The discovery that nitrogen monoxide or nitric oxide NO is a biologically produced free radical has revolutionized our thinking about physiological and pathological processes This discovery has ignited enormous interest in the scientific community When generated at low levels NO is a signaling molecule but at high concentration NO is a cytotoxic molecule The physiological and pathological processes of NO production and metabolism and its targets currently areas of intensive research have important pharmacologic implications for health and disease **Single Molecule Tools, Part B:**

Super-Resolution, Particle Tracking, Multiparameter, and Force Based Methods ,2010-07-09 Single molecule tools have begun to revolutionize the molecular sciences from biophysics to chemistry to cell biology They hold the promise to be

able to directly observe previously unseen molecular heterogeneities quantitatively dissect complex reaction kinetics ultimately miniaturize enzyme assays image components of spatially distributed samples probe the mechanical properties of single molecules in their native environment and just look at the thing as anticipated by the visionary Richard Feynman already half a century ago Single Molecule Tools Part B Super Resolution Particle Tracking Multiparameter and Force Based Methods captures a snapshot of this vibrant rapidly expanding field presenting articles from pioneers in the field intended to guide both the newcomer and the expert through the intricacies of getting single molecule tools Includes time tested core methods and new innovations applicable to any researcher employing single molecule tools Methods included are useful to both established researchers and newcomers to the field Relevant background and reference information given for procedures can be used as a guide to developing protocols in a number of disciplines

Protein Engineering for Therapeutics K. Dane Wittrup, 2012 This volume of Methods in Enzymology looks at Protein Engineering for Therapeutics The chapters provide an invaluable resource for academics researchers and students alike With an international board of authors this volume is split into sections that cover subjects such as Peptides and Scaffolds Chapters provide an invaluable resource for academics researchers and students alike International board of authors This volume is split into sections that cover subjects such as Peptides and Scaffolds

Biothermodynamics Part A Michael L. Johnson, Jo M. Holt, Gary K. Ackers, 2009-03-14 In the past several years there has been an explosion in the ability of biologists molecular biologists and biochemists to collect vast amounts of data on their systems This volume presents sophisticated methods for estimating the thermodynamic parameters of specific protein protein protein DNA and small molecule interactions The use of thermodynamics in biological research is used as an energy book keeping system While the structure and function of a molecule is important it is equally important to know what drives the energy force These methods look to answer What are the sources of energy that drive the function Which of the pathways are of biological significance As the base of macromolecular structures continues to expand through powerful techniques of molecular biology such as X ray crystal data and spectroscopy methods the importance of tested and reliable methods for answering these questions will continue to expand as well

Protein Sensors of Reactive Oxygen Species, Part A: Selenoproteins and Thioredoxin, 2002-03-12 This volume of Methods in Enzymology is concerned with the rapidly developing field of selenoprotein synthesis and its related molecular genetics Progressive information on the topics of proteins as redox sensors selenoproteins and the thioredoxin system is studied using methods such as bioinformatics DNA chip technology cell biology molecular genetics and enzymology The information on novel selenoproteins identified from genomic sequence data as well as current knowledge on glutathione peroxidases selenoprotein P iodothyronine deiodinases and thioredoxin reductases is presented in a method based approach
