technocratic culture and civilization The author argues that technocratic cultural and institutional forms were and are part of a collective script for Western culture The American script combined the scientific commercial and technological aspects of the Enlightenment with the radical 17th century Protestant belief in America as a new Zion In the twentieth century the synthesis of mission along with global technocratic knowledge and institutions created the Wilsonian liberal technocratic order As the principal agent and protector of the modern capitalist international system America the self defined Redeemer Nation has moved through the controlled anarchy of international relations from one war and crisis to the next confirmed in its self defined role and mission The Economics of Defence, Disarmament, and Peace Keith Hartley,Nick Hooper,1990

This book examines the new framework of ideas since 1989 which will inform our understanding on how development in the old Third World should be understood Star Wars and European Defence Hans Gunter Brauch,1987-06-18 **High-Tech Europe** Wayne Sandholtz,2024-06-04 Governments have recognized for decades the dynamic role played by microelectronics computers and telecommunications in the modern economy Although Europe s deficiencies in these crucial sectors had long been acknowledged it was not until the 1980s that European nations began collaborating to develop and promote high tech industries Their collaboration gives rise to many questions Why for example did the joint efforts come at such a late date rather than in the 1960s or 70s And how is it possible to work together in economically sensitive areas These questions point to fundamental issues in the areas of international cooperation international institutions and technology policy Before the institution of the collaborative programs ESPRIT European Strategic Programme for Research and Development in Information Technology RACE R D in Advanced Communications technologies in Europe and EUREKA European Research Coordination Agency in the 1980s each European country sought its own technological renaissance through protection of national firms behind walls of technical standards procurement preferences and research subsidies This thorough carefully researched work examines the breakdown of these walls It will appeal to political scientists economists and scholars of technology and Western Europe interested in the political contours of the high tech landscape This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1992
