The Redesigned Forest Chris Maser, 1990 **Wild Hunger** Bruce Wilshire, 1999-10-27 Why is it that even amidst affluence and power our culture is plagued by a variety of addictions In this pioneering work Bruce Wilshire searches for answers by giving serious attention to our genetic legacy from our hunter gatherer ancestors as well as to the unique ways we adapt to our environment through the practice of science and the creation of art and cities The work considers remedies for specific addictions including drugs alcohol cigarettes and gambling suggesting that wilderness exploration in the arts myths and ceremonies can help us rediscover what it means to be human creatures Bringing together the insights of philosophy religion cultural anthropology behavioral biology and the vast socio medical literature on addiction Wilshire ingeniously explores the limits of our adaptive capacity and the costs of depleting the natural regenerative functions of the Readings in the Philosophy of Technology David M. Kaplan, 2009-10-16 Ideal for professors who want to provide a body comprehensive set of the most important readings in the philosophy of technology from foundational to the cutting edge this book introduces students to the various ways in which societies technologies and environments shape one another The readings examine the nature of technology as well as the effects of technologies upon human knowledge activities societies and environments Students will learn to appreciate the ways that philosophy informs our understanding of technology and to see how technology relates to ethics politics nature human nature computers science food and animals Thinking like a Mall Steven Vogel, 2016-09-02 A provocative argument that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the built environment Environmentalism in theory and practice is concerned with protecting nature But if we have now reached the end of nature as Bill McKibben and other environmental thinkers have declared what is there left to protect In Thinking like a Mall Steven Vogel argues that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the environment that is the world that actually surrounds us which is always a built world the only one that we inhabit We need to think not so much like a mountain as Aldo Leopold urged as like a mall Shopping malls too are part of the environment and deserve as much serious consideration from environmental thinkers as do mountains Vogel argues provocatively that environmental philosophy in its ethics should no longer draw a distinction between the natural and the artificial and in its politics should abandon the idea that something beyond human practices such as nature can serve as a standard determining what those practices ought to be The appeal to nature distinct from the built environment he contends may be not merely unhelpful to environmental thinking but in itself harmful to that thinking The question for environmental philosophy is not how can we save nature but rather what environment should we inhabit and what practices should we engage in to help build it Forest Dreams, Forest **Nightmares** Nancy Langston, 2009-11-23 Across the inland West forests that once seemed like paradise have turned into an ecological nightmare Fires insect epidemics and disease now threaten millions of acres of once bountiful forests Yet no one

can agree what went wrong Was it too much management or not enough that forced the forests of the inland West to the verge of collapse Is the solution more logging or no logging at all In this gripping work of scientific and historical detection Nancy Langston unravels the disturbing history of what went wrong with the western forests despite the best intentions of those involved Focusing on the Blue Mountains of northeastern Oregon and southeastern Washington she explores how the complex landscapes that so impressed settlers in the nineteenth century became an ecological disaster in the late twentieth Federal foresters intent on using their scientific training to stop exploitation and waste suppressed light fires in the ponderosa pinelands Hoping to save the forests they could not foresee that their policies would instead destroy what they loved When light fires were kept out a series of ecological changes began Firs grew thickly in forests once dominated by ponderosa pines and when droughts hit those firs succumbed to insects diseases and eventually catastrophic fires Nancy Langston combines remarkable skills as both scientist and writer of history to tell this story Her ability to understand and bring to life the complex biological processes of the forest is matched by her grasp of the human forces at work from Indians white settlers missionaries fur trappers cattle ranchers sheep herders and railroad builders to timber industry and federal forestry managers The book will be of interest to a wide audience of environmentalists historians ecologists foresters ranchers and loggers and all people who want to understand the changing lands of the West **Secrets of the Old Growth** Forest David Kelly, Gary Braasch, 1988 A breathtaking and heartbreaking look at what remains of the great Pacific forest that once stretched from California to Alaska The text is both precise and passionate the photographs spiritual in their intensity Catch it while you can before it's recataloged under history RC Annotation copyrighted by Book News Inc Portland OR

Forest Certification in Sustainable Development Walter Smith, Chris Maser, 2000-09-27 From recycled products to organic food the movement to be environmentally friendly is now expanding into the forestry field Recognizing this impact Home Depot has committed to giving preference to selling certified wood proven to come from forests that meet certain biological and social sustainablility standards Retailers and vendors can o Nature as Subject Eric Katz, 1997 Written by one of the instrumental figures in environmental ethics Nature as Subject traces the development of an ethical policy that is centered not on human beings but on itself Katz applies this idea to contemporary environmental problems introducing themes of justice domination imperialism and the Holocaust This volume will stand as a foundational work for environmental scholars government and industry policy makers activists and students in advanced philosophy and environmental studies courses Ecological Literacy David W. Orr,1992-01-01 The most important discoveries of the 20th century exist not in the realm of science medicine or technology but rather in the dawning awareness of the earth's limits and how those limits will affect human evolution Humanity has reached a crossroad where various ecological catastrophes meet what some call sustainable development While a great deal of attention has been given to what governments corporations utilities international agencies and private citizens can do to help in the transition to sustainability little thought has been given to

what schools colleges and universities can do Ecological Literacy asks how the discovery of finiteness affects the content and substance of education Given the limits of the earth what should people know and how should they learn it Against Capitalism John Bellamy Foster, 2002-02 In recent years John Bellamy Foster has emerged as a leading theorist of the Marxist perspective on ecology His seminal book Marx s Ecology Monthly Review Press 2000 discusses the place of ecological issues within the intellectual history of Marxism and on the philosophical foundations of a Marxist ecology and has become a major point of reference in ecological debates This historical and philosophical focus is now supplemented by more directly political engagement in his new book Ecology against Capitalism In a broad ranging treatment of contemporary ecological politics Foster deals with such issues as pollution sustainable development technological responses to environmental crisis population growth soil fertility the preservation of ancient forests and the new economy of the Internet age Foster's introduction sets out the unifying themes of these essays enabling the reader to draw from them a consolidated approach to a rapidly expanding field of debate which is of critical importance in our times Within these debates on the politics of ecology Foster's work develops an important and distinctive perspective Where many of these debates assume a basic divergence of red and green issues and are concerned with the exact terms of a trade off between them Foster argues that Marxismproperly understoodalready provides the framework within which ecological questions are best approached This perspective is advanced here in accessible and concrete form taking account of the major positions in contemporary Last Wild Edge Susan Zwinger, 1999-06 The northwestern edge of North America is a final edge to ecological debate settle on a finite planet Where does mankind go from here Where else have we not settled altered and consumed Author Susan Zwinger suspects that we have saved this wild edge for last because its geography is punched exploded ground and drenched Its forest of enormous trees once created a boundary difficult to penetrate let alone farm Yet today this wildness is under threat as civilization bores its way into even this remote edge Gardening with a Wild Heart Judith Larner Lowry, 2007-03-19 Judith Lowry s voice and experiences make a rich matrix for essays that include discussions of wildflower gardening the ecology of native grasses wildland seed collecting principles of natural design and plant animal interactions This lyrical and articulate mix of the practical and the poetic combines personal story wildland ecology restoration gardening The Landscaping Ideas of Jays Judith Larner Lowry, 2007-04-16 This volume practices and native plant horticulture celebrates the beauty the challenges and the rewards of growing native plants at home Organized by season the author offers guidance on how to plan a garden with birds plants and insects in mind how to shape it with trees and shrubs paths and trails ponds and other features and how to cultivate maintain and harvest seeds and food from a diverse array of native annuals and perennials She demonstrates to gardeners in California how to boost native plant diversity while attracting wildlife and Designing Sustainable Forest Landscapes, **Tree** David Suzuki, Wayne Grady, 2018-07-20 The story conserving water of a single tree from the moment the seed is released from its cone until more than five hundred years later it lies on the

forest floor as a nurse log giving life to ferns mosses and hemlocks even as its own life is ending In this unique biography David Suzuki and Wayne Grady tell story that spans a millennium and includes a cast of millions but focuses on a single tree a Douglas fir Tree describes in poetic detail the organism's modest origins that begin with a dramatic burst of millions of microscopic grains of pollen The authors recount the amazing characteristics of the species how they reproduce and how they receive from and offer nourishment to generations of other plants and animals The tree's pivotal role in making life possible for the creatures around it including human beings is lovingly explored. The richly detailed text and Robert Bateman s original art pay tribute to this ubiquitous organism that is too often taken for granted Revised edition with a foreword by Peter Wohlleben author of The Hidden Life of Trees Extractives, Manufacturing, and Services David O. Whitten, 1997-04-22 The second volume in the Handbook of American Business History series this book offers concise histories of extractive manufacturing and service industries as well as extensive bibliographic essays pointing to the leading sources on each industry and bibliographic checklists Supplementing other bibliographic materials in business history this volume provides researchers with a much needed path through the vast array of material available in the library and on the Internet Indicating which resources to check and which to bypass the book is a guide to a sometimes overwhelming amount of information Each of the book s chapters provides a concise industry history beginning with the industry s rise to importance in the U S and continuing to the present The bibliographic essays provide a narrative outline of the leading sources published or made available in archives libraries or museum collections since 1971 when Lovett's American Economic and Business History Information Sources was published Each discussion concludes with a bibliographic checklist of the titles mentioned in the essay as well as other titles In a rapidly expanding information society researchers teachers and students may be easily overwhelmed by the exhaustive material available in print and electronically What is useful and what can be ignored is a strategic question and few know where to begin This book provides a guide Siskivou National Forest (N.F.), Shasta Costa Timber Sales and Integrated Resource, Curry County, 1991 Park Science .1993 The Ecological Community Roger S. Gottlieb, 2014-01-02 The Ecological Community offers important and previously unexplored responses to the environmental crisis The premise of this volume writes editor Roger Gottlieb is that the environmental crisis challenges the presuppositions of and creates a rich field of creative work in philosophy politics and moral theory These eighteen essays are fresh and compelling interrogations of the existing wisdom in a host of areas including liberalism communicative ethics rights theory and environmental philosophy itself Contributors Avner de Shalit Gus diZerega Roger S Gottlieb Eric Katz Robert Kirkman Andrew Light Brian Luke David Macauley Mark A Michael Carl Mitcham John O Neill Holmes Rolston III David Schlosberg William Throop Steven Vogel Mark I Wallace Peter S Wenz Michael E Zimmerman A Conspiracy of **Optimism** Paul W. Hirt, 1996-01-01 A Conspiracy of Optimism explains the controversy now raging over the U S Forest Service's management of America's national forests Confronted with the dual mandate of production and preservation the U

S Forest Service decided it could achieve both goals through more intensive management For a few decades after World War Two this conspiracy of optimism masked the fact that high levels of resource extraction were destroying forest ecosystems. The effects of intensive management massive clear cuts polluted streams declining wildlife populations and marred scenery initiated several decades of environmental conflict that continues to the present Hirt documents the roots of this conflict and illuminates recent changes in administration and policy that suggest a hopeful future for federal lands
