THORINGTON,2025-05-22 Refraction of the Human Eye and Methods of Estimating the Refraction is a detailed exploration of the principles and techniques involved in understanding and measuring the refractive properties of the human eye. Authored by James Thorington this comprehensive guide delves into the intricacies of refraction offering insights into the methods used to assess and correct vision. The book covers a range of topics including the anatomy of the eye the physics of light and the various instruments and procedures employed in refraction analysis. A dedicated section addresses the fitting of spectacles and eyeglasses providing practical guidance for practitioners in the field of optometry and ophthalmology. With its thorough explanations and practical applications this book serves as a valuable resource for students clinicians and anyone seeking a deeper understanding of the human eye and its refractive capabilities.
