One Million Tomorrows Bob Shaw, 2011-09-29 The Price of Eternal Life In the 22nd Century no one had to die of old age; an immortality drug was available to all. Its only drawback was the side effect that ended a man's sex drive, so most men waited till their youth was fading before they took the final step and became cools. But Will Carewe became the first man to test a new variety of the drug, one without any side effects at all. The limitless future, a million tomorrows stretched before him with golden hope until a series of accidents made him realise that someone was trying to murder him. As an immortal Carewe had an infinitely greater stake in remaining alive. So he began the battle to find out who was after him and why.

Building Imaginary Worlds Mark J.P. Wolf, 2014-03-14 Mark J. P. Wolf's study of imaginary worlds theorizes world building within and across media including literature, comics, film, radio, television, board games, video games, the Internet, and more. Building Imaginary Worlds departs from prior approaches to imaginary worlds that focused mainly on narrative, medium, or genre and instead considers imaginary worlds as dynamic entities in and of themselves. Wolf argues that imaginary worlds, which are often transnarrative, transmedial, and transauthorial in nature, are compelling objects of inquiry for Media Studies. Chapters touch on a theoretical analysis of how world building extends beyond storytelling, the engagement of the audience, and the way worlds are conceptualized and experienced; a history of imaginary worlds that follows their development over three millennia from the fictional islands of Homer's *Odyssey* to the present; internarrative theory examining how narratives set in the same world can interact and relate to one another; an examination of transmedial growth and adaptation and what happens when worlds make the jump between media; an analysis of the transauthorial nature of imaginary worlds; the resulting concentric circles of authorship and related topics of canonicity, participatory worlds, and subcreation's relationship with divine Creation. Building Imaginary Worlds also provides the scholar of imaginary worlds with a glossary of terms and a detailed timeline that spans

three millennia and more than 1 400 imaginary worlds listing their names creators and the works in which they first appeared **Encyclopedia of Science Fiction** Don D'Amassa,2015-04-22 Presents articles on the science fiction genre of literature including authors themes significant works and awards An Informal History of the Hugos Jo Walton,2018-08-07 Engaged passionate and consistently entertaining An Informal History of the Hugos is a book about the renowned science fiction award for the many who enjoyed Jo Walton s previous collection of writing from Tor com the Locus Award winning What Makes This Book So Great The Hugo Awards named after pioneer science fiction publisher Hugo Gernsback and voted on by members of the World Science Fiction Society have been presented since 1953 They are widely considered the most prestigious awards in science fiction Between 2010 and 2013 Jo Walton wrote a series of posts for Tor com surveying the Hugo finalists and winners from the award s inception up to the year 2000 Her contention was that each year s full set of finalists generally tells a meaningful story about the state of science fiction at that time Walton s cheerfully opinionated and vastly well informed posts provoked valuable conversation among the field s historians Now these posts lightly revised have been gathered into this book along with a small selection of the comments posted by SF luminaries such as Rich Horton Gardner Dozois and David G Hartwell A remarkable guided tour through the field a kind of nonfiction companion to Among Others It s very good It s great New York Times bestselling author Cory Doctorow Boing Boing on What Makes This Book So Great *A Wreath of Stars* Bob Shaw,2011-09-29 Thornton s Planet is an anti neutrino planet detected on its approach to Earth It can be seen only through the newly developed magniluct lenses and its arrival causes a wave of panic When its course carries it past the earth interest in Thornton s Planet wanes Then comes news from the African state of Barandi Miners wearing magniluct lenses have seen ghosts in the mine passages The visit of Thornton s Planet has had effects on Earth further ranging than anyone could have imagined **Look at the Evidence** John Clute,2016-11-24 For more than 50 years John Clute has been reviewing science fiction and fantasy Look at the Evidence is a collection of reviews from a wide variety of sources including Interzone the New York Review of Science Fiction and Science Fiction Weekly about the most significant literatures of the twenty first century science fiction fantasy and horror the literatures Clute argues should be recognized as the central modes of fantastika in our times It covers the period between 1987 and 1992 *The Year's Best Science Fiction: Thirty-First Annual Collection* Gardner Dozois,2014-07-15 In the new millennium what secrets lay beyond the far reaches of the universe What mysteries belie the truths we once held to be self evident The world of science fiction has long been a porthole into the realities of tomorrow blurring the line between life and art Now in The Year s Best Science Fiction Thirty First Annual Collection the very best SF authors explore ideas of a new world in the year s best short stories This venerable collection brings together award winning authors and masters of the field such as Robert Reed Alastair Reynolds Damien Broderick Elizabeth Bear Paul McAuley and John Barnes And with an extensive recommended reading guide and a summation of the year in science fiction this annual compilation has become the definitive must read anthology
