Humphreys,J.H. Fetzer,2012-12-06 On January 20th 22nd and 29th 1970 Saul Kripke delivered three lectures at Princeton University They produced something of a sensation In the lectures he argued amongst other things that many names in ordinary language referred to objects directly rather than by means of associated descriptions that causal chains from language user to language user were an important mechanism for preserving reference that there were necessary a posteriori and contingent a priori truths that identity relations between rigid designators were necessary and argued more tentatively that materialist identity theories in the philosophy of mind were suspect Interspersed with this was a consider able amount of material on natural kind terms and essentialism As a result of these lectures and a related 1971 paper Identity and Necessity Kripke 1971 talk of rigid designators Hesperus and Phosphorus meter bars gold and H 0 and suchlike

quickly became commonplace in philosophical circles 2 and when the lectures were published under the title Naming and Necessity in the collection The Semantics of Natural Language Davidson and Harman l 1972 that volume became the biggest seller in the Reidel later Kluwer list The cluster of theses surrounding the idea that a relation of direct reference 2 exists between names and their referents is now frequently referred to as The 3 New Theory of Reference   *Referential Opacity* Alan Leslie Reeves,1970   **Modal Logic as Metaphysics** Timothy Williamson,2013-03-28 Are there such things as merely possible people who would have lived if our ancestors had acted differently Are there future people who have not yet been conceived Questions like those raise deep issues about both the nature of being and its logical relations with contingency and change In Modal Logic as Metaphysics Timothy Williamson argues for positive answers to those questions on the basis of an integrated approach to the issues applying the technical resources of modal logic to provide structural cores for metaphysical theories He rejects the search for a metaphysically neutral logic as futile The book contains detailed historical discussion of how the metaphysical issues emerged in the twentieth century development of quantified modal logic through the work of such figures as Rudolf Carnap Ruth Barcan Marcus Arthur Prior and Saul Kripke It proposes higher order modal logic as a new setting in which to resolve such metaphysical questions scientifically by the construction of systematic logical theories embodying rival answers and their comparison by normal scientific standards Williamson provides both a rigorous introduction to the technical background needed to understand metaphysical questions in quantified modal logic and an extended argument for controversial provocative answers to them He gives original precise treatments of topics including the relation between logic and metaphysics the methodology of theory choice in philosophy the nature of possible worlds and their role in semantics plural quantification compared to quantification into predicate position communication across metaphysical disagreement and problems for truthmaker theory   Knowledge, Language and Logic: Questions for Quine A.
