigm Important progress is also taking place in situations essentially opposite to the scenarios described above namely in the study of correlations in nuclear matter at very low temperature and density      **New Frontiers In Nuclear Physics - Lecture Notes Of Jsps-ins International Spring School** S Homma, M Wada, Yoshinori Akaishi, 1994-06-09      *Variations On Nuclear Themes: A Symposium Held In Honor Of Stanley S Hanna* Calvin M Class, L Cohen, 1994-09-19 Papers delivered during this Symposium are augmented by invited contributions covering a wide range of subjects both experimental and theoretical Topics include low and medium energy nuclear physics nucleon structure and reaction theory nuclear models polarization studies electromagnetic moments applications in astrophysics atomic surface and

condensed matter physics      *International Workshop on the Physics and Techniques of Secondary Nuclear Beams* J. F. Bruandet, Bernard Fernandez, Monique Bex, 1992      Heavy Ion Physics: Proceedings Of The Vi International School-seminar Rumiana Kalpakchieva, Yu Ts Oganessian, 1998-08-22 This book presents recent results on experimental and theoretical studies of the interaction of heavy ions with nuclei at low and intermediate energies the dynamics of fusion and decay of complex nuclear systems the synthesis of superheavy elements the synthesis and properties of exotic nuclei close to the proton and neutron driplines nuclear fission nuclear structure and reactions with stable and radioactive ion beams It also covers some aspects of applied physics research track membranes and their applications the use of polymers in medicine and electronics production and application of radioisotopes for medical purposes and environmental protection      **Cyclotrons And Their Applications - Proceedings Of The 13th International Conference, Vancouver, 1992** G Dutto, M K Craddock, 1993-01-08 This volume describes the latest developments in the design construction and operation of cyclotrons from compact machines producing intense beams for isotope production cancer therapy and industrial use to the larger versions giving higher energy beams of ions of various elements for nuclear and particle physics Important topics include ECR ion sources superconducting magnets and radiofrequency cavities beam dynamics and diagnostics beam cooling rings control systems and various medical and industrial applications      **International Conference on Exotic Nuclei and Atomic Masses** Michel Saint Simon, Olivier Sorlin, 1995      **Future Energy Conferences and Symposia ,1990      Nuclei Far From Stability and Atomic Masses and Fundamental Constants 1992.** R. Neugart, A. Wöhr, 1993-05-01 Nuclei Far from Stability and Atomic Masses and Fundamental Constants 1992 presents a collection of 200 papers presented at two conferences that were held concurrently Particular attention is paid to developments in the field of nuclear physics with energetic secondary beams and the increase of precision in the determination of atomic masses Topics covered include nuclear spectroscopy and nuclear shapes the heaviest elements fission and cluster radioactivity beta decay coupling constants neutrino mass moments and radii nuclei near the drip line and their structure atomic masses nuclear aspects in astrophysics and experimental developments      **Small Business Technology Transfer** DIANE Publishing Company, 1995-06 Invites small business concerns to submit grant applications under this second annual solicitation for the Small Business Technology Transfer STTR pilot program Firms with strong research capabilities in science or engineering are encouraged to participate Aims to increase private sector commercialization of technology developed Dept of Energy Research and Dev and improving the return on investment from federally funded research for economic and social benefits to the nation      **European Particle Accelerator Conference (Epac 94) (In 3 Volumes)** Christine Petit-jean-genaz, Vic Suller, 1994-11-26 These proceedings aim to provide a comprehensive overview of research technology and applications in the field of accelerators Contributions from the entire field of accelerators are presented including low and high energy machines and medical and industrial accelerators      *Handbook of Ion Sources* Bernhard Wolf, 2017-07-12 The Handbook of

Ion Sources delivers the data needed for daily work with ion sources. It also gives information for the selection of a suitable ion source and ion production method for a specific application. The Handbook concentrates on practical aspects and introduces the principle function of ion sources. The basic plasma parameters are defined and discussed. The working principles of various ion sources are explained and examples of each type of ion source are presented with their operational data. Tables of ion current for various elements and charge states summarize the performance of different ion sources. The problems related to the production of ions of non gaseous elements are detailed and data on useful materials for evaporation and ion source construction are summarized. Additional chapters are dedicated to extraction and beam formation, ion beam diagnosis, ion source electronics and computer codes for extraction, acceleration and beam transport. Emittance and brilliance are described and space charge effects and neutralization discussed. Various methods for the measurement of current profile, emittance and time structure are presented and compared. Intensity limits for these methods are provided for different ion energies. Typical problems related to the operation of ion source plasmas are discussed and practical examples of circuits are given. The influence of high voltage on ion source electronics and possibilities for circuit protection are covered. The generation of microwaves and various microwave equipment are described and special problems related to microwave operation are summarized. The Handbook of Ion Sources is a valuable reference on the subject of benefit to practitioners and graduate students interested in accelerators, ion implantation and ion beam techniques.
