Reflections on Medicine, Biotechnology, and the Law Zelman Cowen, 1986 **Human Rights and Biomedicine** George P. Ferguson,Graeme T. Laurie,2016-03-09 This book marks the retirement of Professor Sheila McLean whose contribution to the discipline of medical law has been truly ground breaking As one of the pioneers of the discipline Sheila McLean inspired a revolution in the ways in which lawyers doctors courts and patients perceive the relationship between medicine and the law The first International Bar Association Professor of Law and Ethics in Medicine she has worked tirelessly to champion the importance of law s role in regulating medicine and protecting patients rights The span in content of this book reflects the range of contributions that Professor McLean has herself made Her work gave direction and shape to a new field of study at a time when few questioned the authority of medicine or thought much about the plight of the patient This collection brings together 21 leading scholars in healthcare law and ethics to honour the depth and significance of her contribution Including authors from the US Australia Canada and New Zealand the contributions cover areas as diverse as start and end of life reproductive rights and termination of pregnancy autonomy of patients the protection of vulnerable patient groups and the challenges posed by new technologies Human Rights and Human Nature Marion Albers,Thomas Hoffmann,Jörn Reinhardt,2014-02-18 This book explores both the possibilities and limits of arguments from human nature in the context of human rights Can the concept of human nature provide a basis for understanding fundamental rights Is it plausible to justify

the claim to universal validity of human rights by reference to human nature Or does the idea of human rights in its modern post 1945 manifestation go in essence beyond human nature The essays in this volume introduce naturalistic positions and their concomitant critiques They address the role that human nature both actually does and potentially may play in forming a foundation for and acting as an exemplification of fundamental rights Beyond that they give attention to the challenges caused by Life Sciences Human nature itself is subject to transformation and transgression in an unprecedented manner The essays reflect on issues such as reproduction species manipulation corporeal autonomy and enhancement Contributors are jurists philosophers and political scientists from Germany Switzerland Turkey Poland and Japan **Global Biopiracy** Ikechi Mgbeoji, 2011-11-01 Legal control and ownership of plants and traditional knowledge of the uses of plants TKUP is a vexing issue The phenomenon of appropriation of plants and TKUP otherwise known as biopiracy thrives in a cultural milieu where non Western forms of knowledge are systemically marginalized and devalued as folk knowledge or characterized as inferior Global Biopiracy rethinks the role of international law and legal concepts the Western based Eurocentric patent systems of the world and international agricultural research institutions as they affect legal ownership and control of plants and TKUP The analysis is cast in various contexts and examined at multiple levels The first deals with the Eurocentric character of the patent system international law and institutions The second involves the cultural and economic dichotomy between the industrialized Western world and the westernizing developing world The third level of analysis considers the phenomenal loss of human cultures and plant diversity Exhaustively researched and eloquently argued Global Biopiracy sheds new light on a contentious topic The impact of intellectual property law on indigenous peoples and informal or traditional innovations is a field of study that currently includes only a handful of scholars Biopiracy will be an invaluable resource for students teachers and legal practitioners *Jewish Year Book 2008* Stephen W.
