Reexamining Family Stress Wesley R. Burr, Shirley Klein, 1994 The study of family stress has been dominated by the ABC X model developed over several decades by Rueben Hill and other researchers Now the distinguished authors of this volume along with a group of their colleagues and students reexamine the theoretical literature in search of a better way of understanding stress and its management in families They liberate their inquiry by setting aside traditional positivist notions in favor of a systematic paradigm one that allows them to view stress as a multifaceted phenomenon with multiple causes and coping strategies Then using a series of qualitative and quantitative studies of different families in stress they outline the various patterns of family responses to stress the elements of the family system impacted by stressful events and the helpfulness and harmfulness of management strategies in different families The research and theory found in *Reexamining Family Stress* and its implications for practitioners is an important step forward in our understanding and dealing with families experiencing stress In *Reexamining Family Stress* authors Wesley R Burr Shirley R Klein and associates present a systemic model of family stress that moves sharply away from the popular positivist ABC X models Within this presentation the authors include a comprehensive discussion of the theory upon which they build their model and of the outcome research they completed to answer the unique questions that emerged in the model's development *Journal of Family Therapy* In *Reexamining Family Stress* Wesley R Burr Shirley R Klein and associates offer the field a fresh perspective to family stress theory Their book builds on the earlier theory building efforts by Robert Burr using a systemic approach and tests this refined theoretical approach with an empirical study The book makes a unique contribution to the family stress field *Journal of Marriage and the Family* Highly recommended to professionals and students in the fields of health promotion social work and family and mental health in all settings work religious community provider etc With a growing concern about the health of the family amidst the sea of potential family and societal stressors this book offers many excellent insights and perspectives and well documented recommendations on some of the most effective coping strategies Many of these strategies can be developed nurtured and strengthened throughout life allowing all members of the family to be better prepared when family or life stressors are encountered Even if stressors are minimal many of these same strategies are good for building strong thriving families and individuals This is a book well worth the reading *American Journal of Health Promotion* *Individual and Family Stress and Crises* Janice Gauthier Weber, 2010-12-02 The first comprehensive text on stress and crisis management specifically tailored to courses focusing on the family Organized by stress model this book helps readers understand the relationships among models research crisis prevention and crisis management with individuals and families Providing a balance of theory research hands on applications and intervention strategies this innovative text presents a comprehensive overview of the field Intended Audience *Individual and Family Stress and Crises* is ideal as a core text for upper division undergraduate and graduate students in courses such as Family Crisis Family Stress Coping and

Family Care of Older People in Europe Ian Philp, 2001. Developing appropriate responses to an ageing population is recognized by policy makers throughout the developed world as a top priority, as is the vital contribution made by family caregivers. However, cultural, demographic, and organizational differences between countries have encouraged diverse patterns of response to this common challenge. This book provides a systematic cross-cultural analysis of contemporary patterns and future trends in all major countries of the European Union. Additional interest is provided by including Poland emerging from the post-Communist block as the country at the forefront for joining the European Union. The book should be useful to European policy makers and academics involved in studying the health and social care needs of older people and the capacity, contribution, and needs of family caregivers who provide care to older people. The book is also relevant for policy makers and researchers in other countries, mostly in North America and Australia, who wish to study European approaches to supporting older people and family caregivers.
