Reform And Development In Deng's China:

Political Economy Of Deng's Nanxun, The: Breakthrough In China's Reform And Development John Wong, 2014-03-12 This volume is about the political economy of Deng Xiaoping's Nanxun tour of South China which was the most critical phase in China's reform and development since 1978. The first round of Deng's reform resulted in high growth through the 1980s. However, it created a messy half-reformed economy with many problems, including the Tiananmen incident. The immediate aftermath of the Tiananmen was a collapse of economic growth and a reform deadlock. To break out from this low-level reform growth trap, Deng decided to launch the Nanxun not just to reignite the reform but also to complete China's march towards a market economy. Looking back, the Nanxun led to the most crucial reform breakthrough which in turn sparked off a dynamic reform growth nexus for China's eventual economic take-off. The chapters in this volume were originally policy reports on China meant for the Singapore government. These reports were written based on the information available at that time and reflected the prevailing political mood. Each chapter is accompanied by a detailed introduction that is aimed at providing a broad background for readers to better understand the Nanxun period. The introduction also serves as a post-evaluation of the events based on new information and shows how those events have evolved over the years. In combination, these chapters should piece together a reasonably realistic picture of the basic politics and economics of the crucial Nanxun period.

China Under Reform Zhimin Lin,2014-09-02 In 1976 at the death of its longtime leader Mao Zedong China was in a state

of economic stagnation and social chaos Mao's radical policies and continual political campaigns including the disastrous Cultural Revolution had taken a heavy toll on the Chinese people By the end of the decade however a more moderate pragmatic leadership under Deng Xiaoping had come to power and put China on a course to recovery In the four decades since then China's economic growth has been nothing short of amazing China is now one of the world's leading manufacturing centers and an estimated 400 million of its people have been lifted out of poverty Still problems remain Among them are a growing gap in living standards between rural and urban areas rampant corruption and a repressive government that has resisted political reforms This volume provides a comprehensive view of China's historic reforms It not only details what has been accomplished so far but also offers a glimpse at what the future might hold for the world's most populous nation
