Refining the Imagination Vassar College. Frances Lehman Loeb Art Center,1999 **Alice Neel** Alice Neel,2002 Alice Neel s remarkable drawings are intimate explorations of her personal life her loves and her family her friends people she met in New York and the art world Spontaneous and dynamic the works on paper in Black and White provide insight into her environments exterior and interior In them she positions universal themes motherhood death longing within the sphere of her private existence and her social unconscious While a handful of the drawings are urban cityscapes and others are domestic settings the majority are portraits And when Neel the self named Collector of Souls composed a portrait she never posed her sitters Instead she studied and spoke intimately with her subjects as they unconsciously assumed their most natural attitude which she believed exhorted all their character and life experience The images she created full of distinctly innate gestures stemmed from her succinct understanding and assembled memory and coalesced into a unique impression of a person Landscapes of Retrospection Vassar College. MCMILLAN,2018 Education Through the Imagination (Classic Reprint) Margaret McMillan,2015-07-01 Excerpt from Education Through the Imagination The importance of the role played by Imagination in the higher branches of mental activity has been long admitted by the learned Sir Benjamin Brodie speaking at the British Association in 1859 alluded to the Imagination as that wonderful faculty the source of poetic genius the instrument of discovery in Science without which Newton would never have invented fluxions nor Davy decomposed the earths and alkalies

nor would Columbus have found another continent Popular opinion does not incline to regard imagination as a very important faculty for all The imaginative person is usually regarded as a visionary Poets painters romancers children these are supposed to represent the imaginatives People enjoy their works more or less and indulge them in their fancies as children But they are apt to regard imagination as a kind of weakness in practical men And yet nothing justifies us in prescribing imagination to a few occupations and persons It is the creative power of the mind which gives life to all work The discoveries of science and the creations of art represent certain forms of its activity forms which attract and compel attention But it is as reasonable to say that there is light only on the summits of hills as to say that there is creative power only in the minds of artists and scientists About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
