## **Radiology For The Mrcp:**

**Radiology for the MRCP** Graham Whitehouse, John Curtis, 1998-10-30 AI The MRCP is the membership exam for the Royal College of Physicians so it is essential that anyone wanting to practice hospital medicine passes it. It comes in two parts and radiology is covered in the second of these. Radiology covers the interpretation of all imaging modalities and techniques such as MRI and CT. Radiology for the MRCP is a self-assessment book for MRCP candidates comprising 180 questions each with 1 or 2 black and white images and detailed highly organized explanatory answers. The emphasis of the book is on clinical cases commonly featured in the MRCP examinations and on the new imaging modalities with which physicians need to be familiar but find gaining experience difficult. Answers are structured to reflect how answers should be presented to examiners in the various components of the MRCP Part 2: picture tests, short cases, long case, clinical Viva. Candidates can practise and assess their interpretation skills across a wide range of clinical conditions. **Radiology for the MRCP** Jeremy Hughes, Michael Hughes, Iain D. Lyburn, 2000 This new book will be invaluable in preparing for the difficult test of the Part 2 examination and in giving the physician confidence in interpreting a wide range of radiological imaging. *Radiology Cases for the MRCP* Vincent Williamson, Debra King, 1999 MRCP candidates are required to have a basic knowledge of radiological interpretation as it applies to clinical practice. Radiology Cases for the MRCP comprises 90 typical clinical cases which may be part of the photographic section of the MRCP Part 2 examination or may require interpretation during a short or long clinical case. The answers include discussion points in the format of a clinical or oral examination and clinical symptoms and signs are included wherever appropriate. *Radiology for MRCP* Sarah Howling, 2005 *Grainger & Allison's Diagnostic Radiology E-Book* Andy Adam, Adrian K.
