Radiolabeled Blood Elements:

Radiolabeled Blood Elements J. Martin-Comin, M.L. Thakur, C. Piera, M. Roca, F. Lomena, 2012-12-06 Scintigraphic imaging with radiolabeled blood elements has continued to be a useful diagnostic modality. The major thrust of recent investigation has been in simplifying labeling techniques and developing new agents that will label blood elements selectively in vitro. The VI Symposium of the International Society of Radiolabeled Blood Elements was held in Barcelona, Spain, during November 23 to 27, 1992. The conference was sponsored by the NATO Scientific Affairs Division, the USA Department of Energy, and the Spanish National Health Service. This monograph comprises articles that represent most of the 85 papers, 70 oral and 15 posters presented during the symposium. The meeting was attended by 110 investigators hailing from 21 countries. Although ^{111}In oxine and $^{99\text{m}}\text{Tc}$ HMPAO remain the choice agents for labeling blood components for routine applications, there was heavy emphasis on developing new labeling agents that will either simplify the in vitro labeling procedure or even better will label blood components selectively in vivo by injecting the radioactive agents directly into patients. The degree of success in imaging target lesions in humans by using these agents has been excellent. **Radiolabeled Cellular Blood**

Elements M. L. Thakur, 2013-03-13 Preparing manuscripts with figures and tables for camera reproduction was a formidable task. Care has been taken for consistency and typographic accuracy. However, I make no claim that no errors exist in this volume. I hope, however, that the reader will understand and ignore any error and find this compendious volume useful for numerous biologic studies, physiologic explorations, and clinical applications of radiolabeled cellular blood elements in years to come. M. L. Thakur, Editor and the ASI Director. **ACKNOWLEDGEMENTS** Dr. Max Hardeman of the University of Amsterdam and Dr. Michael Ezekowitz of Yale University served as the codirectors of the Advanced Study Institute. Dr. Hardeman spent countless hours and contributed to the scientific program, took care of mailings in Europe, organized transportation in Italy, and communicated with the hotel management on numerous occasions. I cannot thank him enough. Dr. Ezekowitz collected some manuscripts and corrected a few. I am grateful to him. I take this opportunity once again to thank all the guests, faculty, who despite their busy schedules and time constraints accepted my invitation and made valuable contributions to the ASI. I am also grateful to all participants who were so friendly and were primary resources for many lively discussions. They made the ASI professionally beneficial and socially enjoyable. **Radiolabeled Blood Elements** J. Martin-Comin, M. L. Thakur, C.
