The Rediscovery of Inner Experience Lucy Bregman, 1982      Pitirim A. Sorokin: Rediscovering a Master of Sociology Emiliana Mangone, 2023-09-12 Pitirim A Sorokin is a controversial figure in the history of sociology of which he remains one of the masters Those who read Sorokin today must however frame the historical reality experienced by the scholar his Russian and American experiences because the evolution of his thought had several phases that correspond to his personal family and professional lives he founded and directed the Department of Sociology at Harvard University for many years This Russian American sociologist argued that socio cultural phenomena must be studied following their dynamism in space and time since the constituent elements personality society and culture are constantly changing and cannot be studied separately Reviving his thought is not a form of celebration but a moment to reflect on how some sociology classics still have their relevance and how all too often they are forgotten This is why this book takes up his main conceptualizations by anchoring them to contemporary society whose transformations are often difficult to read and above all to highlight how the role of sociology as a science has in part lost sight of its ontological foundation as a service to humanity or public service The theoretical paths taken by Sorokin range from Social and Cultural Dynamics to Social Mobility and to many other topics such as man and society in calamities or love and altruism one of Sorokin s latest topics All these topics can revive the idea of a sociology that holds together the micro meso and macro dimensions and allows us to predict changes in society

**Rediscovering Empathy** Karsten Stueber, 2010-08-13 Empathy as epistemically central for our folk psychological understanding of other minds a rehabilitation of the empathy thesis in light of contemporary philosophy of mind In this timely and wide ranging study Karsten Stueber argues that empathy is epistemically central for our folk psychological understanding of other agents that it is something we cannot do without in order to gain understanding of other minds Setting his argument in the context of contemporary philosophy of mind and the interdisciplinary debate about the nature of our mindreading abilities Stueber counters objections raised by some in the philosophy of social science and argues that it is time to rehabilitate the empathy thesis Empathy regarded at the beginning of the twentieth century as the fundamental method of gaining knowledge of other minds has suffered a century of philosophical neglect Stueber addresses the plausible philosophical misgivings about empathy that have been responsible for its failure to gain widespread philosophical acceptance Crucial in this context is his defense of the assumption very much contested in contemporary philosophy of mind that the notion of rational agency is at the core of folk psychology Stueber then discusses the contemporary debate between simulation theorists who defend various forms of the empathy thesis and theory theorists In distinguishing between basic and reenactive empathy he provides a new interpretive framework for the investigation into our mindreading capacities Finally he considers epistemic objections to empathy raised by the philosophy of social science that have been insufficiently discussed in contemporary debates Empathy theorists Stueber writes should be prepared to admit that although empathy can be regarded as the central default mode for understanding other agents there are certain limitations in its ability to make sense of other agents and there are supplemental theoretical strategies available to overcome these limitations

R. Dodds** Christopher

Stray, Christopher Pelling, Stephen Harrison, 2019-09-26 Rediscovering E R Dodds offers the first comprehensive assessment of a remarkable classical scholar who was also a poet with extensive links to twentieth century English and Irish literary culture the friend of Auden and MacNeice Dodds was born in Northern Ireland but made his name as Regius Professor of Greek at Oxford from 1936 to 1960 succeeding Gilbert Murray Before this he taught at Reading and Birmingham was active in the Association of University Teachers or AUT of which he became president and brought an outsider s perspective to the comfortable and introspective world of Oxford His famous book *The Greeks and the Irrational* 1951 remains one of the most distinguished and visionary works of scholarship of its time though much less well known is his long and influential involvement with psychic research and his work for the reconstruction of German education after the Second World War The contributions to this volume seek to shed light on these less explored areas of Dodds life and his significance as perhaps the last classicist to play a significant role in British literary culture as well as examining his work across different areas of scholarship notably Greek tragedy A group of memoirs one by his pupil and former literary executor Donald Russell and three by younger friends who knew visited and looked after Dodds in his last years complement this portrait of the influential scholar and poet offering a glimpse of the man behind the legacy      *Ecopsychology, Phenomenology, and the Environment*

Douglas A. Vakoch, Fernando Castrillón, 2014-02-17 This book seeks to confront an apparent contradiction that while we are constantly attending to environmental issues we seem to be woefully out of touch with nature The goal of Ecopsychology Phenomenology and the Environment is to foster an enhanced awareness of nature that can lead us to new ways of relating to the environment ultimately yielding more sustainable patterns of living This volume is different from other books in the rapidly growing field of ecopsychology in its emphasis on phenomenological approaches building on the work of phenomenological psychologists such as Maurice Merleau Ponty This focus on phenomenological methodologies for articulating our direct experience of nature serves as a critical complement to the usual methodologies of environmental and conservation psychologists who have emphasized quantitative research Moreover Ecopsychology Phenomenology and the Environment is distinctive insofar as chapters by phenomenologically sophisticated ecopsychologists are complemented by chapters written by phenomenological researchers of environmental issues with backgrounds in philosophy and geology providing a breadth and depth of perspective not found in other works written exclusively by psychologists      *Rediscover the Magick of the Gods and Goddesses* Jean-Louis de Biasi, 2014-07-08 The philosophical roots of much of Wicca and Paganism as well as Western ceremonial magick come from ancient Egypt In this thoroughly researched book the Grand Master of the Aurum Solis shares the history and evolution of the theurgic tradition including the origins of Hermeticism in
