Showman,1974 Editions for 1954 and 1967 by O Handlin and others **The American West and Its Interpreters** Richard W. Etulain,2023-05 Distinguished historian Richard W Etulain brings together a generous selection of essays from his sixty year career as a specialist on the US West in this essential volume Each essay provides an invaluable overview of the rise of western literary history and historiography including insightful evaluations of individual historians revealing summaries of regional literature and discussions of western stories yet to be told Together these writings furnish readers with useful considerations of important subjects about the American West All those interested in the American West and its interpreters will find these illuminative moments of literary history and historiography especially appealing *Philosophical Reflections on Antiquity* Paul Fairfield,2020-09-02 *Philosophical Reflections on Antiquity* Historical Change addresses the question of whether there is a logic of historical change and whether the collapse of teleology should deter us from inquiring anew whether any recurring patterns and themes show themselves amid the complexity of historical life Paul Fairfield argues that if any conception of universal history remains possible it is one that rejects teleology and causal laws while identifying thematic tendencies that afford some semblance of unity including the enduring phenomena that are interlocution the struggle for predominance and the endless back and forth that play out between them This book examines the transitional periods of archaic Greece and late antiquity the ostensible birth and death of the ancient west Fairfield argues that an interpretation of the social political and intellectual history of these important turning points brings to light some philosophical understanding of the dynamics of change itself observing that the transition from archaic to classical Greece was no miracle while the end of the Roman era can no longer be conceived as a story of decline and fall Rather Fairfield posits these were not complete breaks but relative beginnings and endings in narratives that are ongoing Scholars of philosophy history and anthropology will find this book particularly useful **The Idea of Decline in Western History** Arthur Herman,2010-06-15 Historian Arthur Herman traces the roots of declinism and shows how major thinkers past and present have contributed to its development as a coherent ideology of cultural pessimism From Nazism to the Sixties counterculture from Britain s Fabian socialists to America s multiculturalists and from Dracula and Freud to Robert Bly and

Madonna this work examines the idea of decline in Western history and sets out to explain how the conviction of civilization's inevitable end has become a fixed part of the modern Western imagination Through a series of biographical portraits spanning the 19th and 20th centuries the author traces the roots of declinism and aims to show how major thinkers of the past and present including Nietzsche DuBois Sartre and Foucault have contributed to its development as a coherent ideology of cultural pessimism

Framing the West Carol J. Williams, 2003-10-30 Framing the West argues that photography was intrinsic to British territorial expansion and settlement on the northwest coast Williams shows how male and female settlers used photography to establish control over the territory and its indigenous inhabitants as well as how native peoples eventually turned the technology to their own purposes Photographs of the region were used to stimulate British immigration and entrepreneurialism and images of babies and children were designed to advertise the population growth of the settlers Although Indians were taken by Anglos to document their disappearing traditions and to show the success of missionary activities many Indians proved receptive to photography and turned posing for the white man's camera to their own advantage This book will appeal to those interested in the history of the West imperialism gender photography and First Nations Native America Framing the West was the winner of the Norris and Carol Hundley Prize of the Pacific Coast Branch of the American Historical Association

Preserving Western History Andrew Gulliford, 2005-08-15 The first collection of essays on public history in the American West

Go West! Bernhard Hemetsberger, Andreas Oberdorf, 2025-04-21 The West is a central concept in public discourse but its meaning is often unclear and open to manifold interpretations and ascriptions of belonging and exclusion Who is part of the West When and where is it located How did its meaning change over space and time Who are the mediators of the West and what is their interest in terms of culture and education The West is often used without any critical questioning though This is also reflected in history of education research especially with focus on transnational or transatlantic issues Here the West is a sort of container term or fuzzy concept that can refer to a variety of historical entanglements and cultural transfers in school systems and education but also to conflicts and crises accordingly This book aims to stimulate a critical reflection and debate on ideas of the West in the history of education by gathering scholars from various fields of historical research With a reflexive historical distance to current political incidents in which ideas of the West are revived the contributions in this book are intended to enable readers to evaluate representations of the West in current academic or public discourses and debates alike

Global History, Globally Sven Beckert, Dominic Sachsenmaier, 2018-02-22 In recent years historians in many

different parts of the world have sought to transnationalize and globalize their perspectives on the past Despite all these efforts to gain new global historical visions however the debates surrounding this movement have remained rather provincial in scope Global History Globally addresses this lacuna by surveying the state of global history in different world regions Divided into three distinct but tightly interweaved sections the book s chapters provide regional surveys of the practice of global history on all continents review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work The authors hail from various world regions and are themselves leading global historians Collectively they provide an unprecedented survey of what today is the most dynamic field in the discipline of history As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them Global History Globally is a must read book for all students and scholars of global history
